Health Care Ethics: Critical Issues for the 21st Century Eileen E. Morrison, 2008-03-20      *Critical Care Ethics* David F. Kelly, 2002-06-11 In *Critical Care Ethics* David F. Kelly describes and analyzes some of the major ethical issues facing American hospitals today and proposes practical approaches by which hospitals may ethically and legally resolve them The author includes both theory and application in a way which insures accessibility to those without a background in moral philosophy or moral theology The book's major emphasis is on the resolution within the American hospital of the practical question of forgoing treatment Its central thesis is that a consensus has arisen in American medical ethics concerning the ethical and legal rightness of forgoing medical treatment in some circumstances The present consensus is based on three pillars The first two of these are ethical principles and distinctions arising from Catholic medical ethics which have been generally accepted in American hospital ethics and American law The third is the development of American law itself Together these three bases have resulted in general agreement that Americans have the right to refuse treatment for themselves and that with some reservations they have the right to forgo treatment for others as well These issues are developed in detail including application to the question of medical nutrition and analysis of the decision In addition there are chapters on pain management ethics committees and the problems of resource allocation The final chapter attempts to point out some of the difficulties inherent in allocation arguments and criticizes the way in which they are so often made by many ethicists and religious leaders      *Military Chaplains' Review*, 1991      Journal of Moral Theology, Volume 7, Number 2 Jason King, 2018-06-28 *Catholic Peacemaking* Edited by Jason King *Military Sexual Assault as Political Violence and Challenge to Christian Ethics* Meghan J.  and profound questions facing legislators health care professionals their patients and all members of society Regrettably the  
 debate is too often characterized by rhetoric rather than reason This book aims to inform the debate by acquainting anyone  
 interested in this vital question with some of the major ethical legal clinical and theological issues involved The essays it  
 contains are authoritative in that they have been commissioned from some of the world s leading experts balanced in that  
 they reflect divergent viewpoints including a vigorous debate between two eminent philosophers and readable in that they  
 should be readily understood by the general reader      Religious Perspectives on Bioethics Mark Cherry,2013-12-02 First  
 published in 2004 Religious Perspectives in Bioethics surveys recent bioethics discussion in thirteen religious traditions  
 Christian contributions include chapters on Roman Catholicism Orthodox Christianity the Episcopal German Protestant and

 Michael L. Coulter,Richard S. Myers,Joseph A. Varacalli,2012-04-05 The two original volumes of the Encyclopedia of Catholic  
 Social Thought Social Science and Social Policy were published in 2007 Those two volumes included 848 entries from nearly  
 300 contributors and included a wide range of entries in three general categories entries exploring Catholic social thought at  
 a theoretical level entries reflecting the learning of various social science and humanistic disciplines as this learning relates  
 to Catholic social thought and entries examining specific social policy questions This third supplemental volume continues  
 the approach of the original two First the volume includes entries that explore Catholic social thought at its broadest most  
 theoretical level for example an entry on Pope Benedict s important social encyclical Caritas in Veritate Second the volume  
 includes entries that discuss recent social science research that bears on issues important to Catholic social thought for  
 example an entry on the social costs of pornography draws on recent research on the topic Third the volume includes entries  
 discussing specific issues of social policy that have become increasingly important in recent years for example an entry on  
 embryo adoption and or rescue This third volume contains 202 entirely new entries from over 100 contributors The  
 contributors include distinguished scholars such as Father Robert John Araujo S J Loyola University of Chicago Father Kevin  
 L Flannery S J Gregorian University Robert P George Princeton University William E May John Paul Institute and the Culture  
 of Life Foundation D Q McInerny Our Lady of Guadalupe Seminary and Michael Novak Ave Maria University The work will

appeal to anyone who is looking for a clear and accurate introduction to Catholic social thought      *What to Do with the Least of Our Brothers?* Fr. C. Ryan McCarthy, It seems at times unthinkable that a book like this would have to be written although I am relatively sure that Aldous Huxley foresaw its necessity when he wrote *Brave New World* But the time has arrived where babies are manufactured in sterile facilities and tested for their fitness for life in the world While we have not yet advanced sufficiently in biological sciences to entirely forego natural gestation in favor of prenatal programming process which Huxley describes we have reached the point where those unwanted embryos are set aside freeze dried and abandoned or destroyed when they do not meet the standard set for a child This book affirms the intrinsic goodness of the life of each embryo and explores from the Catholic perspective the possibility of frozen embryo rescue by adoption It looks at those arguments which see the elements of in vitro fertilization as so contrary to the faith and the natural law as to be irrecoverably intrinsically evil and rejects those in favor of a small and narrow path of adoption to fully re incorporate a child through the love of a mother and a father into the society which abandoned it
