by investment treaties it asks four basic questions What are the costs and benefits of investment treaties for investors states and other stakeholders Why did developed and developing countries sign the treaties Why should private arbitrators be allowed to review public regulations passed by states And what is the relationship between the investment treaty regime and the broader regime complex that governs international investment Through a concise but comprehensive analysis this book fills in some of the many blind spots of academics from different disciplines and is the first port of call for lawyers investors policy makers and stakeholders trying to make sense of these critical instruments governing investor state relations
