## **Edmund Husserl's Origin Of Geometry An Introduction:**

**Edmund Husserl's Origin of Geometry** Jacques Derrida, 1989-01-01 Edmund Husserl's Origin of Geometry An Introduction 1962 is Jacques Derrida's earliest published work In this commentary interpretation of the famous appendix to Husserl's The Crisis of European Sciences and Transcendental Phenomenology Derrida relates writing to such key concepts as differing consciousness presence and historicity Starting from Husserl's method of historical investigation Derrida gradually unravels a deconstructive critique of phenomenology itself which forms the foundation for his later criticism of Western metaphysics as a metaphysics of presence The complete text of Husserl's Origin of Geometry is included

Edmund Husserl's Origin of Geometry Jacques Derrida, 1978      **Husserl at the Limits of Phenomenology** Edmund Husserl, Maurice Merleau-Ponty, 2002 Combining Maurice Merleau-Ponty's 1960 course notes on Edmund Husserl's The Origin of Geometry his course summary related texts and critical essays this collection offers a unique and welcome glimpse into both Merleau-Ponty's nuanced reading of Husserl's famed late writings and his persistent effort to track the very genesis of truth through the incarnate idealization of language      **Jacques Derrida and the Challenge of History** Sean Gaston, 2018-11-23 This important new book argues that Jacques Derrida's work can be treated as the basis for a distinctive historiography The possibility of seeing Derrida not as a philosopher of language but as a philosopher of history has become more apparent with the recent publication of Derrida's 1964-1965 seminar Heidegger The Question of Being and History We now know that the problem of history was at the heart of Derrida's writing in the mid 1960s prior to the publication of his best known work Of Grammatology 1967 Arguing that Derrida's scholarship in the 1960s and early 1970s on historicism historicity and the problem of history can be treated as the basis for a philosophy of history Sean Gaston focuses on Derrida's work from the mid 1970s to the mid 1990s and his relentless questioning of context memory and narrative as the delineation of a deconstructive historiography The book raises a challenge for historians to think about both deconstruction and historiography arguing that contemporary philosophy can provide a basis for thinking about history in the name of a deconstructive historiography that is not incompatible with rigorous historical scholarship      Husserl's Crisis of the European Sciences and Transcendental Phenomenology Dermot Moran, 2012-08-23 The Crisis of the European Sciences is Husserl's last and most influential book written in Nazi Germany where he was discriminated against as a Jew It incisively identifies the urgent moral and existential crises of the age and defends the relevance of philosophy at a time of both scientific progress and political barbarism It is also a response to Heidegger offering Husserl's own approach to the problems of human finitude history and culture The Crisis introduces Husserl's influential notion of the life world the pre-given familiar environment that includes both nature and culture and offers the best introduction to his phenomenology as both method and philosophy Dermot Moran's rich and accessible introduction to the Crisis explains its intellectual and political context its philosophical motivations and the themes that characterize it His book will be invaluable for students and scholars of Husserl

s work and of phenomenology in general

### **New Yearbook for Phenomenology and Phenomenological Philosophy**

Burt Hopkins, John Drummond, 2020-11-25 The New Yearbook for Phenomenology and Phenomenological Philosophy provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler, Heidegger, Sartre, Levinas, Merleau-Ponty and Gadamer. Theory and Practice

Jacques Derrida, 2019-01-31 Now in paperback nine lectures from Jacques Derrida that challenge the influential Marxist distinction between thinking and acting. Theory and Practice is a series of nine lectures that Jacques Derrida delivered at the cole Normale Supérieure in 1976 and 1977. The topic of theory and practice was associated above all with Marxist discourse and particularly the influential interpretation of Marx by Louis Althusser. Derrida's many questions to Althusser and other thinkers aim at unsettling the distinction between thinking and acting. Derrida's investigations set out from Marx's Theses on Feuerbach in particular the eleventh thesis which has often been taken as a mantra for the end of philosophy to be brought about by Marxist practice. Derrida argues however that Althusser has no such end in view and that his discourse remains resolutely philosophical even as it promotes the theory/practice pair as primary values. This seminar also draws fascinating connections between Marxist thought and Heidegger and features Derrida's signature reconsideration of the dichotomy between doing and thinking. This text, available for the first time in English, shows that Derrida was doing important work on Marx long before Specters of Marx. As with the other volumes in this series it gives readers an unparalleled glimpse into Derrida's thinking at its best: spontaneous, unpredictable and groundbreaking. Alienation After Derrida

David Edward Rose, Simon Skempton, 2010-05-15 Alienation After Derrida rearticulates the Hegelian Marxist theory of alienation in the light of Derrida's deconstruction of the metaphysics of presence. Simon Skempton aims to demonstrate in what way Derridian deconstruction can itself be said to be a critique of alienation. In so doing he argues that the acceptance of Derrida's deconstructive concepts does not necessarily entail the acceptance of his interpretations of Hegel and Marx. In this way the book proposes radical reinterpretations not only of Hegel and Marx but of Derridian deconstruction itself. The critique of the notions of alienation and de-alienation is a key component of Derridian deconstruction that has been largely neglected by scholars to date. This important new study puts forward a unique and original argument that Derridian deconstruction can itself provide the basis for a rethinking of the concept of alienation, a concept that has received little serious philosophical attention for several decades. Husserl's Phenomenology

Dan Zahavi, 2003 Drawing upon both Husserl's published works and posthumous material, Husserl's Phenomenology incorporates the results of the most recent Husserl research. It can consequently serve as a concise and updated introduction to his thinking. Phenomenology of the Political

Kevin Thompson, Lester Embree, 2013-03-14 This volume is a collection of phenomenological investigations of the political domain. Its aim is to present recent examinations of political matters and to foster a renewal of this sort of inquiry in phenomenology generally. Although it has often gone unrecognized, investigations of this sort have been a part of

the phenomenological project since its inception Two phases can be identified the first governed primarily by the methods of realistic and constitutive phenomenology and the second under the guidance of existential and hermeneutical approaches Standard accounts of the history of phenomenology begin of course with the publication of Husserl's *Logische Untersuchungen* 1900/1901 in which for the first time he publicly developed and applied his distinctively descriptive approach the so called method of eidetic analysis with its unique emphasis on the concept of evidence understood as intention fulfillment to the fields of logical and mathematical systems But those around him in Göttingen quickly saw the innovative character of this method and began employing it in a wide variety of other areas of research literature sociology ethics action theory and even theology for example *The Cambridge Introduction to Literature and Psychoanalysis* Jean-Michel Rabaté, 2014-09-22 This volume is an introduction to the relationship between psychoanalysis and literature Jean Michel Rabat takes Sigmund Freud as his point of departure studying in detail Freud's integration of literature in the training of psychoanalysts and how literature provided crucial terms for his myriad theories such as the Oedipus complex Rabat subsequently surveys other theoreticians such as Wilfred Bion Marie Bonaparte Carl Jung Jacques Lacan and Slavoj Žižek This Introduction is organized thematically examining in detail important terms like deferred action fantasy hysteria paranoia sublimation the uncanny trauma and perversion Using examples from Miguel de Cervantes and William Shakespeare to Sophie Calle and Yann Martel Rabat demonstrates that the psychoanalytic approach to literature despite its erstwhile controversy has recently reemerged as a dynamic method of interpretation London Gothic Lawrence Phillips, Anne Witchard, 2010-09-23 London has taken a central role in urban Gothic from key canonic texts like *Strange Case of Dr Jekyll and Mr Hyde* *The Picture of Dorian Gray* and *Dracula* through modern Gothic texts to the tourist gothic of rebranded gastropubs and ghost tours As a specific category London Gothic is becoming as important for understanding ourselves today as it has been for thinking about the cultural productions of the late nineteenth century This is the first book to focus on Gothic representations of London offering a range of essays from established and new scholars reading London Gothic as it is manifested in a variety of media and through varied critical approaches Jacques Derrida Leonard Lawlor, Zeynep Direk, 2002 These three volumes assemble the most important essays written on Jacques Derrida's philosophy since he became established in 1967 These volumes make well known essays easily available and also present many essays never translated in English **The Oxford Handbook of the History of Phenomenology** Dan Zahavi, 2018 This Oxford Handbook offers a broad critical survey of the development of phenomenology one of the main streams of philosophy since the 19th century Comprising 37 specially written essays by leading figures in the field it will be the authoritative guide to how phenomenology started how it developed and where it is heading **Impossible God** Hugh Rayment-Pickard, 2018-12-07 *Impossible God* introduces Derrida's theology for a new generation interested in Derrida's writings and in the future of theology and clarifies Derrida's theology for those already familiar with his writings Derrida's

theological concerns are now widely recognised but Impossible God shows how Derrida's theology takes its shape from his earliest writings on Edmund Husserl and from explorations into Husserl's unpublished manuscripts on time and theology. Rayment Pickard argues that Derrida goes beyond both the nihilism of the death of God and the denials of negative theology to affirm a theology of God's impossibility. Derrida's impossible God is not another God of the philosophers but a powerful deity capable of wakening us into faith, ethical responsibility and love. Showing how central theology has been to Derrida's philosophy since the beginning of his career, Impossible God presents an accessible study of a neglected area of Derrida's writing which students of philosophy and theology will find invaluable.

**Derrida and Phenomenology** W. Mckenna, J. Claude Evans, 2013-03-14. Derrida and Phenomenology is a collection of essays by various authors entirely devoted to Jacques Derrida's writing on Edmund Husserl's phenomenology. It gives a wide range of reactions to those writings both critical and supportive and contains many in-depth studies. Audience: Communicates new evaluations of Derrida's critique of Husserl to those familiar with the issues; specialists in phenomenology; deconstruction; the philosophies of Derrida and Husserl. Also contains a bibliography of recent relevant literature.

Being Amongst Others Eric Chelstrom, 2009-03-26. Our world can be a bewildering place. The sense of awe and wonder at the states of affairs in which we find ourselves immersed give rise to philosophical questions. Philosophical reflection is a critical attempt to come to grips with our place in the world and the various problems we encounter in respect to the complexities encountered in everyday life. In the most basic terms, phenomenology is the study of the structures and relations of phenomena. Phenomenology begins from a descriptive analysis of our experiences of the world. It grants precedent to the first person perspective: how phenomena appear to consciousness. There are any number of problems related to the plenitude of kinds of experiences which confront us through the course of our lives in addition to the structure of consciousness itself. This volume presents a variety of views on a number of the phenomena of our everyday lives offering positions on such things from the nature of consciousness to the structures of religious or political experiences. Its appeal however should not be limited to philosophers alone given that all persons can relate to the subject matter of the essays. For instance, one author asks: what is friendship? The present work may also be understood as a gesture toward bridging the division between the valuable insights of continental and analytic philosophical traditions. The authors include a combination of established academics such as Jeffrey Wattles, the best-selling author of *The Golden Rule*, and young scholars from varied philosophical backgrounds. This collection is divided into four sections: I Foundational Elements of Experience; II The Experiencing Subject: What is it to be a Subject; III Amongst Others: The Social World; and IV Social Objects and Institutions. Each section represents a level of experience from the most basic structures of experience to the subject's experience of the world and objects in it to experiences and interactions with others ending at the results of the codifications of certain social practices and beliefs. The sections treat their respective topics principally even if they share material with other essays. Our experiences of the life-world, the world of human praxis, contain a multiplicity of

elements the divisions of this work are meant to demarcate various types of phenomena not to offer any definitive thesis regarding a hierarchy or structure of relations      *Merleau-Ponty's Reading of Husserl* Ted Toadvine, Lester Embree, 2013-03-09 Merleau Ponty's Reading of Husserl explores the relationship between two of the greatest thinkers of the twentieth century Edmund Husserl the father of modern phenomenology and Maurice Merleau Ponty considered by many to be his greatest philosophical heir While Merleau Ponty's influence on the dissemination and reception of Husserl's thought is indisputable unresolved questions remain concerning the philosophical projects of these two thinkers Does phenomenology first reach its true potential in Merleau Ponty's hands guided by his appreciation of the tacit goals underlying Husserl's philosophical project Or is Merleau Ponty's phenomenology a creative but ultimately misdirected appropriation of Husserl's work In this volume the first devoted to a comparison of the work of these two philosophers ten leading scholars draw on the latest research and newly available manuscripts to offer novel insights into Merleau Ponty's reading of Husserl with implications for our understanding of phenomenology's significance its method and the future of philosophy

*Contemporary Continental Philosophy* Stuart Sim, 2017-08-03 This title was first published in 2000 Contemporary continental philosophy is a widely used but in many ways a highly problematic term and its exact frame of reference is not always clear In its more recent French manifestations in particular it continues to arouse considerable controversy and create bitter divisions with particularly hostile reactions to the work of Derrida and others Much work in the recent continental tradition can be fitted into a longer running philosophical tradition of scepticism and scepticism has always had the power to provoke and unsettle the philosophical establishment Presenting an overview of the philosophical landscape of the continental tradition since the 1940s this book traces the establishment of the new super scepticism as an intellectual paradigm with the power to threaten and disorientate existing world views and more traditional styles of philosophical discourse marking the continental divide Exploring how contemporary continental philosophy from existentialism to postmodernism can be characterised as this new more resistant form of scepticism Sim identifies a clutch of key themes including difference the subject antifoundationalism dialectics which have been obsessively worked over by key thinkers in the Existentialist Postmodernist period and demonstrates how these have contributed to the development of a super sceptical outlook Presenting a new theme led approach to provide an entry into current debates in continental philosophy Stuart Sim reintegrates the work of Sartre into the more recent continental tradition and suggests that something qualitatively different is now occurring in French philosophy      *Phenomenology* Leonard Lawlor, 2014-09-03 After Husserl the study of phenomenology took off in different directions The ambiguity inherent in phenomenology between conscious experience and structural conditions lent itself to a range of interpretations Many existentialists developed phenomenology as conscious experience to analyse ethics and religion Other phenomenologists developed notions of structural conditions to explore questions of science mathematics and conceptualization Phenomenology Responses and Developments covers all the major

innovators in phenomenology notably Sartre Merleau Ponty and the later Heidegger and the major schools and issues The volume also shows how phenomenological thinking encounters a limit a limit most apparent in the aesthetical and hermeneutical development of phenomenology The volume closes with an examination of the furthering of the division between analytic and continental philosophy
