

research question; establishment of the inclusion and exclusion criteria; identification of pre-selected and selected studies; categorization of selected studies; analysis and interpretation of results; and the presentation of the review.

The question for the review question was delimited in the first stage: how is the case study being applied as a nursing research method in national and international scientific publications?

In the second stage, Portuguese, English and Spanish languages were used as filters in the time period of 2010 to 2015. Original articles were available in full in the online format. Reports of experience, review studies, literature reviews, edi-

torial management reports, letters, opinion articles, comments, abstracts of essays, essays, duplicate publications, dossiers, official documents, theses, dissertations, books and articles were excluded which did not meet the scope of this review.

The electronic bibliographic bases were consulted on January 15, 2016 for literature, including: Public / PublishMedline (PubMed), Cumulative Index to Nursing & Allied Health Literature (CINAHL), Latin American and Caribbean Literature in Health Sciences (LILACS) and Scientific Electronic Library Online (SciELO). To compose the search strategy, we selected keywords and combined descriptors the following search keys were elaborated according to the database, according to table 1.
