Decisions is organized into three parts that lead readers to understand their behavior and learn how to change it. Psychologist Randy W Green PhD begins by illustrating how people become paralyzed by their own rules leading to indecision and poor decisions that can have serious health consequences. He then explores how past traumas and stress reactions inhibit present choices and the effects our own unique body language has on decision making. And he shows how to make better decisions by shifting our attention away from where we want it least and toward what is possible leading to good decisions that are truly in our best interests.

*Wrestling Through Adversity* Dr. Christine M. Silverstein, 2023-09-19

From the dark ages the treatment of those mentally ill has progressed from chaining to a wall those afflicted with mental disturbance who never saw the light of day. However in US emergency rooms our young people on the brink of despair are held hostage for psychiatric care. We have been bound to the antiquated biomedical model of mental health care. It is fortunate that we as a society are experiencing a mental health crisis of enormous proportions currently only in the sense that we are beginning to hear a wake up call as we witness a total breakdown of our mental healthcare system regarding the mental stability of our youth and other groups of everyday people. Healthcare professionals and societies are beginning to understand that mental health is integral to overall health and is more than the absence of symptoms of psychological distress. The mastery important to us all includes the acquisition of the capacity to reflect to relate on a deep level with others emotionally and to empathize in the face of change or stressful situations. Resilient young people who possess these qualities and the ability to wrestle through adversity when they have the skillsets to do so lead more successful lives when they know how to make lemonade out of lemons.
