Philosophical Thoughts on Education

6 Philosophical Thoughts on Education

JOHN LOCKE- THE EMPIRICIST

- Education is not an acquisition of knowledge contained in the Classics. It is learners interacting with concrete experience. The learner is an active not a passive agent of his/her own learning.
- From the social dimension, education citizens participate actively and intelligently in establishing their government and in choosing who will govern them from among themselves. They are of the thinking that no one person is destined to be a ruler forever. This is in keeping with the Anti-Political Dynasty Bill.

SPENCER- THE UTILITARIANIST

- To survive in a complex society, Spencer favors specialized education over general education.
- "The expert who concentrates on a limited field is useful, but if he loses sight of the interdependence of things he becomes a man who knows more and more about less and less. We must be warned of the early peril of over specialist. Of course, we do not prefer the other extreme, the superficial person who every day knows less and less about more and more.
- Who is fittest survives, Individual competitions lead to social progress.
- The competition in class is what advocates of whole child approach and Socio-emotional Learning (SEL) atmosphere approach and Socio-Emotional Learning (SEL) atmosphere and Socio-Emotional Learning (SEL) atmosphere negate. The whole-child approach, a powerful tool for SEL focused schools has tenets-" each student learns in an environment that is physically and emotionally safe for students and adults" and "each student has

surprising answers to the question How can we educate students to think creatively and critically Despite their differences all of these philosophers challenge the modern understanding of thinking and offer original radical perspectives on it In very different ways each rejects the modern approach to thinking as well as the reduction of proper thought to rationality situating thinking in sociohistorical reality and relating it to political action Thinking they argue is not a natural automatic activity and the need to think has become all the more important as political reality seems to exhibit less thinking or to even celebrate thoughtlessness Bringing these continental conceptions of thinking to bear on the urgent need to educate young people to think against the current this book makes a significant contribution to educational theory and political philosophy one that is particularly relevant in today s anti intellectual climate

Educational Philosophy in the French Enlightenment Natasha Gill, 2016-04-29 Though Emile is still considered the central pedagogical text of the French Enlightenment a myriad of lesser known thinkers paved the way for Rousseau s masterpiece Natasha Gill traces the arc of these thinkers as they sought to reveal the correlation between early childhood experiences and the success or failure of social and political relations and set the terms for the modern debate about the influence of nature and nurture in individual growth and collective life Gill offers a comprehensive analysis of the rich cross fertilization between educational and philosophical thought in the French Enlightenment She begins by showing how in *Some Thoughts Concerning Education* John Locke set the stage for the French debate by transposing key themes from his philosophy into an educational context Her treatment of the abb Claude Fleury the rector of the University of Paris Charles Rollin and Swiss educator Jean Pierre de Crousaz illustrates the extent to which early Enlightenment theorists reevaluated childhood and learning methods on the basis of sensationist psychology Etienne Gabriel Morelly usually studied as a marginal thinker in the history of utopian thought is here revealed as the most important precursor to Rousseau and the first theorist to claim education as the vehicle through which individual liberation social harmony and political unity could be achieved Gill concludes with an analysis of the educational philosophical dispute between Helv tius and Rousseau and traces the influence of pedagogical theory on the political debate surrounding the expulsion of the Jesuits in 1762
