

The God Gap reveals aspects of creation hidden by invisible forces. The author witnessed these by studying the underlying harmony of objects in time and space that manifest to create the universe. Similarly, the harmony of water, carbon-based molecules, geological formations, and meteorological changes were the building blocks for life on Earth and millions of years of succession since.

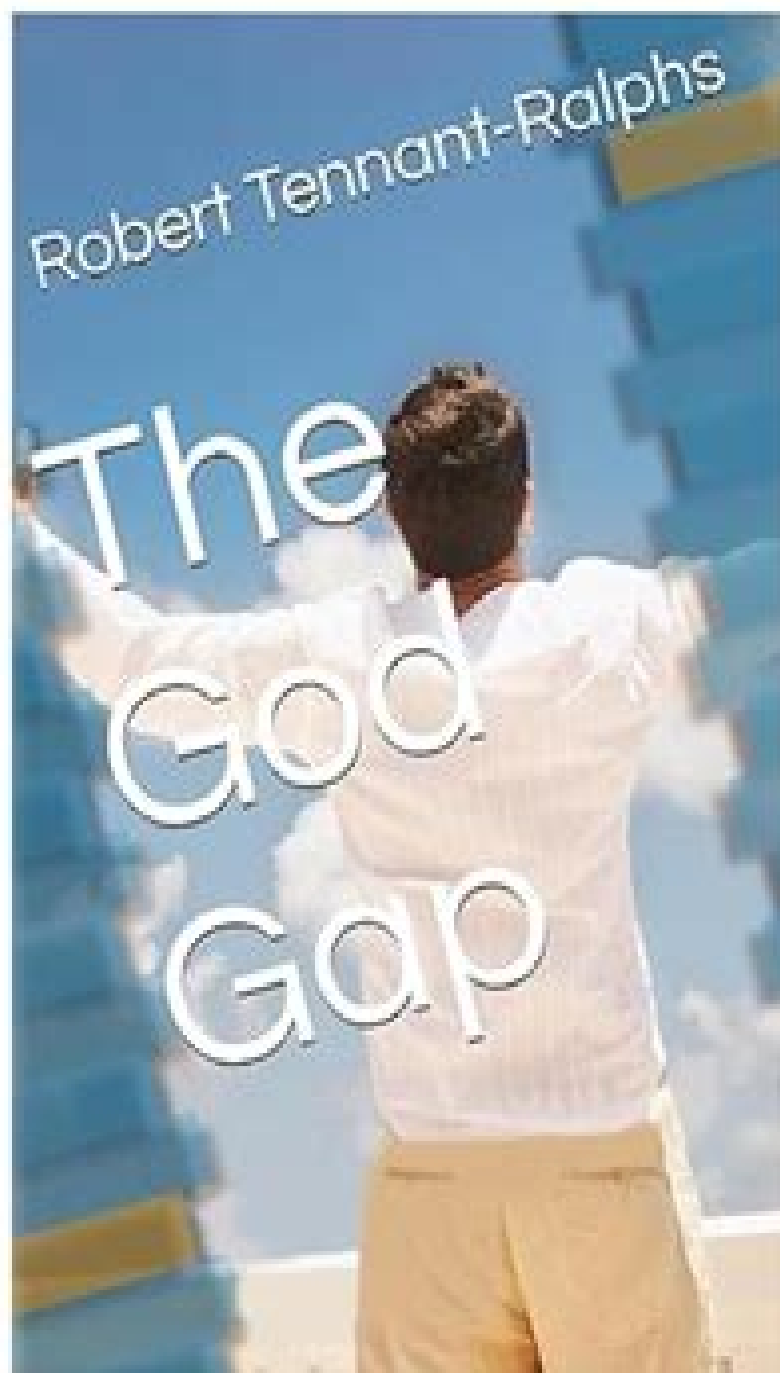

In man's early years, no one knew of the existence of the universe, its galaxies, the sun's solar system, how continents and oceans formed, the extent of life on land and in the seas, the complexities responsible for their creations, or that Earth is round. If a hominid living three million years ago met someone who told them these were facts, they would not have believed them. To humans, seeing is believing, but it is the opposite in the evolution of the universe and life.

Our realisation of these developed with time and is still limited. It does not include understanding the phenomena of how the more complex came into being nor does it explain the balance of what was needed in each instance, at every moment, to produce the results later achieved.

Thanks to new understandings, man knows these characteristics are true. But it still leaves millions of unexplained mysteries. The God Gap delves into these, and the results reveal 'fingerprints' that can only belong to a single creative source.

Grace and Gravity Lars Spuybroek, 2020-11-26 How do we live well The first sentence of *Grace and Gravity* raises the fundamental question that constantly occupies our minds and of all those who lived before us Paradoxically the impossibility of answering this question opens up the very room needed to find ways of living well It is the gap where all disciplines fall short where architecture does not fit its inhabitants where economy is not based on shortage where religion cannot be explained by its followers and where technology works far beyond its own principles According to Lars Spuybroek the prize winning former architect this marks the point where the paradoxical machine of grace reveals its powers a point where we cannot say if we are moving or being moved Following the trail of grace leads him to a new form of analysis that transcends the age old opposition between appearances and technology Linking up a dazzling and often delightful variety of sources monkeys paintings lamp posts octopuses tattoos bleeding fingers rose windows robots smart phones spirits saints and fossils with profound meditations on living death consciousness and existence *Grace and Gravity* offers an eye opening provocation to a wide range of art historians architects theologians anthropologists artists media theorists and philosophers

Green,2007-03-30 The impact of religion on the 2004 presidential election results provoked widespread consternation and surprise In fact religion and faith have played a vital role in American elections for some time and here Green explores the links and how they have changed over time Green posits that an old religion gap describing longstanding political differences among religious communities has been supplanted by a new religion gap revealing political divisions based on religious behavior and belief He puts the differences into context and documents the changing role of religion in politics over the last 60 years The impact of religion on the 2004 presidential election results provoked widespread consternation and surprise
