A High-school Astronomy Hiram Mattison,1857 The Glass Cage: How Our Computers Are Changing Us Nicholas Carr,2014-09-29 At once a celebration of technology and a warning about its misuse The Glass Cage will change the way you think about the tools you use every day In The Glass Cage best selling author Nicholas Carr digs behind the headlines about factory robots and self driving cars wearable computers and digitized medicine as he explores the hidden costs of granting software dominion over our work and our leisure Even as they bring ease to our lives these programs are stealing something essential from us Drawing on psychological and neurological studies that underscore how tightly people s happiness and satisfaction are tied to performing hard work in the real world Carr reveals something we already suspect shifting our attention to computer screens can leave us disengaged and discontented From nineteenth century textile mills to the cockpits of modern jets from the frozen hunting grounds of Inuit tribes to the sterile landscapes of GPS maps The Glass Cage explores the impact of automation from a deeply human perspective examining the personal as well as the economic consequences of our growing dependence on computers With a characteristic blend of history and philosophy poetry and science Carr takes us on a journey from the work and early theory of Adam Smith and Alfred North Whitehead to the latest research into human attention memory and happiness culminating in a moving meditation on how we can use technology to expand the human experience The High School Quarterly ,1915 The Color of Success 2.0 Gilberto Q. Conchas,2024 The first edition of The Color of Success was a groundbreaking asset based exploration of the educational trajectories of high achieving low income students within urban schools The author brings his now seminal book up to date with insights based on existing and new research current policies and innovative pedagogical approaches Conchas utilizes a critical lens to examine the intersectional identities of racially minoritized students the role of existing power hierarchies within schools and offers specific structural approaches that create educational opportunity The Color of Success 2 0 amplifies student voice explores school family and community partnerships promotes culturally relevant pedagogy and teacher preparation includes a new chapter on Black male optimism after the historic election of President Barack Obama and offers a thought provoking additional chapter on the role of educational leaders in promoting successful school pathways plus a thoroughly revised quantitative chapter on social capital With a sense of urgency readers will gain vital insights for understanding what is needed to create promote and expand equitable school environments and transformative pathways for racially minoritized

urban youth This updated edition of *The Color of Success* is a timely and practical resource for practitioners and researchers alike Conchas's work once again confirms that positive reforms are possible Anyone who shares a commitment to social justice in education will find compelling and valuable insights From the Foreword by Cynthia Feliciano professor Washington University in St Louis

The Kantian Imperative Paul Saurette, 2005-01-01 In this book the author challenges this interpretation by arguing that Kant's imperative is actually based on a problematic appeal to common sense and that it is premised on and seeks to further cultivate and intensify the feeling of humiliation in every moral subject Discerning the influence of this model on historical and contemporary political thought and philosophy the author explores its particular impact on the work of two contemporary thinkers Charles Taylor and Jürgen Habermas The author also shows that an analysis of the Kantian imperative allows a better understanding of specific current political issues such as the U.S. military scandal at Abu Ghraib in Iraq and of broader ones such as post 9/11 foreign policy This book thus demonstrates that Kant's moral philosophy and political theory are as relevant today as at any other time in history Half t p
