Educating Our 21st Century Adventurers:

Educating Our 21st Century Adventurers Phillip B.B. Moheno, 1996-03-19 This book studies the humanistic teaching values and corresponding humanistic teaching activities among secondary math and science student teachers. It describes the successful field test of a unique classroom observation instrument, an instrument that makes use of vital constructs from Information Theory and Interactional Analysis. The book sets forth the three-stage empirical validation of the Humanistic Educational Paradigm. The study identifies those classroom interactional patterns which reflect the growing pedagogical interest of Social Constructivism. **Educating Our 21st Century Adventurers** will interest all educators seeking to understand and implement humanistic education and grasp its significance for our schools in the coming century. **Home Education**

Brown, 2016-01-22 *Adventurous Learning* interrogates the word adventure and explores how elements of authenticity, agency, uncertainty, and mastery can be incorporated into educational practices. It outlines key elements for a pedagogy of adventurous learning and provides guidelines grounded in accessible theory. Teachers of all kinds can adapt these guidelines for indoor and outdoor teaching in their own culturally specific, place-responsive contexts without any requirement to learn a new program or buy an educational gimmick. As forces of standardization and regulation continue to pervade educational systems across the globe, both teaching and learning have been starved of creativity, choice, and real-world relevance. Many teachers are keen to improve their practice yet feel constrained by the institutional structures within which they work. By carefully examining adventure and its role in education, teachers can become better able to design and deliver engaging

programmes that are underpinned by sound pedagogical principles and which have deep and enduring meaning for their students
