**The Material Culture of the Jacobites** Neil Guthrie, 2013-12-12 A comprehensive study of material objects associated with the Jacobites produced acquired and treasured in the late seventeenth and eighteenth centuries     The Bookman , 1921

The Author, Playwright and Composer , 1923     *Fake?* Mark Jones, Paul T. Craddock, Nicolas Barker, 1990-01-01

Describes the methods used to make artistic literary documentary and political forgeries and the recent scientific advances in their detection Includes over 600 objects from the British Museum and many other major collections from ancient Babylonia to the present day     *The Studio* , 1922     **The Bookman's Journal and Print Collector** Wilfred Partington, 1921     *The Printed Image in Early Modern London* Joseph Monteyne, 2017-07-05 Presenting an inventive body of research that explores the connections between urban movements space and visual representation this study offers the first sustained analysis of the vital interrelationship between printed images and urban life in early modern London The study differs from all other books on early modern British print culture in that it seeks out printed forms that were active in shaping and negotiating the urban milieu prints that troubled categories of high and low culture images that emerged when the political became infused with the creative as well as prints that bear traces of the roles they performed and the ways they were used in the city It is distinguished by its close and sustained readings of individual prints from the likes of such artists as Wenceslaus Hollar Francis Barlow and William Faithorne and this visual analysis is complemented with a thorough examination of the dynamics of print production as a commercial exchange that takes place within a wider set of exchanges of goods people ideas and money across the city and the nation This study challenges scholars to re imagine the function of popular prints as a highly responsive form of cultural production capable not only of recording events spaces and social actions but profoundly shaping the way these entities are conceived in the moment and also recast within cultural memory It offers historians of print culture and British art a sophisticated and innovative model of how to mobilize rigorous archival research in the service of a thoroughly historicized and theorized analysis of visual representation and its relationship to space and social identity

*Picturing the Book of Nature* Sachiko Kusukawa, 2012-05-02 Because of their spectacular naturalistic pictures of plants and the human body Leonhart Fuchs s *De historia stirpium* and Andreas Vesalius s *De humani corporis fabrica* are landmark publications in the history of the printed book But as *Picturing the Book of Nature* makes clear they do more than bear witness to the development of book publishing during the Renaissance and to the prominence attained by the fields of medical botany and anatomy in European medicine Sachiko Kusukawa examines these texts as well as Conrad Gessner s unpublished *Historia plantarum* and demonstrates how their illustrations were integral to the emergence of a new type of argument during this period a visual argument for the scientific study of nature To set the stage Kusukawa begins with a

survey of the technical financial artistic and political conditions that governed the production of printed books during the Renaissance It was during the first half of the sixteenth century that learned authors began using images in their research and writing but because the technology was so new there was a great deal of variety of thought and often disagreement about exactly what images could do how they should be used what degree of authority should be attributed to them which graphic elements were bearers of that authority and what sorts of truths images could and did encode Kusukawa investigates the works of Fuchs Gessner and Vesalius in light of these debates scrutinizing the scientists treatment of illustrations and tracing their motivation for including them in their works What results is a fascinating and original study of the visual dimension of scientific knowledge in the sixteenth century **Dorothy Garrod and the Progress of the Palaeolithic**
