Concepts and Practices Masahiro Tanaka,2005-05-16 This book analyses comparatively the creation of American and Japanese universities on the model of German universities largely in the late nineteenth century and the reform of German and Japanese universities on the model of American universities after the end of the Second World War The argument is that transferring educational concepts and practices from one cultural context to another involves not merely a transfer but a

transformation How and why this transformation occurs is what this book is about More precisely it is suggested that transformation of educational concepts and practices during their cross cultural movement can be understood within a theoretical perspective that is proposed and developed in the book This book is divided into six chapters Chapter One as the introduction analyses several scholars approaches to the aspects of educational transfer then attempts to construct a theoretical perspective for the book on the processes of change in educational concepts and practices during their movement across cultures Chapters Two and Three offer two narratives to investigate how German university concepts and practices were transmuted as a consequence of local actors efforts to import these concepts and practices into Japan and the United States Chapters Four and Five provide another two narratives to examine how American university concepts and practices were altered as a result of American actors attempts to export these concepts and practices to Japan and Germany Chapter Six as the conclusion through reflecting on the four narratives given in the main chapters re examines the ways in which the theoretical perspective of this book is useful to understand the processes of transformation of educational concepts and practices during their movement from one culture to another

Public Examinations Examined Thomas

Kellaghan,Vincent Greaney,2019-11-19 High stakes public examinations exert a dominant influence in most education systems They affect both teacher and student behavior especially at the middle and upper levels of secondary education The content of past examinations tends to dictate what is taught and how it is taught and more important what is learned and how it is learned By changing aspects of these examinations especially their content and format education systems can have a strong positive impact on teacher behavior and student learning help raise student achievement levels and better prepare students for tertiary level education and for employment Examination agencies many of which have followed the same procedures over decades can learn from the successes and failures of other systems This book addresses current issues related to the development administration scoring and usage of these high stakes public examinations identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies The book s primary audience consists of public examination officials on national regional and state examination boards but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards to academics and researchers interested in educational assessment to governmental and education agencies responsible for student selection and to professionals at development organizations This extremely well written and comprehensive book offers a timely review of the diversity of public examination practices worldwide of the tensions between examinations and learning and of the technical expertise involved in the creation of valid reliable and fair assessments It reminds us that as the diploma disease takes hold with an ever greater intensity at every stage of education worldwide and the commercial business of testing flourishes those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog Angela W Little Professor Emerita Institute of Education University College

Comparative Sociology of Examinations Fumiya Onaka,2019-03-28 Contemporary societies are constructed constricted and constrained by various series of examinations Governments of both Western and non Western countries tend to conduct detailed multi layered and continuous systems of tests or examinations International tests such as PISA and TIMSS have also been introduced to compare the relative performances of learners within diverse educational institutions across different countries Examinations therefore provide a methodological pivot for comparing a range of societies They enable us to contrast the West and the East the North and the South tribal and mass society ancient and postmodern civilization and so on Comparing parallel societies from across Asia the Middle East Europe and North America this book proposes fundamental transitions in sociological research from system to process and from communication to composition through intensive studies on examinations It uses ethnographies interviews questionnaires documents statistics and big data analyses to make comparisons on broad scales of time and space In so doing it suggests hypotheses encompassing different kinds of societies in human history including those in the Axial Age and the Modern Ages

Private Academies of Chinese Learning in Meiji Japan Margaret Mehl,2004-06-02 The establishment of a national education system soon after the Meiji Restoration of 1868 is recognized as a significant factor in Japan's modernization

hence research on education is concentrated on the state system However this development did not mean the disappearance of the juku the private academies which were so much a feature of the Tokugawa period Indeed these played a far greater role than has been appreciated so far and this book aims to rectify the omission This comprehensive study of a little known but significant area not only contributes to a better understanding of education in the Meiji period but is also relevant to the reform of Japan s public education system today Education was once viewed and organised very differently from today and the modern state controlled system we take for granted is just as much a product of historical circumstances as the juku was it too must therefore be open to challenge
