Healing A Generation The Vietnam Experience:

Healing a Generation W. Stephen Sabom, Edward Tick, 1991 **A Vietnam Trilogy, Vol. 2: Healing Journeys**

Raymond M. Scurfield, 2006 A Vietnam Trilogy is about a side of war that for decades pro military and pro defense advocates have systematically suppressed minimized and denigrated as being falsely exaggerated the indelible human cost of war on its participants that can and does persist for decades The 3 14 million Vietnam war zone veterans and 800 000 Vietnam theater veterans suffering full or partial post traumatic stress syndrome and their families will find it invaluable Volume Two Healing Journeys focuses on three Vietnam Vets making a return trip accompanying 16 students on a Study Abroad history course Especially in the post 9 11 post Iraq world this trilogy is important reading for academics and mental health professionals including graduate and undergrad students in history psychology social work and religion and professionals in psychiatry clinical nursing counseling and religion and academic specialists interested in study abroad programs Through the wrenching stories of veterans and the authors own understanding as a mental health professional Scurfield describes his and his comrades experiences during the war then he describes the healing process fostered by innovative return trips he has led to peace time Vietnam in 1989 and in conjunction with a university history program in 2000 described in this volume A Vietnam Trilogy offers veterans and their families a vicarious healing journey by relating the experiences of those who participated in these therapeutic efforts and offers recommendations to veterans and those who wish to help them The therapy breakthroughs for veterans with Post Traumatic Stress Disorder are now the model for innovative programs across America and they will be the foundation for programs to help today s veterans of the Iraq War Vietnam War Vance Ferton, The transformation of young American men from civilians to combat soldiers in Vietnam began with the arrival of a simple piece of mail that would forever alter the trajectory of their lives The draft notice with its official government letterhead and stark bureaucratic language represented the first step in a journey that would take teenagers from suburban bedrooms and small town farms to the steaming jungles of Southeast Asia For most the war had been a distant reality glimpsed through television news reports and newspaper headlines until that moment when selective service classified them as eligible for military duty and the abstract concept of Vietnam suddenly became a personal destiny The processing through induction centers across America provided the first taste of military life for young men who had never been far from home or experienced the systematic dehumanization that military institutions employed to transform individuals into soldiers The medical examinations aptitude tests and psychological evaluations conducted in sterile government buildings represented attempts to determine which young men possessed the physical and mental characteristics necessary for combat duty The arbitrary nature of these classifications often determined whether someone would spend their military service in relative safety or face the daily possibility of death in Vietnamese rice paddies and jungle clearings Basic training at installations such as Fort Benning Fort Bragg and Fort Polk served as the crucible where civilians were broken down and rebuilt as soldiers

capable of functioning in the chaos and violence of combat operations The eight week transformation process combined physical conditioning with weapons training tactical instruction and psychological conditioning designed to overcome natural human reluctance to kill other human beings Drill sergeants who had often served combat tours in Vietnam themselves brought authentic understanding of battlefield requirements while also conveying the brutal realities that awaited new soldiers in Southeast Asia Healing from War United States.
