with the past distancing the television of the present from the feminized and mass audiences assumed to be inherent to the old TV It is no coincidence that the most validated programming and technologies of the convergence era are associated with a more privileged viewership The legitimation of television articulates the medium with the masculine over the feminine the elite over the mass reinforcing cultural hierarchies that have long perpetuated inequalities of gender and class Legitimizing Television urges readers to move beyond the question of taste whether TV is good or bad and to focus instead on the cultural political and economic issues at stake in television s transformation in the digital age     *Dictionary of Video and Television Technology* Keith Jack,Vladimir Tsatsoulin,2002-09-11 This work provides comprehensive and contemporary information on the essential concepts and terms in video and television including coverage of test and measurement procedures     **Staff Discussion Draft on the Transition to Digital Television** United States.
