1862-1907 Great Britain, William Godden, Stamford Hutton, 1908 **William Faulkner** Richard Godden, 2009-01-10 In William Faulkner Richard Godden traces how the novelist's late fiction echoes the economic and racial traumas of the South's delayed modernization in the mid twentieth century As the New Deal rapidly accelerated the long term shift from tenant farming to modern agriculture many African Americans were driven from the land and forced to migrate north At the same time white landowners exchanged dependency on black labor for dependency on northern capital Combining powerful close readings of *The Hamlet Go Down Moses* and *A Fable* with an examination of southern economic history from the 1930s to the 1950s Godden shows how the novels' literary complexities from their narrative structures down to their smallest verbal emphases reflect and refract the period's economic complexities By demonstrating the interrelation of literary forms and economic systems the book describes in effect the poetics of an economy Original in the way it brings together close reading and historical context William Faulkner offers innovative interpretations of late Faulkner and makes a unique contribution to the understanding of the relation between literature and history
