Heading Toward Omega In Search Of The Meaning Of The Near Death Experience

John Ankerberg, John Weldon

Heading Toward Omega In Search Of The Meaning Of The Near Death Experience:

Heading Toward Omega Kenneth Ring, 1984 *Heading Toward Omega* breaks new ground in near death studies by focusing on the meaning of the near death experience for the survivor and for human evolution. A near death experience or NDE, which an estimated eight million Americans have had, occurs when a person is clinically dead but then survives and reports such phenomena as floating out of the body, entering a dark tunnel, reviewing a life panorama, and encountering a brilliant white light. Such accounts have been described in best sellers by Raymond A. Moody and Elisabeth Kubler-Ross and in Kenneth Ring's previous book *Life at Death*; they were documented for the first time. Dr. Ring's intensive three-year search for the meaning of the near death experience has been pursued through both scientifically designed questionnaires completed by hundreds of experiencers and wide-ranging interviews with many persons who have reported unusually deep NDEs from which he quotes frequently and copiously. From this study emerges a provocative pattern of very positive changes in outlook, values, and behavior following a near death experience, often a complete transformation of personality. Dr. Ring also finds that NDEs are often powerful catalysts for spiritual awakening and psychic development. Moreover, deep NDEs frequently include strikingly similar visions of our planetary future. The depth and consistency of these life transformations, as well as the apparent widespread and increasing incidence of the NDE itself, lead Dr. Ring to a startling conclusion: Near death experiences may be part of an evolutionary thrust toward higher consciousness for all humanity. Thus they may foreshadow the birth of a new planetary consciousness as we head toward Omega, the final goal of human evolution. Front and back flaps.

Making Sense of Near-death Experiences Mahendra Perera, Karupiah Jagadheesan, Anthony Peake, 2012. A near death experience (NDE) is a phenomenon whereby powerful physical and emotional sensations and visions are experienced by someone who is either close to death or has been declared clinically dead. This is a guide to the theory and evidence underlying the phenomenon of NDEs. *Insights from Beyond: An Exploration of Near-Death Experiences and Biblical Truths* Anaja Metellus, 2025-09-26. In *Insights from Beyond*, Anaja Metellus invites readers on a personal and spiritually rich journey born out of grief and a longing to see his long-held beliefs come to life. After losing his grandmother and two young cousins, he found himself consumed by questions about mortality and the meaning of life. A late-night YouTube search led him into the world of near death experiences (NDEs). These testimonies would go on to profoundly shift his understanding of life, death, and God. Raised within Evangelical Christianity, Anaja began to see his inherited worldview through fresh eyes. NDEs didn't pull him away from his faith, but they did prompt him to examine it objectively. With honesty and reverence, he explores foundational truths through biblical reflection and scientific research. Questions of origin, identity, purpose, and destiny unfold in ways that invite every reader, regardless of religion, to reconsider what they believe and why. To Anaja, NDEs aren't hallucinations but spiritual breadcrumbs. God's way of whispering to us through the veil. In an age where religion can feel divisive or shallow, this book offers something deeper. Whether you're a believer, seeker, or curious skeptic, you're invited to

explore the mystery You may find that God isn't offended by your search In fact He may have been waiting for you to begin it

philosophical attacks nor wholesale rejection of the evidence can withstand scrutiny After articulating a constructive postmodern philosophy that allows the parapsychological evidence to be taken seriously Griffin examines this evidence extensively He identifies four types of repeatable phenomena that suggest the reality of extrasensory perception and psychokinesis Then on the basis of a nondualistic distinction between mind and brain which makes the idea of life after death conceivable he examines five types of evidence for the reality of life after death messages from mediums apparitions cases of the possession type cases of the reincarnation type and out of body experiences His philosophical and empirical examinations of these phenomena suggest that they provide support for a postmodern spirituality that overcomes the thinness of modern religion without returning to supernaturalism
