A Bibliography on Writing and Written Language Konrad Ehlich, Florian Coulmas, Gabriele Graefen, 2011-06-01 The bibliography offers information on research about writing and written language over the past 50 years No comprehensive bibliography on this subject has been published since Sattler's 1935 handbook With a selection of some 27 500 titles it covers the most important literature in all scientific fields relating to writing Emphasis has been placed on the interdisciplinary organization of the bibliography creating many points of common interest for literacy experts educationalists psychologists sociologists linguists cultural anthropologists and historians The bibliography is organized in such a way as to provide the specialist as well as the researcher in neighboring disciplines with access to the relevant literature on writing in a given field While necessarily selective it also offers information on more specialized bibliographies In addition an overview of norms and standards concerning script and writing will prove very useful for non professional readers It is therefore also of interest to the generally interested public as a reference work for the humanities **Education of the Gifted in Europe** H.W. Boxtel, M.W. Katzko, F.J. Monks, 1992-01-01 The findings of the workshop part of the program of the Council for Cultural Cooperation of the Council of Europe is designed to provide information that the ministries of education in the several member states can use to prepare policy decisions Reviews the research on gifted children and adolescents Swedish Mentality Åke Daun, 1996-01-12 Is there a distinctly Swedish national character Are Swedes truly shy unemotional conflict avoiding melancholy and dour Swedish Mentality the English translation of the hugely successful book published in Sweden in 1989 considers the reality behind the myth The author Åke Daun is a respected ethnologist who is sometimes referred to as the guru of Swedish character In recent years it has become popular to discuss Swedishness and Swedish identity The advent of the European Union and the increasing presence of immigrant refugees in Sweden have fueled public debate on the distinctiveness of Swedish culture Daun however goes beyond stereotype drawing upon statistics gathered over more than a decade of research The result is an entertaining and engagingly written book Throughout Daun quotes from interviews with native Swedes and immigrants as well as from travel accounts folklore and proverbs We learn why some Swedes might prefer to walk up a flight of stairs rather than share an elevator with a neighbor and why some gain satisfaction from walking alone in the woods or going fishing Daun describes a range of factors influencing Swedish character including population composition rural background and even climate He recognizes behavioral variations related to gender age class and region and he considers subtleties of individual character as well Swedish Mentality should interest a wide array of readers whether of Swedish descent or not *Evaluación Diagnóstica en la Atención de Estudiantes Con Necesidades Educativas Especiales* , **International Directory of Research Institutions on Higher Education** European Centre for Higher Education (Unesco), 1987 UNESCO pub International directory research centres for higher education Family Violence Against Children Detlev Frehsee, Wiebke Horn, Kai-D. Against Children Theoretical and experimental base for teaching reading Richard L. Venezky, 2019-11-18 No detailed description available for Theoretical and experimental base for teaching reading Beating the Devil Out of Them Valerie Bentz, 2017-07-28 Based on his studies of over 9 000 families Murray A Straus the foremost researcher on family violence in the world discusses the extent to which parents in the United States use corporal punishment such as spanking and slapping and its effects on their children The question of whether corporal punishment is an effective method of discipline is hotly debated Straus contends that this believed to be minor form of physical violence is precursor to much violence that plagues our world Children who are spanked quickly learn that love and violence can go hand in hand Since spanking is generally done by loving caring parents for the child's own good a child can learn that hitting is morally right Straus describes what he has learned through two decades of research children who are spanked are from two to six times more likely to be physically aggressive to become juvenile delinquents and later as adults to use physical violence against their spouses to have sadomasochistic tendencies and to suffer from depression Straus alerts parents to these risks and argues that spanking adversely affects not only the children who are subjected to it but society as a whole This groundbreaking book now available in paperback with a substantive new introduction and new concluding chapter is essential reading for parents as well as teachers lawyers and judges Professionals in fields such as social work child protection delinquency and criminology psychology and politics will find it of critical importance The environmental turn in postwar Sweden David Larsson Heidenblad, 2021-09-07 The Stockholm Conference of 1972 drew the world's attention to the global environmental crisis but for people in Sweden the threat was nothing new Anyone who read the papers or watched the television news was already familiar with the issues Five years early in the summer of 1967 the situation was very different So what happened in between This book explores the environmental turn that took place in Sweden in the late 1960s This radical change the realisation that human beings were in the process of destroying their own environment had major and far reaching consequences What was it that opened people's eyes to the crisis When did it happen Who set the ball rolling These are some of the questions the book addresses shedding new light on the history of environmentalism *The National union catalog, 1968-1972*, 1973

Rethinking Meter Alan Holder, 1995 This study finds that in scanning poetry the commitment to the foot as a unit of measure satisfies a desire for a poem to display a system But that system is achieved only at the cost of distorting or obscuring the true stress configuration of verse lines The foot also comes into play in setting up the notion of an ideal line supposedly heard by the mind's ear and said to be in tension or counterpoint with the actual line Rethinking Meter discards this approach as removing us from our authentic experience of a poem's movement Before presenting its own view of meter the book takes up the issues of how the words of a poem are to be enunciated the place of pauses and the notion of the line as the essential formal feature marking off poetry from prose Focusing on iambic pentameter Rethinking Meter proceeds to offer a view of metrical patterns that discards the foot entirely BOOK JACKET Title Summary field provided by Blackwell
