**Japan as -anything but- Number One** J. Woronoff,1996-10-11 Japan as anything but Number One should be everybody s number two book to read about Japan After almost any introduction that lays out the claims made for Japan s truly unusual economy and society the next step forward should be to read an informed critical text to set a contrast in the mind No book achieves this more concisely more accurately and more succinctly than Japan as anything but Number One James Y Bourlet Professor of Japanese Management London Guildhall University Is Japan No 1 Well maybe it is if you only consider those sectors where it has been particularly successful But not if you add many others where its performance was mediocre or worse Is Japan No 1 Well maybe it is if you ask the foreign friends who have made a career and sometimes a fortune as apologists of Japanese causes But if you ask the Japanese themselves you will find that they are anything but satisfied Is Japan No 1 Well maybe it is if you are taken in by the tatemae i e the official version or how its admirers like to picture it But it does not look so great once you perceive the honne i e the realities of life in Japan Is Japan No 1 Well maybe it is if you take what is best in Japan and contrast it to what is less good in foreign countries But it does not compare so well if you mix the good with the bad in both places No the author does not think that Japan is a horrible place or that its leaders have made a complete mess of things But if you look closely it is certainly not the extraordinary success it is frequently claimed to be It is closer to the mean with many serious problems that will only get worse if people foolishly assume it is No 1

**Japan-U.S. Relations** ,1992     The East Asian Welfare Model Roger Goodman,Huck-Ju Kwon,Gordon White,2006-12-05 For many politicians and observers in the West East Asia has provided a broad range of positive images of

the state's intervention in society Neoliberals grew excited by popular welfare systems that cost little in expenditure and bureaucracy Social democrats thought they had found a model for social cohesion and equality In fact the reality in East Asia is rather different from these stereotypes In this book six specialists of six different societies in East Asia Japan South Korea Taiwan China Singapore and Hong Kong examine the role of the state in their welfare systems There are detailed case studies on pensions health insurance housing and personal social services They provide an up to date detailed account of how these systems have developed as well as an examination of the question of whether these welfare regimes are the natural outgrowth of cultural traditions or the result of economic and political conditions This broad ranging and detailed study will be welcomed by both students and policy makers as the first proper academic study in English to have such a wide coverage of this topic Its clarity and authority should come as a welcome alternative to the more common misconceptions about Asian society

**World Yearbook of Education 2012** Gita Steiner-Khamsi, Florian Waldow, 2012-03-12 The phenomenon of travelling reforms has become an object of great professional interest and intensive academic scrutiny The fact that the same set of educational reforms is transferred from one country to another made scholars wonder whether policy transfer has increased as a result of globalization But also the fact that policy makers increasingly import best practices and international standards and use them as a tool to accelerate reform has captured the imagination of many that deal with policy studies An international comparative perspective is key for understanding why reforms travel from one corner of the world to another Not surprisingly the study of policy borrowing and lending constitutes one of the core research topics of comparative policy studies a new area of research that links comparative education with policy studies The World Yearbook of Education 2012 brings together a diverse range of perspectives on education policy through contributions from internationally renowned authors It reflects on the way policy borrowing and lending is reconfiguring the world of education and offers a new collection of insights into the changes occurring across the world It particularly focuses on The political and economic reasons for policy borrowing The agencies international networks and regimes that instigate policy change The process of borrowing and lending The impact of these systems agendas and institutions on indigenous settings This book will prove invaluable to researchers of globalization and to policy experts especially those interested in comparative and international educational studies It is also essential reading for undergraduate and postgraduate students and anyone involved in the sociology economy or history of education Gita Steiner Khamsi is Professor of Comparative and International Education at Teachers College Columbia University New York US Florian Waldow is Research Director at the University of Münster Germany

Education in Contemporary Japan Kaori Okano, Motonori Tsuchiya, 1999-04-08 A balanced introduction to and examination of contemporary Japanese education While the postwar system of schooling has provided valuable ingredients for economic success it has been accompanied by unfavourable developments such as excessively competitive exams stifling uniformity bullying and an undervaluing of non Japanese ethnicity This book offers up to date information and new

perspectives on schooling in contemporary Japanese society and uses detailed ethnographic studies and interviews with students and teachers. It examines the main developments of modern schooling in Japan from the beginning of the Meiji era up to the present and includes analysis of the most recent reforms. It develops a new picture of the role that schooling plays for individuals and the wider society. Essential reading for students and educators alike. **World Class Schools** Bert Creemers, David Reynolds, Sam Stringfield, Charles Teddlie, 2003-09-02. In this book the authors have conducted extensive research and describe what makes a successful school and how this varies in different countries. The book follows the progress of a cohort of 7 year old children through their schools over a two year period. It covers schools in the US, Canada, Hong Kong, Taiwan, Australia, the UK, Norway, the Netherlands and Ireland and draw together what it is that the most and least effective schools do in each country, pinpoints what makes effective teaching across the globe, analyses which effectiveness producing school and teaching factors appear to be the same and which are context specific, discusses how educational policies can be used to generate World Class Schools and which new blends of practice can or should be used. The existing literature based upon the comparison of the educational achievements of different countries is inadequate. This unique study provides a rich picture of the processes of the education systems of different countries which will appeal to practitioners and policy makers. **Handbook of the Life Course** Jeylan T. Mortimer, Michael J. Shanahan, 2007-12-14. This comprehensive handbook provides an overview of key theoretical perspectives, concepts and methodological approaches that while applied to diverse phenomena are united in their general approach to the study of lives across age phases. In surveying the wide terrain of life course studies with dual emphases on theory and empirical research, this important reference work presents probative concepts and methods and identifies promising avenues for future research. **The Reemergence of Self-Employment** Richard Arum, Walter Müller, 2009-01-10. This book presents results of a cross national research project on self employment in eleven advanced economies and demonstrates how and why the practice is reemerging in modern societies. While traditional forms of self employment such as skilled crafts work and shop keeping are in decline, they are being replaced by self employment in both professional and unskilled occupations. Differences in self employment across societies depend on the extent to which labor markets are regulated and the degree to which intergenerational family relationships are a primary factor structuring social organization. For each of the eleven countries analyzed, the book highlights the extent to which social background, educational attainment, work history, family status and gender affect the likelihood that an individual will enter and continue a particular type of self employment. While involvement with self employment is becoming more common, it is occurring for individuals in activities that are more diverse, unstable and transitory than in years past. **A Cross-Cultural Comparison of the American and Japanese Educational Systems**, 1993-05.
