Proceedings of the 4th International Conference on Informatics, Technology and Engineering 2023 (InCITE 2023) Markus Hartono, Hudiyo Firmanto, Connie Susilawati, 2023-11-18 This is an open access book Adaptive Resilient Collaborative Engineering Towards Faster Recovery Impactful Solutions The world in the last decade has been facing global issues such as accelerated global warming depleting natural resources food waste and scarcity water contamination and shortage energy conservation etc Enter the COVID 19 pandemic in 2020 and we face what people term as double disruption Not only solutions to the above problems are becoming more critical but they are also needed fast Timely and effective solutions are called for so that we can recover from the pandemic while at the same time carry our efforts to better our world It is no longer sufficient to find solutions that can only delay the negative impacts from the above problems but it is imperative to tip the balance and reverse the impacts to our advantage Engineers and engineering have a vital role in inventing mechanisms systems and or products that can address the solutions Digital technologies and artificial intelligence have been at the forefront of such exploration and we can expect some hints for a better future if we continue being adaptive resilient and collaborative Given the above background Faculty of Engineering Universitas Surabaya will host the fourth bi annual international conference The 4th International Conference on Informatics Technology and Engineering 2023 InCITE 2023 in Yogyakarta Indonesia September 14th 15th 2023 This event is a continuation of the past events successfully held in 2017

2019 and 2021 We invite academia and business practitioners all around the globe to share ideas and best practices relevant to the above conference topic We hope that this event can also serve as a platform of gathering for anyone interested in exploring potential solutions of our common problems today Accepted and presented paper will be submitted for publication in reputable International Proceeding Atlantis Press See you in Yogyakarta *Silicon Carbide* Moumita

Mukherjee,2011-10-10 Silicon Carbide SiC and its polytypes used primarily for grinding and high temperature ceramics have been a part of human civilization for a long time The inherent ability of SiC devices to operate with higher efficiency and lower environmental footprint than silicon based devices at high temperatures and under high voltages pushes SiC on the verge of becoming the material of choice for high power electronics and optoelectronics What is more important SiC is emerging to become a template for graphene fabrication and a material for the next generation of sub 32nm semiconductor devices It is thus increasingly clear that SiC electronic systems will dominate the new energy and transport technologies of the 21st century In 21 chapters of the book special emphasis has been placed on the materials aspects and developments thereof To that end about 70% of the book addresses the theory crystal growth defects surface and interface properties characterization and processing issues pertaining to SiC The remaining 30% of the book covers the electronic device aspects of this material Overall this book will be valuable as a reference for SiC researchers for a few years to come This book prestigiously covers our current understanding of SiC as a semiconductor material in electronics The primary target for the book includes students researchers material and chemical engineers semiconductor manufacturers and professionals who are interested in silicon carbide and its continuing progression ANALOG ELECTRONICS L.
