Culture, Transnational Education and Thinking Niranjana Casinader, 2014-04-24 The notion of thinking skills as a key component of a 21st century school education is now firmly entrenched in educational policy and curriculum frameworks in many parts of the world However there has been relatively little questioning of the manner in which educational globalisation has facilitated this diffusion of thinking skills curriculum and pedagogy in a cultural context This book will help to redress such an imbalance in its critical assessment of the cross cultural validity of transplanting thinking skills programs from one educational system to another on an international scale Culture Transnational Education and Thinking provides an international comparative study of the intersection of three educational concepts culture education and thinking Drawing on case studies from Malaysia South Africa and Australia USA for the purposes of comparative analysis the book employs the context of an international school program in the teaching of thinking skills Future Problem Solving Program International The book explores the associations between Future Problem Solving educators their cultural background and their approaches to thinking evaluating the relevance of transferring thinking skills programs derived in one cultural framework into another The book also discusses the wider implications of these cross cultural comparisons to curriculum and pedagogy within schools and higher education with a particular emphasis on the teaching of multicultural school based classes and cross cultural understandings in teacher education and professional development This book will be of relevance to academics and higher education students who have an interest in the fields of cross cultural and intercultural understanding comparative studies in education and theories and practices of cognition as well as the development of tertiary and secondary curricula and associated pedagogies that specifically acknowledge the cultural diversities of both teacher and learner

*Gender, Class and Education (Routledge Revivals)* Stephen Walker, Len Barton, 2013-11-05 First published in 1983 Gender Class and Education is a collection of papers that formed presentations at the Westhill Sociology of Education Conference in January 1982 and is the fifth such collection to emerge from the annual conference The conference

theme Race Class and Gender was not only chosen because of its topicality but also to provide a framework for debate between educational researchers and teachers The papers focus on the reproduction of gender relations through education and provide important insights into how this process works how it is resisted in schools and colleges and the possibilities for radical intervention This volume includes three teaching bibliographies on gender and education which were not presented at the conference but were compiled specially for the book      **Thinking in Education Research** Nick Peim,2018-03-08

Thinking in Education Research examines the resources available from philosophy and theory that can be practically applied to any educational research project Nick Peim argues that the current well established divide between theory and the empirical in research methods is unhelpful to students Instead Thinking in Education Research looks at major lines of thinking in modern European philosophy from Kant to Freud and Derrida to Malabou and how they provide a rich resource for every stage of conducting research By getting students engaged in how to think and how to do Peim illustrates that thinking is in fact a vital part of how you do research and is not an aside Essential aspects of the research endeavour are re examined in the light of key philosophical positions to offer constructive potential including defining the object giving an account of the field the relation to truth the process of writing and constructing a case and the value attributed to formal knowledge Thinking in Education Research does not try to resolve the unresolved issues of research thinking but rather encourages readers to productively engage with them so that we can enhance the possibilities of research practice and find opportunities for its expansion and refinement Throughout the chapters clear and concise summaries of key philosophical positions and ideas are complemented with boxed accounts of how the philosophical debates discussed can be applied to real research projects These features encourage the reader to consider how they can develop thinking and apply theory at every stage of their own research This is essential reading for any educational research methods student or practicing researcher for important ways of thinking afresh about research methodology      **The Routledge Handbook of English Language**
