**Geomorphological Hazards in High Mountain Areas** J. Kalvoda, C.L. Rosenfeld, 2012-12-06 On the basis of a total of thirteen case examples from the Tien Shan Karakorum Himalaya and Tangula Shan central Tibet the risk potential and hazards are inferred from the development of landscape during the Quaternary The history of glaciers can be seen as of central importance for this The Ice Age glacial erosion created V shaped valleys which with their steep flanks as a consequence of the interglacial formation of V valleys have prepared and brought about landslides as well as rockslides and the hazards combined with them The same is true for the moraines which the glaciers have deposited high up in the valley flanks and related loose stone deposits Dry and wet mass movements follow after heavy precipitation especially in the semi arid investigation areas and are catastrophes for the settlements and the communication routes in the valley floors Their key forms are debris cones and debris slopes as well as mudflows and alluvial fans In addition to the Ice Age glaciation history as a preparatory indirect factor the Holocene to present glaciation history is as a result of the damming up of glacier and moraine lakes and their outbursts a direct risk factor The examples presented of acute and already occurred cases of damage were investigated in the years 1989 1994 Acknowledgements The authors wish to thank the Deutsche Forschungsgemeinschaft DFG the Max Planck Gesellschaft MPG the Volkswagen Stiftung VW and the Deutscher Akademischer Austauschdienst DAAD for the financial support for the field work      *The Mountaineering Handbook* Craig Connally, 2004-12-31 Modern Mountaineering on Alpine Rock Snow and Ice If your experience as a backpacker or rock climber is drawing you higher if the cold remote alpine environment calls you nearer this book is for you The Mountaineering

Handbook will teach you the skills that will take you to the top Even if you re already an experienced mountaineer you ll find detailed descriptions of the newest and most effective techniques to refine and organize your methods and equipment The Mountaineering Handbook isn t mired in outdated traditionalism its new school techniques are safer more effective and more fun for mountaineers at every level With constant emphasis on light fast and efficient mountaineering Craig Connally shows you how to Move quickly up and down rock snow and ice with appropriate safety systems Manage mountain hazards including rockfall avalanche lightning and high altitude illness Select the best equipment for your personal style and objectives Maintain sound nutrition and training according to the most up to date science Understand the human factors of mountaineering the social and psychological forces that influence critical decisions Connally s passion for mountaineering is evident in his writing The Mountaineering Handbook is clever insightful and entertaining He intends to move mountaineering into the twenty first century but he s also determined to turn the traditional how to book on its ear by injecting personality humor and thoughtfulness into every page

MOUNTAIN GEOMORPHOLOGY Phil Owens,Olav Slaymaker,2014-02-04

Mountains represent one of the most inspiring and attractive natural features on the surface of the earth Visually they dominate the landscape However the increasing realization of the fragility of mountain areas because of changes in land use management and climate combined with an understanding of their importance for water and other natural resources has resulted in a growing interest in mountain environments in recent years Hence Mountain Geomorphology represents a timely and unique contribution to the literature Written by a team of international experts this book is divided into three sections which consider historical functional and applied mountain geomorphology from both global and local perspectives Historical mountain geomorphology focuses on the evolution of landforms Functional mountain geomorphology emphasises the interaction between processes and landforms while applied mountain geomorphology concerns the interrelationships between geomorphological processes and society Mountain Geomorphology is a valuable source of information for students studying mountain geomorphology and also for academics and research scientists interested in mountain environments
