Goethe Als Staatsmann:

Goethe Nicholas Boyle, 1991 Second volume full length original English language biography of Goethe Nicholas Boyle chronicles the most eventful and crowded years of Goethe's life the period of the French Revolution which turned Goethe's life upside down and of the philosophical revolution in Germany which ushered in the periods of Idealism and Romanticism It was also a period dominated by two intense personal relationships with Schiller Weimar's other great poet philosopher and dramatist and with Christiana Vulpius the mother of his son Boyle paints vivid portraits of Goethe's harrowing experiences of the Revolutionary wars of the explosion of new ideas in philosophy and literature which for ten years made Jena the intellectual capital of Europe and of the upheavals sparked by Napoleon which destroyed the Holy Roman Empire

Goethe's Social Philosophy Alfred G. Steer Jr., 2020-05-01 In this study originally published in 1955 Steer explores the importance of Goethe's family concept in two autobiographical works *Campagne in Frankreich* and *Belagerung von Mainz* Through a close textual analysis Steer argues that at the center of both pieces is Goethe's conception of the family as Urform of society

Fichte: The Self and the Calling of Philosophy, 1762-1799 Anthony J. LaVopa, 2001-04-23 This book first published in 2001 is a biographical study of the German philosopher Johann Gottlieb Fichte

War in Goethe's Writings Edward T. Larkin, 1992 This study expands the body of knowledge on Goethe's understanding of war by linking his particular portrayals of war to larger intellectual and aesthetic concerns including the nature of individual development the organization of human society the efficacy of human activity and the impact of transcendent forces

The Disordered Police State Andre Wakefield, 2009-08-01 Probing the relationship between German political economy and everyday fiscal administration *The Disordered Police State* focuses on the cameral sciences a peculiarly German body of knowledge designed to train state officials and in so doing offers a new vision of science and practice during the seventeenth and eighteenth centuries Andre Wakefield shows that the cameral sciences were at once natural technological and economic disciplines but more important they also were strategic sciences designed to procure patronage for their authors and good publicity for the German principalities in which they lived and worked Cameralism then was the public face of the prince's most secret affairs as such it was an essentially dishonest enterprise In an entertaining series of case studies on mining textiles forestry and universities Wakefield portrays cameralists in their own gritty terms The result is a revolutionary new understanding about how the sciences created and maintained an image of the well ordered police state in early modern Germany In raising doubts about the status of these German sciences of the state Wakefield ultimately questions many of our accepted narratives about science culture and society in early modern Europe

The Critical Idyll Peter Morgan, 1990-01-01 *The Critical Idyll* is a socio literary re evaluation of Goethe's idyllic verse epic *Hermann und Dorothea* The revival of traditional German values as markers of national identity against the approaching revolutionary armies of the French in the early 1790s is analysed in the main figure the archetypal German youth Hermann Confronted by the misery of German refugees from the

left bank territories in 1796 Hermann becomes the spokesman for a new sense of German identity The refugee Dorothea and her first finance the German Jacobin who died in Paris provide a perspective on the themes of German identity and individual freedom at this time The national feelings Hermann expresses are based on a language and community in the German small town rather than on earlier territorial or dynastic concepts of the German nation The traditional literary form of the idyll is reformed through irony and parody into a modern critical and self reflexive work in which central themes of post revolutionary society are foregrounded

bd. Genius und Dämon Emil Ludwig,1922 **Building a National Literature** Peter Uwe Hohendahl,2016-11-01 Building a National Literature boldly takes issue with traditional literary criticism for its failure to explain how literature as a body is created and shaped by institutional forces Peter Uwe Hohendahl approaches literary history by focusing on the material and ideological structures that determine the canonical status of writers and works He examines important elements in the making of a national literature including the political and literary public sphere the theory and practice of literary criticism and the emergence of academic criticism as literary history Hohendahl considers such key aspects of the process in Germany as the rise of liberalism and nationalism the delineation of the borders of German literature the idea of its history the understanding of its cultural function and the notion of a canon of major and minor authors

Accounting and Science Michael Power,1996-06-28 In recent years policy makers and scientists have become increasingly interested in the economics of science and in particular in the relationship between accounting and science This book originally published as a special issue of the journal Science in Context provides a truly interdisciplinary approach to this subject The contributors explore in a number of different ways the constitutive role that practices of economic calculation play in the conduct of science and the forms of economic life within which science is embedded Challenging conventional views they suggest that if scientific and accounting practices are to be properly understood they must be studied in relation to a complex background of specialist communities funding institutions and demands for public accountability This book will be invaluable for scholars and policy makers working in the field
