Going Global The New Shape Of American I:

Engines Of Tomorrow Robert Buder, 2000-07-14 The U S economy is the envy of the world and the key to its success is technological innovation In this fascinating and in depth account reported from three continents Robert Buder turns the spotlight on corporate research and the management of innovation that is helping drive the economy s robust growth Here are firsthand communiqu s from inside the labs of a reborn IBM resurgent GE and Lucent research upstarts Intel and Microsoft and other leading American firms as well as top European and Japanese competitors It was only a few years ago that competitiveness experts U S well wishers and naysayers alike concluded that America had lost its business and technological edge The nation s companies they asserted couldn t match the development and manufacturing efficiency of overseas rivals Yet now the nation is humming along riding an unparalleled wave of innovation Buder tells us this turnaround has come on many fronts in marketing sales manufacturing and the creation of start up companies But Engines of Tomorrow deals with a central element that has gone largely unexamined corporate research It s the research process that provides the technologies that spur growth Research is behind the renaissance of IBM the stunning growth of Lucent and much of the steamrolling American recovery Focusing on the fast moving communications computer electronics sector Buder profiles some of the world s leading thinkers on innovation talks with top inventors and describes the exciting technologies coming down the pike from information appliances to electronic security and quantum computing In the process he examines the vital strategic issues in which central labs play a determining role including How IBM s eight labs around the world figure in Lou Gerstner s plans to achieve consistent double digit growth and to join GE as a 100 billion concern Why Xerox s famed Palo Alto Research Center is vying to resuscitate its company s lagging fortunes by sending anthropologists into the field to study the hidden ways people really work What Hewlett Packard will do without its original instrument business recently spun off as Agilent Technologies The business was central to HP Labs MC2 philosophy of merging research expertise in measurement computation and communication and its departure removed a lot that was unique about HP How the November 1999 federal court finding that Microsoft operates a monopoly hinders the Seattle giant s acquisition plans and makes it increasingly vital for nine year old Microsoft Research to lead the way in innovating from within Could this be the next great lab for the twenty first century With authority and undaunted optimism about the underlying vitality of the research process Buder discusses these issues and reveals the future of some of the world s best and most powerful companies

Loving and Leaving Washington John Yochelson, 2016-08-01 John Yochelson was seventeen when he first heard President Kennedy s call Ask not what your country can do for you ask what you can do for your country Responding to the call to public service he had a front row seat from the mid 1970s through the mid 1990s when the power game in Washington was played across party lines Loving and Leaving Washington is his inside account of the lives of public servants from the perspective of a lifelong moderate The Center for Strategic and International Studies brought Yochelson

into close contact with such heavyweights as Henry Kissinger and Federal Reserve chairman Paul Volcker work with the Council on Competitiveness kept him at the center of action But the rise of bare knuckled partisanship soured him on DC In 2001 he left power politics to fight for a cause that he believed in launching a San Diego based nonprofit to increase the participation of women and underrepresented minorities in science and engineering Funding realities and family ties however drew him back to the Beltway The bittersweet experience of disengaging from and returning to Washington prompted Yochelson's candid look at the loss of middle ground in U S politics and the decline of public trust in government In this illuminating memoir he reflects on the current generation's dedication to their country and considers the rewards limitations and uncertain future of public service

The Pursuit of Knowledge Richard C. Atkinson, 2007-04-26 Richard C Atkinson's eight year tenure as president of the University of California 1995-2003 reflected the major issues facing California itself the state's emergence as the world's leading knowledge based economy and the rapidly expanding size and diversity of its population As this selection of President Atkinson's speeches and papers reveals his administration was marked by innovative approaches that deliberately shaped U C's role in this changing California These writings tell the story of the national controversy over the SAT and Atkinson's successful challenge to the dominance of the seventy five year old college entrance examination They also highlight other issues with national significance U C's experiments with race neutral admissions programs the challenges facing academic libraries and the University's pioneering activities with the California Digital Library and the University's involvement in new paradigms of industry university research Together these speeches and papers open a window on an eventful period in the history of the nation's leading public research university and the history of American higher education

Going Global Amy Hodges, Leslie Seawright, 2014-09-26 While English has become the lingua franca in science business and other fields scholars still grapple with the implications of its adoption in many other settings and cultures To what extent should English be introduced and taught in schools around the world Who owns the English language and can therefore shape its structure and aims What are world Englishes and how can teachers demonstrate them to their students Is English the language of the oppressor an imperialist tool or does global English offer an opportunity for greater understanding and cooperation amongst peoples and cultures This volume of critical essays explores these and other questions surrounding language education and culture in the globalized world Honoring students cultures while trying to prepare them for an uncertain and constantly changing future is the resounding theme of this book The contributors to this volume are as multi cultural and multi faceted as such a volume would demand The essays include authors and studies from Algeria India Iran Ghana Germany Poland Tunisia Qatar Saudi Arabia United Kingdom the United States of America and Yemen The perspectives offered in this volume contribute greatly to the ongoing conversations on language education and globalization
