think the science of the essence of consciousness itself Husserl's arguments ignited a heated debate regarding the nature of consciousness and experience that has endured throughout the twentieth and continues in the present day No understanding of twentieth century philosophy is complete without some understanding of Husserl and his work influenced some of the great philosophers of the twentieth century such as Martin Heidegger and Jean Paul Sartre

Phenomenology and the Foundations of the Sciences Edmund Husserl, 2001-11-30 There is no author's introduction to Phenomenology and the Foundations of the Sciences either as published here in the first English translation or in the standard German edition because its proper introduction is its companion volume General Introduction to Pure Phenomenology 2 The latter is the first book of Edmund Husserl's larger work Ideas Toward a Pure Phenomenology and Phenomenological Philosophy and is commonly referred to as Ideas I or Ideen I The former is commonly called Ideen III Between these two parts of the whole stands a third Phenomenon 3 logical Investigations of Constitution generally known as Ideen II In this introduction the Roman numeral designations will be used as well as the abbreviation PFS for the translation at hand In many translation projects there is an initial problem of establishing the text to be translated That problem confronts translators of the books of Husserl's Ideas in different ways The Ideas was written in 1912 during Husserl's years in Gottingen 1901 1916 Books I and II were extensively revised over nearly two decades and the changes were incorporated by the editors into the texts of the Husserliana editions of 1950 and 1952 respectively Manuscripts of the various reworkings of the texts are preserved in the Husserl Archives but for those unable to work there the only one directly available for Ideen II is the reconstructed one

Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy Edmund Husserl, 1983-09-30 the *Logische Untersuchungen* I phenomenology has been conceived as a substratum of empirical psychology as a sphere comprising immanent descriptions of psychical mental processes a sphere comprising descriptions that so the immanence in question is understood are strictly confined within the bounds of internal experience It would seem that my protest against this conception has been of little avail and the added explanations which sharply pinpointed at least some chief points of difference either have not been understood or have been heedlessly pushed aside Thus the replies directed against my criticism of psychological method are also quite negative because they miss the straightforward sense of my presentation My criticism of psychological method did not at all deny the value of modern psychology did not at all disparage the experimental work done by eminent men Rather it laid bare certain in the literal sense radical defects of method upon the removal of which in my opinion must depend an elevation of psychology to a higher scientific level and an extraordinary amplification of its field of work Later an occasion will be found to say a few words about the unnecessary defences of psychology against my supposed attacks

Phenomenological Psychology Edmund Husserl, 1977-12 THE TEXT In the summer semester of 1925 in Freiburg Edmund Husserl delivered a lecture course on phenomenological psychology in 1926¹²⁷ a course on the possibility of an intentional psychology and in 1928 a course entitled *Intentional Psychology* In preparing the critical edition of *Phänomenologische Psychologie* Husserliana IX I Walter Biemel presented the entire 1925 course as the main text and included as supplements significant excerpts from the two subsequent courses along with pertinent selections from various research manuscripts of Husserl He also included as larger supplementary texts the final version and two of the three earlier drafts of Husserl's *Encyclopedia Britannica* article *Phenomenology*² with critical comments and a proposed formulation of the Introduction and Part I of the second draft by Martin Heidegger³ and the text of Husserl's Amsterdam lecture *Phenomenological Psychology* which was a further revision of the *Britannica* article Only the main text of the 1925 lecture course Husserliana IX 1 234 is translated here In preparing the German text for publication Walter Biemel took as his basis

Transcendental Phenomenology and the Confrontation with Heidegger (1927-1931) Edmund Husserl, 1997-10-31
 Thomas Sheehan and Richard E Palmer The materials translated in the body of this volume date from 1927 through 1931 The Encyclopaedia Britannica Article and the Amsterdam Lectures were written by Edmund Husserl with a short contribution by Martin Heidegger between September 1927 and April 1928 and Husserl's marginal notes to *Sein und Zeit* and *Kant und das Problem der Metaphysik* were made between 1927 and 1929 The appendices to this volume contain texts from both Husserl and Heidegger and date from 1929 through 1931 As a whole these materials not only document Husserl's thinking as he approached retirement and emeritus status March 31 1928 but also shed light on the philosophical chasm that was widening at that time between Husserl and his then colleague and protégé Martin Heidegger 1 The Encyclopaedia Britannica Article Between September and early December 1927 Husserl under contract composed an introduction to phenomenology that was to be published in the fourteenth edition of the Encyclopaedia Britannica 1929 Husserl's text went through four versions which we call Drafts A B C and D and two editorial condensations by other hands which we call Drafts E and F Throughout this volume those five texts as a whole are referred to as the EB Article or simply the Article Husserl's own final version of the Article Draft D was never published of it appeared only in 1962

Thing and Space Edmund Husserl, 1997-10-31 This is a translation of Edmund Husserl's lecture course from the Summer semester 1907 at the University of Göttingen The German original was published posthumously in 1973 as Volume XVI of *Husserliana* Husserl's *opera omnia* The translation is complete including both the main text and the supplementary texts as *Husserliana* volumes are usually organized except for the critical apparatus which provides variant readings The announced title of the lecture course was *Main parts of the phenomenology and critique of reason* The course began with five relatively independent introductory lectures These were published on their own in 1947 bearing the title *The idea of phenomenology I* The Five Lectures comprise a general orientation by proposing the method to be employed in the subsequent working out of the actual problems viz the method of phenomenological reduction and by clarifying at least provisionally some technical terms that will be used in the labor the subsequent lectures will carry out The present volume then presents that labor i.e. the method in action and the results attained As such this text dispels the abstract impression which could not help but cling to the first five lectures taken in isolation Accordingly we are here given genuine introductory lectures i.e. an introduction to phenomenology in the genuine phenomenological sense of engaging in the work of phenomenology going to the matters at issue themselves rather than remaining aloof from them in abstract considerations of standpoint and approach *The*

Origins of the Horizon in Husserl's Phenomenology Saulius Geniusas, 2012-07-05 This volume is the first book length analysis of the problematic concept of the horizon in Edmund Husserl's phenomenology as well as in phenomenology generally. A recent arrival on the conceptual scene, the horizon still eludes robust definition. The author shows in this authoritative exploration of the topic that Husserl, the originator of phenomenology, placed the notion of the horizon at the centre of philosophical enquiry. He also demonstrates the rightful centrality of the concept of the horizon, all too often viewed as an imprecise metaphor of tangential significance. His systematic analysis deploys both early and late work by Husserl as well as hitherto unpublished manuscripts. Opening out the question to include that of the origins of the horizon, the book explores the horizon as philosophical theme or notion as a figure of intentionality and as a signification of one's consciousness of the world, our world, horizon. It argues that the central philosophical significance of the problematic of the horizon makes itself apparent in realizing how this problematic enriches our philosophical understanding of subjectivity. Systematic, thorough and revealing, this study of the significance of a core concept in phenomenology will be relevant not only to the phenomenological community but also to anyone interested in the intersections of phenomenology and other philosophical traditions such as hermeneutics and pragmatism.

Analyses Concerning Passive and Active Synthesis Edmund Husserl, 2001-10-31 These lectures are the first extensive application of Husserl's newly developed genetic phenomenology to perceptual experience to the way in which it is connected to judgments, cognition. Students of phenomenology will find this work indispensable.
