Finding Jobs David Card,Rebecca Blank,2000-06-29 Do plummeting welfare caseloads and rising employment prove that welfare reform policies have succeeded or is this success due primarily to the job explosion created by today s robust economy With roughly one to two million people expected to leave welfare in the coming decades uncertainty about their long term prospects troubles many social scientists Finding Jobs offers a thorough examination of the low skill labor market and its capacity to sustain this rising tide of workers many of whom are single mothers with limited education Each chapter examines specific trends in the labor market to ask such questions as How secure are these low skill jobs particularly in the event of a recession What can these workers expect in terms of wage growth and career advancement opportunities How will a surge in the workforce affect opportunities for those already employed in low skill jobs Finding Jobs offers both good and bad news about work and welfare reform Although the research presented in this book demonstrates that it is possible to find jobs for people who have traditionally relied on public assistance it also offers cautionary evidence that today s strong economy may mask enduring underlying problems Finding Jobs shows that the low wage labor market is particularly vulnerable to economic downswings and that lower skilled workers enjoy less job stability Several chapters illustrate why financial incentives such as the Earned Income Tax Credit EITC are as essential to encouraging workforce participation as job search programs Other chapters show the importance of including provisions for health insurance and of increasing subsidies for child care to assist the large population of working single mothers affected by welfare reform Finding Jobs also examines the potential costs of new welfare restrictions It looks at how states can improve their flexibility in imposing time limits on families receiving welfare and calls into question the cutbacks in eligibility for immigrants who traditionally have relied less on public assistance than their native born counterparts Finding Jobs is an informative and wide ranging inquiry into the issues raised by welfare reform Based on comprehensive new data this volume offers valuable guidance to policymakers looking to design policies that will increase work raise incomes and lower poverty in changing economic conditions

Rosenbaum, Caitlin E. Ahearn, Janet E. Rosenbaum, Janet Rosenbaum, 2017-09-02 College for all has become the new American dream Most high school students today express a desire to attend college and 90% of on time high school graduates enroll in higher education in the eight years following high school Yet degree completion rates remain low for non traditional students students who are older low income or have poor academic achievement even at community colleges that endeavor to serve them What can colleges do to reduce dropouts In Bridging the Gaps education scholars James Rosenbaum Caitlin Ahearn and Janet Rosenbaum argue that when institutions focus only on bachelor s degrees and traditional college procedures they ignore other pathways to educational and career success Using multiple longitudinal studies the authors evaluate the shortcomings and successes of community colleges and investigate how these institutions can promote alternatives to BAs and traditional college procedures to increase graduation rates and improve job payoffs The authors find that sub baccalaureate credentials associate degrees and college certificates can improve employment outcomes Young adults who complete these credentials have higher employment rates earnings autonomy career opportunities and job satisfaction than those who enroll but do not complete credentials Sub BA credentials can be completed at community college in less time than bachelor s degrees making them an affordable option for many low income students Bridging the Gaps shows that when community colleges overemphasize bachelor s degrees they tend to funnel resources into remedial programs and try to get low performing students on track for a BA Yet remedial programs have inconsistent success rates and can create unrealistic expectations leading struggling students to drop out before completing any degree The authors show that colleges can devise procedures that reduce remedial placements and help students discover unseen abilities attain valued credentials get good jobs and progress on degree ladders to higher credentials To turn college for all into a reality community college students must be aware of their multiple credential and career options Bridging the Gaps shows how colleges can create new pathways for non traditional students to achieve success in their schooling and careers

Resources in Education, 1998-12 *Breaking Free: A facilitator's guide to participatory action research practice* Timothy Pynch, 2012 *Breaking Free* is a practical guide to facilitating self directing educational processes into participatory action research PAR enabling average people to contribute what they can as active participants in research projects As such it is designed primarily for these participants rather than the academic researcher in order to introduce participants to authentic contributions they can make as activists in knowledge making processes At the same time *Breaking Free* guides academic researchers towards helpful practices enriching their often times lonely and isolated existence created by a false sense of objectivity A hands on practical yet disciplined approach to facilitating PAR prepares readers to craft their own

individual Guide as they prepare for the PAR life This opens up the world of knowledge making to people long silenced by forces intent on controlling knowledge for the educated elite Breaking Free invites people to contribute as they can and be recognized for this contribution The Status of Youth in Agrifood Systems Food and Agriculture Organization of the United Nations, The world s agrifood systems stand at a crossroads With 1.3 billion youth globally the future of food livelihoods and economic resilience depends on their participation in agrifood systems At the same time agrifood systems need youth to drive productivity innovation and sustainability in a crucial and rapidly evolving sector FAO s The Status of Youth in Agrifood Systems report is a call to action It presents the most comprehensive evidence based analysis of youth in agrifood systems to date highlighting both the opportunities and structural barriers that shape their engagement It explores how transforming agrifood systems can enhance decent job opportunities and food security for youth and how empowered youth can drive this transformation It concludes highlighting policy recommendations and areas of investments to foster more equitable and sustainable agrifood systems where rural youth are both beneficiaries and leaders of change **Graduate Careers in**

Context Ciaran Burke, Fiona Christie, 2018-07-11 In a world where there are increasing concerns about graduate underemployment and likely career trajectories it is not surprising that there is a significant body of literature examining graduate careers in post industrial societies However it has become increasingly evident in recent years that there is a stark disconnect between academics who research employment and education and careers and employability professionals Graduate Careers in Context brings these two separate groups together for the first time in order to provide a better understanding of graduate careers The book addresses the problems surrounding the graduate labour market and its relationship to higher education and public policy Drawing on varied perspectives the contributors provide a comprehensive examination of issues such as geography mobility and employability before presenting and discussing the benefits of future collaboration between practitioners and academic researchers The interdisciplinary focus of this book will make it of great interest to academics researchers and postgraduate students in the areas of education sociology social policy business studies and career guidance and coaching It should also be essential reading for practitioners who wish to consider their role and responsibilities within the changing higher education market *Professional Power and Skill Use in the 'Knowledge Economy'* D.W. Livingstone, Tracey L. Adams, Peter Sawchuk, 2021-05-25 This is the first systematic analysis of the class structure of professionals Their growing numbers including mainly non managerial professional employees as well as self employed professionals professional employers and professional managers have been conflated in most prior studies In this book evidence comes from a unique series of large scale surveys since the 1980s as well as recent comparative case studies of engineers and nurses A primary focus is on issues of job control and skill utilization among these knowledge workers widely regarded as pivotal to the sustainability of knowledge economies Professional employees in particular are found to face declining job control diminishing use of their skills and increasing barriers to continuing learning There are many

original benchmarks here to serve as guides for further studies on professional classes job design and training strategies in advanced capitalist economies

Gender Gaps and the Social Inclusion Movement in ICT Williams, Idongesit, Millward, Olga, Layton, Roslyn, 2018-12-14 Despite advancements in technological and engineering fields there is still a digital gender divide in the adoption use and development of information communication technology ICT services This divide is also evident in educational environments and careers specifically in the STEM fields In order to mitigate this divide policy approaches must be addressed and improved in order to encourage the inclusion of women in ICT disciplines Gender Gaps and the Social Inclusion Movement in ICT provides emerging research exploring the theoretical and practical aspects of gender and policy from developed and developing country perspectives and its applications within ICT through various forms of research including case studies Featuring coverage on a broad range of topics such as digital identity human rights and social inclusion this book is ideally designed for policymakers academicians researchers students and technology developers seeking current research on gender inequality in ICT environments
