War Manning discusses the emergence of the early classical studios of the 1950s and the subsequent evolution of more advanced analogue technologies during the 1960s and 70s leading in turn to the birth and development of the MIDI synthesizer. Attention then turns to the characteristics of the digital revolution from the pioneering work of Max Mathews at Bell Telephone Laboratories in the 1950s to the wealth of resources available today facilitated by the development of the personal computer and allied digital technologies. The scope and extent of the technical and creative developments that have taken place since the late 1990s are considered in an extended series of new and updated chapters. These include topics such as the development of the digital audio workstation, laptop music, the Internet and the emergence of new performance interfaces. Manning offers a critical perspective of the medium in terms of the philosophical and technical features that have shaped its growth. Emphasizing the functional characteristics of emerging technologies and their influence on the creative development of the medium, Manning covers key developments in both commercial and the non-commercial sectors to provide readers with the most comprehensive resource available on the evolution of this ever-expanding area of creativity.

National Bureau of Standards, 1978 **Anthology of Musical Forms - Structure & Style (Expanded Edition)** Leon Stein, 1999-11-27. Structure and Style first published in 1962 and expanded in 1979 fills the need for new ways of analysis that put 20th century music in perspective. It spans forms in use before 1600 through forms and techniques in use today. Anthology of Musical Forms provides musical examples of forms treated in Structure and Style. Some examples are analyzed throughout. Most are left for the student to analyze. These books reflect Leon Stein's impressive background as student musician and composer. Stein studied composition with Leo Sowerby, Frederick Stock, conductor of the Chicago Symphony, and orchestration with Eric DeLamar, his assistant. He earned M. Mus. and Ph.D. degrees at DePaul University and was associated with its School of Music as director of the Graduate Division and chairman of the Department of Theory and Composition until his retirement in 1976. He has composed a wide variety of works including compositions for orchestra, chamber combinations, two operas, and a violin concerto. **Ton de Leeuw** Jurrien Sligter, 2014-02-25. Not a biography in the traditional sense, this book is a consideration of De Leeuw's thoughts and composition, first and foremost by the composer himself. A comprehensive world view is at the root of De Leeuw's musical conceptions, made apparent by his travel diaries and his reflections on the social and cultural relationship between the East and West. The book's various authors view the composer's work against the background of their own widely divergent disciplines: contemporary music, non-Western music, music therapy, and intercultural developments. **Publications of the National Institute of Standards and Technology ...
