God Or Beast Evolution And Human Nature:

God Or Beast Robert Claiborne,1974 The science writer refutes the ideas of Desmond Morris B F Skinner and others in presenting his theory about human behavior and man s evolutionary lineage *The Search for Society* Robin Fox,1989 A collection of essays by the author focusing on the endemic opposition to the use of a social sciences evolutionary theory based upon innate human qualities and therefore any definition of cultural universals *Loose Cannons Red Herrings and Other Lost Metaphors* Robert Claiborne,2001-07-31 A colorful compendium of everyday words and phrases and where they originated The English language is a treasury of splendid mysteries among them the many words and phrases whose origins we no longer know Often the original meaning was literal pertaining to forgotten objects or activities such as aftermath which once meant the grass that sprang up after a farmer had mowed a field With the informal scholarship and good humored wit that are his trademarks Robert Claiborne reveals the wonders buried in our speech vivid images of people and customs of the past As the reader soon discovers they are a sort of hidden poetry that can heighten the colors and sharpen the meanings of words and phrases that we read or write daily Growing Young Ashley Montagu,1988-12-30 In this new revised edition of his landmark book Montagu compels us to reevaluate the way we think about growth and development in all its phases throughout life Humans are designed to grow and develop their childlike qualities and not to become the ossified adults prescribed by society Montagu demonstrates how our culture schools and families are in conspiracy against such childlike traits as the need to love to learn to wonder to know to explore to think to experiment to be imaginative creative and curious to sing dance or play He also reveals the many links between physical and mental aging and tells how to prevent psychosclerosis the hardening of the mind so that we can die young as late as possible The best statement ever written on the most important neglected theme of human life and evolution Stephen Jay Gould Harvard University In this new revised edition of his landmark book Montagu compels us to reevaluate the way we think about growth and development in all its phases throughout life Humans are designed to grow and develop their childlike qualities and not to become the ossified adults prescribed by society Montagu demonstrates how our culture schools and families are in conspiracy against such childlike traits as the need to love to learn to wonder to know to explore to think to experiment to be imaginative creative and curious to sing dance or play He also reveals the many links between physical and mental aging and tells how to prevent psychosclerosis the hardening of the mind so that we can die young as late as possible **World Military History Bibliography** Barton Hacker,2003-06-01 Preclassical and indigenous nonwestern military institutions and methods of warfare are the chief subjects of this annotated bibliography of work published 1967 1997 Classical antiquity post Roman Europe and the westernized armed forces of the 20th century although covered receive less systematic attention Emphasis is on historical studies of military organization and the relationships between military and other social institutions rather than wars and battles Especially rich in references to the periodical literature the bibliography is divided into eight parts 1

general and comparative topics 2 the ancient world 3 Eurasia since antiquity 4 sub Saharan Africa and Oceania 5 pre Columbian America 6 postcontact America 7 the contemporary nonwestern world and 8 philosophical social scientific natural scientific and other works not primarily historical Evolution and Human Behavior John Cartwright,2000 The book covers fundamental issues such as the origins and function of sexual reproduction mating behavior human mate choice patterns of violence in families altruistic behavior the evolution of brain size and the origins of language the modular mind and the relationship between genes and culture **Coleridge's Defense of the Human** Anya Taylor,1986 Approaches to Democracy W. J. Stankiewicz,1980 The Implications of Evolution for Metaphysics David H. Gordon,2023-08-22 After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In The Implications of Evolution for Metaphysics Theism Idealism and Naturalism David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power Gandhian Philosophy Mr. Rohit Manglik,2023-08-23 In this book we will study about Mahatma Gandhi s views on non violence truth Swaraj and their philosophical underpinnings **The Writer's Sourcebook** Laurie G. Kirsznar,Stephen R. Mandell,1987 Creation and Complexity Christine Ledger,Stephen Pickard,2004 Creation and Complexity are two themes that draw the sciences and theology together The remarkable advances of science in the modern period have opened up new knowledge and revealed ever deepening layers of complexity in the world from the cosmic macro level to the micro world of quantum There seems no end to the rich tapestry of the cosmic order and process A science of complexity has been spawned The discoveries of the sciences have been matched in the twentieth century by a renewal in the doctrine of creation Behind this lies a renaissance in trinitarian thinking which offers fresh insight into the dynamic of God in creation past present and future The complexity of the triune God in creation find echoes in the rich complexity of the world uncovered by the contemporary sciences This book explores the nature of complexity in God s creation **Back to Human Nature** Charles B. Osburn,2020-10-01 Emotions feelings and morality play a critical role in our daily decision making With the rapid advance of industry and technology however this subjective information is becoming less valued in critical decisions Rational thought and the accumulation of objective knowledge are often credited with humanity s thriving success in recent centuries This

book makes the case that humanity's social progress has only been possible through these too often repressed subjective factors and will be equally crucial in altering the present course of society

Evolutionary Theory and Christian Belief David Lack, 2013-04-15 Originally published in 1957 This book is concerned with the conflict between Darwinism as the Victorians called it and Christianity a conflict here re stated in modern terms because it so vitally affects our understanding of human nature and human values today The opening chapter describes the historical background There is a short account of evolution and the argument over Genesis The importance of natural selection is stressed and rival theories as to the means of animal evolution are criticised Discussions follow on whether the course of evolution has been random or determined on the argument from design death in nature the biologist's methods and the difficulties in evolutionary ethics

The Early Evolutionary Imagination Emelie Jonsson, 2021-09-29 Darwinian evolution is an imaginative problem that has been passed down to us unsolved It is our most powerful explanation of humanity's place in nature but it is also more cognitively demanding and less emotionally satisfying than any myth From the publication of the Origin of Species in 1859 evolution has pushed our capacity for storytelling into overdrive sparking fairy tales adventure stories political allegories utopias dystopias social realist novels and existential meditations Though this influence on literature has been widely studied it has not been explained psychologically This book argues for the adaptive function of storytelling integrates traditional humanist scholarship with current knowledge about the evolved and adapted human mind and calls for literary scholars to reframe their interpretation of the first authors who responded to Darwin

Rousseau, Nature, and the Problem of the Good Life Laurence D. Cooper, 2021-12 The rise of modern science created a crisis for Western moral and political philosophy which had theretofore relied either on Christian theology or Aristotelian natural teleology as guarantors of an objective standard for the good life This book examines Rousseau's effort to show how and why despite this challenge from science which he himself intensified by equating our subhuman origins with our natural state nature can remain a standard for human behavior While recognizing an original goodness in human being in the state of nature Rousseau knew this to be too low a standard and promoted the idea of the natural man living in the state of society notably in Emile Laurence Cooper shows how for Rousseau conscience understood as the love of order functions as the agent whereby simple savage sentiment is sublimated into a more refined civilized naturalness to which all people can aspire

The Ape that Understood the Universe Steve Stewart-Williams, 2018-09-17 The Ape that Understood the Universe is the story of the strangest animal in the world the human animal It opens with a question How would an alien scientist view our species What would it make of our sex differences our sexual behavior our child rearing patterns our moral codes our religions our languages and science The book tackles these issues by drawing on ideas from two major schools of thought evolutionary psychology and cultural evolutionary theory The guiding assumption is that humans are animals and that like all animals we evolved to pass on our genes At some point however we also evolved the capacity for culture and from that moment culture began evolving in its

own right This transformed us from a mere ape into an ape capable of reshaping the planet travelling to other worlds and understanding the vast universe of which we re but a tiny fleeting fragment Conversations on Human Nature Agustín Fuentes,Aku Visala,2016-07-01 Recent empirical and philosophical research into the evolutionary history of Homo sapiens the origins of the mind brain and the development of human culture has sparked heated debates about what it means to be human and how knowledge about humans from the sciences and humanities should be understood Conversations on Human Nature featuring 20 interviews with leading scholars in biology psychology anthropology philosophy and theology brings these debates to life for teachers students and general readers The book outlines the basic scientific philosophical and theological issues involved in understanding human nature organizes material from the various disciplines under four broad headings 1 evolution brains and human nature 2 biocultural human nature 3 persons minds and human nature 4 religion theology and human nature concludes with Fuentes and Visala s discussion of what researchers into human nature agree on what they disagree on and what we need to learn to resolve those differences *Management and the Brain* R. Carlton Bessinger,Waino W. Suojanen,1983 Collection of articles lectures and research papers on individual and management behaviour in organization development integrating behavioural sciences and biology perspectives covers areas such as human relations decision making productivity creative thinking Motivation responsibility conflict mental stress alienation etc Ten page bibliography illustrations and references **AWESOME CREATIONS AND EVOLUTION** Kamran Pirnahad,2010-03-10 Pirnahad has initially gathered the material of this book in the format of different articles as relating to crucial concepts that have affected the history and evolution of mankind Afterwards He decided to transform these inspirational writings into a comprehensive book of revelations He has received the necessary information not only through endless sincere and honest research continuous education but also through faith in God intuition insight vision meditation and dreams All contents and basic materials of this book have been thought and initially constructed and defined in the English American language within its socio cultural historic and religious course of development Moreover all basic concepts have been developed on the basis of a universal conscience and therefore most views could be also understood and adapted by other languages within their specific cultural environment This book has been mostly the result of the insight and many visions the author has been receiving through the capacity of his soul mind and spirit and within a multi dimensional platform therefore there are only few references to outside sources His book has been nevertheles based on a comprehensive library of multi faceted references in different fiels as related to the subject of his book Pirnahad s effort to prepare and write this book is solely based on the principle that those who possess special spiritual intellectual and creative talents should reveal and share their thoughts works and ideasfor the benefit of mankind The author has reserved high hopes that at this crucial time in human evolution and history this effort could help everyone gain a better insight into major concepts concerning faith humanity history culture languages and evolution and develop a more meaningful and profound way of life This book was
