Propp,2019-02-05 It is June 2018 as an unusual group of scholars professors lecturers and students gather in a California hotel They are all attendees of an Apologetics conference intended to join qualified representatives of Christian Deist and Atheist thought for a two week no holds barred debate and discussion of their respective positions that will ultimately be included in a book published after the conference Evangelical Christianity is represented by advocates of Evidentialist and Presuppositionalist approaches to Apologetics Catholicism liberal Christianity and Deism are also well supported The Atheist perspective is advocated by a polemical author and a college professor notorious for attacking the views of his Christian students As the participants argue over controversial issues such as cosmology evolution The Bible historical evidence for Jesus the resurrection biblical prophecies and the problem of evil intellectual fireworks result But what will result when such a volatile and eclectic group is placed face to face for more than two weeks The Debaters of this Age is the tale of what happens inside a California hotel in 2018 when a group of intellectuals gather to vigorously discuss the religious issues of our time

Curing the Philosopher's Disease

Richard H. Jones,2009-09-28 Curing the

Philosopher s Disease is a philosophical examination of the mysteries surrounding the foundations of science philosophy and religion Much of Western philosophy and science is discussed in order to see our epistemological and metaphysical situation The love hate relation philosophers have with mystery is explored as are the contributions of reductionists and antireductionists postmodern relativists and critical realists naturalists and the religious and theologians and mystics The thrust of the arguments affirms that there are limits to what philosophy science religion and mystical experiences can tell us about reality By acknowledging that some questions may be unanswerable and understanding the importance of that fact even as the answers remain ambiguous our true situation in the world is revealed Mystery should be reinstated as a basic feature when we reflect upon the nature of what we know and who we are Mystery frames all of our claims to fundamental knowledge and we must accept that it will remain a permanent fixture Thus the importance of mystery needs to be reaffirmed today during an era when the fullness of reality is often ignored

G. Blagrove,2025-05-23 Abstract This book explores the factors that influence the acceptance or rejection of the Big Bang theory and the theory of biological evolution The rejection of either theory can occur despite the time that has elapsed since the original theories were proposed and their wider acceptance The study critically examines the biographies of individuals establishing the factors that influence their rejection or acceptance of either theory The book concludes that individuals are affected by multiple factors and explores how these findings may contradict other studies which identify religious belief as the driver for rejection The author proposes an original theory of opinion formation that is specific to both scientific theories and suggests the use of inclusive teaching methods and historical narrative within science lessons which may assist in explaining to students the story of discovery of each scientific theory as well as teaching the theory itself The study also concludes that the rejection of both theories particularly by older participants may be linked to past discredited theories including the Steady State theory and the theory of Panspermia

science is the only way to know things science can explain religion away there is not enough evidence for God the arguments for God's existence do not work Williams argues that belief in God is more intellectually plausible than atheism
