Transformations in the Early Modern Americas Stephanie Kirk, Sarah Rivett, 2014-10-01 Christianity took root in the Americas during the early modern period when a historically unprecedented migration brought European clergy religious seekers and explorers to the New World Protestant and Catholic settlers undertook the arduous journey for a variety of motivations Some fled corrupt theocracies and sought to reclaim ancient principles and Christian ideals in a remote unsettled territory Others intended to glorify their home nations and churches by bringing new lands and subjects under the rule of their kings Many imagined the indigenous peoples they encountered as savages awaiting the salvific force of Christ Whether by overtly challenging European religious authority and traditions or by adapting to unforeseen hardship and resistance these envoys reshaped faith liturgy and ecclesiology and fundamentally transformed the practice and theology of Christianity Religious Transformations in the Early Modern Americas explores the impact of colonial encounters in the Atlantic world on the history of Christianity Essays from across disciplines examine religious history from a spatial perspective tracing geographical movements and population dispersals as they were shaped by the millennial designs and evangelizing impulses of European empires At the same time religion provides a provocative lens through which to view patterns of social restriction exclusion and tension as well as those of acculturation accommodation and resistance in a comparative colonial context Through nuanced attention to the particularities of faith especially Anglo Protestant settlements in North America and the Ibero Catholic missions in Latin America Religious Transformations in the Early Modern Americas illuminates the complexity and variety of the colonial world as it transformed a range of Christian beliefs Contributors Ralph Bauer David A Boruchoff Matt Cohen Sir John Elliot Carmen Fernandez Salvador J nia Ferreira Furtado Sandra M Gustafson David D Hall Stephanie Kirk Asunci n Lavrin Sarah Rivett Teresa Toulouse **What Is a Western?** Josh Garrett-Davis, 2019-09-26 There s western and then there s Western and where history becomes myth is an evocative question one of several questions posed by Josh Garrett Davis in What Is a Western Region Genre Imagination Part cultural criticism part history and wholly entertaining this series of essays on specific films books music and other cultural texts brings a fresh perspective to long studied topics Under Garrett Davis s careful observation cultural objects such as films and literature art and artifacts and icons and oddities occupy the terrain of where the West as region meets the Western genre One crucial through line in the collection is the relationship of regional western works to genre Western works and the ways those two categories cannot be cleanly distinguished most work about the West is tinted by the Western genre and Westerns depend on the region for their status and power Garrett Davis also seeks to answer the question What is a Western now To do so he brings the Western into dialogue with other frameworks of the imagined West such as Indigenous perspectives the borderlands and environmental thinking The book s mosaic of subject matter includes new perspectives on the classic musical film Oklahoma a consideration of Native activism at Standing Rock and surprises like Pee wee s Big Adventure and Dr Seuss s The Lorax The book is

influenced by the borderlands theory of Gloria Anzald a and the work of the indie rock band Calexico as well as the author s own discipline of western cultural history Richly illustrated primarily from the collection of the Autry Museum of the American West Josh Garrett Davis s work is as visually interesting as it is enlightening asking readers to consider the American West in new ways

A Primal Perspective on the Philosophy of Religion Arvind Sharma, 2006-09-09 What am I trying to accomplish through the exercise which I have undertaken namely to examine the philosophy of religion in the light of primal religions If to choose someone else s expression to characterize one s own intellectual endeavour is an indication of one s own lack of imagination then I must plead guilty to that charge but not to that of lack of gratitude for I have to thank Robin Horton for describing better than I can what I have attempted in the book It is an exercise in what he calls translational understanding I quote him now By translational understanding I mean the kind of understanding of a particular thought system that results from the successful translation of the language and conceptual system that embody it into terms of a language and conceptual system that currently enjoy world status In talking of translation of course I am not just talking of the provision of dictionary equivalents for individual words or sentences I am talking about finding a world language equivalent for a whole realm of discourse and of showing in world language terms what the point of that realm of discourse is in the life of the people who use it Translation in this broader sense can be very arduous There may be no realm of discourse in the world language that exactly fits the bill We may have to bend and refashion existing realms and even redefine their guiding intentions

Critical Reflections on Indigenous Religions James L. Cox, 2016-04-22 The study of indigenous religions has become an important academic field particularly since the religious practices of indigenous peoples are being transformed by forces of globalization and transcontinental migration This book will further our understanding of indigenous religions by first considering key methodological issues related to defining and contextualizing the religious practices of indigenous societies both historically and in socio cultural situations Two further sections of the book analyse cases derived from European contexts which are often overlooked in discussion of indigenous religions and in two traditional areas of study South America and Africa

Ecological and Social Healing Jeanine Canty, 2016-10-04 This book is an edited collection of essays by fourteen multicultural women including a few Anglo women who are doing work that crosses the boundaries of ecological and social healing The women are prominent academics writers and leaders spanning Native American Indigenous Asian African Latina Jewish and Multiracial backgrounds The contributors express a myriad of ways that the relationship between the ecological and social have brought new understanding to their experiences and work in the world Moreover by working with these edges of awareness they are identifying new forms of teaching leading healing and positive change Ecological and Social Healing is rooted in these ideas and speaks to an edge awareness or consciousness In essence this speaks to the power of integrating multiple and often conflicting views and the transformations that result As women working across the boundaries of the ecological and social we have powerful experiences that are creating new forms of

healing This book is rooted in academic theory as well as personal and professional experience and highlights emerging models and insights It will appeal to those working teaching and learning in the fields of social justice environmental issues women s studies spirituality transformative environmental sustainability leadership and interdisciplinary intersectionality studies

Negotiating Science and Religion In America Greg Cootsona,2019-12-06 Science and religion represent two powerful forces that continue to influence the American cultural landscape Negotiating Science and Religion in America sketches an intellectual cultural history from the Puritans to the twenty first century focusing on the sometimes turbulent relationship between the two Using the past as a guide for what is happening today this volume engages research from key scholars and the author s work on emerging adults attitudes in order to map out the contours of the future for this exciting and sometimes controversial field The book discusses the relationship between religion and science in the following important historical periods from 1687 to the American Revolution the revolutionary period to 1859 after Darwin s 1859 On the Origin of Species 1870 1925 the rise of religious modernism and pluralism to the Scopes Trial from Scopes to 1966 the present 1966 to 2000 the third millennium the voices of Stephen Jay Gould Richard Dawkins and Francis Collins the future and its contours This is the ideal volume for any student or scholar seeking to understand the relationship between religion and science in society today

Encountering the Sovereign Other Miriam C. Brown Spiers,2021-12-01 Science fiction often operates as either an extended metaphor for human relationships or as a genuine attempt to encounter the alien Other Both types of stories tend to rehearse the processes of colonialism in which a sympathetic protagonist encounters and tames the unknown Despite this logic Native American writers have claimed the genre as a productive space in which they can critique historical colonialism and reassert the value of Indigenous worldviews Encountering the Sovereign Other proposes a new theoretical framework for understanding Indigenous science fiction placing Native theorists like Vine Deloria Jr and Gregory Cajete in conversation with science fiction theorists like Darko Suvin David Higgins and Michael Pinsky In response to older colonial discourses many contemporary Indigenous authors insist that readers acknowledge their humanity while recognizing them as distinct peoples who maintain their own cultures beliefs and nationhood Here author Miriam C Brown Spiers analyzes four novels William Sanders s The Ballad of Billy Badass and the Rose of Turkestan Stephen Graham Jones s It Came from Del Rio D L Birchfield s Field of Honor and Blake M Hausman s Riding the Trail of Tears Demonstrating how Indigenous science fiction expands the boundaries of the genre while reinforcing the relevance of Indigenous knowledge Brown Spiers illustrates the use of science fiction as a critical compass for navigating and surviving the distinct challenges of the twenty first century
