Blair's Educational Legacy? Geoffrey Walford, 2013-10-18 The United Kingdom General Election on 1st May 1997 gave a landslide victory to a re vitalised Labour Party Tony Blair became Prime Minister with a huge Commons majority of 179 over all other parties Such a majority meant that extensive changes of policy could be implemented with little effective opposition During the election campaign Tony Blair had repeatedly claimed that the top three priorities of a New Labour government would be education education education and on page two of the Labour Party s election manifesto a smiling Blair is seen with Nelson Mandela the unacknowledged originator of the oratorical education triplet Following a third Election victory in 2005 and after over ten years as Prime Minister Blair finally stepped down to Gordon Brown in mid 2007 but only after a promotional final tour that lasted several months Towards the end Blair devoted considerable efforts to try to ensure that his legacy would be positive and that he would be remembered for more than his role in the Iraq war But what is his legacy in the field of education This book brings together the assessments of key educational researchers who have been centrally involved with both the critique and implementation of various policy developments It is now time to make a solid academic evaluation of his influence on education This book is timely and relates directly to the central policy themes of the last decade It considers the relationships between theory and practice and examines the nature of policy and politics Each contribution will review empirical data and policy changes relating to Blair s period as Prime Minister and will make an assessment of the enduring effects of changes in policy Each will assess the long term and lasting effects as well as the shorter term responses This book was published as a special issue of the Oxford Review of Education

Sesame Street Helle Strandgaard Jensen, 2023 In *Sesame Street A Transnational History* author Helle Strandgaard Jensen tells the story of how the American television show became a global brand Jensen argues that because the show s domestic production was not financially viable from the beginning Sesame Street became a commodity that its producers assertively marketed all over the world *Sesame Street A Transnational History* combines archival research from seven countries bolstering an insightful analysis of how local reception and rejection of the show related to the global sales strategies and American ideals it was built upon Contrary to the producers oft publicized claims of Sesame Street s universality the show was heavily shaped by a fixed set of assumptions about childhood education and commercial entertainment This made sales difficult as Sesame Street met both skepticism and direct hostility from foreign television producers who did not share these ideals Drawing on insights from new histories about childhood education and transnational media the book lays bare a cultural clash of international proportions rooted in divergent approaches to children s television In doing so it provides a reflective backdrop to the many ongoing debates about

children's media In contrasting the positive receptions and renunciations of Sesame Street Jensen demonstrates that it was only after a substantial rethinking of Sesame Street's aims and business model that this program ended up on numerous broadcasting schedules by the mid 1970s Along the way this rethinking and the constant negotiations with potential international buyers created and shaped the business and corporate brand that paved the way for the Sesame Street we know today

Learning Beyond the School Julian Sefton-Green, Ola Erstad, 2018-08-06 Whilst learning is central to most understandings of what it is to be human we now live in a knowledge society where being educated defines life chances more than ever before Learning Beyond the School brings together accounts of learning from around the world in organisations spaces and places that are schooled but not school Exploring examples of learning organisation pedagogisation informal learning and social education the book shows not only how understandings of education are framed in terms of local versions of schooling but what being educated could and should mean in very different social and political contexts With contributions from scholars based in Australia Europe the USA Latin America and Asia the book brings together accounts of learning outside of school Chapters contain rich and detailed case studies of innovative projects new kinds of learning institutions youth peer driven and community based activities and public pedagogies as well as engaging with the dimensions of an argument about the place and nature of learning outside of the school It challenges dominant versions of school around the world whilst also critically discussing the value and place of non institutionalised learning Learning Beyond the School should be of interest to academics researchers postgraduate scholars engaged in the study of comparative education youth work education systems digital culture sociology of education and youth development It should also be essential reading for practitioners and policymakers who are interested in youth and education system reform

Cultural Pedagogies and Human Conduct Megan Watkins, Greg Noble, Catherine Driscoll, 2015-03-24 Pedagogy is often glossed as the art and science of teaching but this focus typically ties it to the instructional practices of formalised schooling Like the emerging work on public pedagogies the notion of cultural pedagogies signals the importance of the pedagogic in realms other than institutionalised education but goes beyond the notion of public pedagogies in two ways it includes spaces which are not so public and it includes an emphasis on material and non human actors This collection foregrounds this broader understanding of pedagogy by framing enquiry through a series of questions and across a range of settings How for example are the processes of teaching and learning realised within and across the pedagogic processes specific to various social sites What ensembles of people things and practices are brought together in specific institutional and everyday settings to accomplish these processes This collection brings together researchers whose work across the interdisciplinary nexus of cultural studies sociology media studies education and museology offers significant insights into these cultural pedagogies the practices and relations through which cumulative changes in how we act feel and think occur Cultural Pedagogies and Human Conduct opens up debate across disciplines theoretical perspectives and empirical foci to explore both what is pedagogical about culture and what is

cultural about pedagogy International Perspectives on Student Outcomes and Homework Rollande Deslandes, 2009-04-08
Focusing on issues including parental engagement and the uses and abuses of homework this vital international snapshot of current research provides a research synthesis on the impact of family school community partnerships on student outcomes

Giving Voice Meryl Alper, 2017-01-20 How communication technologies meant to empower people with speech disorders to give voice to the voiceless are still subject to disempowering structural inequalities Mobile technologies are often hailed as a way to give voice to the voiceless Behind the praise though are beliefs about technology as a gateway to opportunity and voice as a metaphor for agency and self representation In *Giving Voice* Meryl Alper explores these assumptions by looking closely at one such case the use of the Apple iPad and mobile app Proloquo2Go which converts icons and text into synthetic speech by children with disabilities including autism and cerebral palsy and their families She finds that despite claims to empowerment the hardware and software are still subject to disempowering structural inequalities Views of technology as a great equalizer she illustrates rarely account for all the ways that culture law policy and even technology itself can reinforce disparity particularly for those with disabilities Alper explores among other things alternative understandings of voice the surprising sociotechnical importance of the iPad case and convergences and divergences in the lives of parents across class She shows that working class and low income parents understand the app and other communication technologies differently from upper and middle class parents and that the institutional ecosystem reflects a bias toward those more privileged Handing someone a talking tablet computer does not in itself give that person a voice Alper finds that the ability to mobilize social economic and cultural capital shapes the extent to which individuals can not only speak but be heard Boundless cyber world?
