Health Care Systems Around The World Characteristics Issues Reforms:

Health Care Systems Around the World Marie L. Lassey, William R. Lassey, Martin J. Jinks, 1997 This book provides a multidisciplinary examination of health care systems in a variety of countries Major concepts perspectives and issues are introduced defined and used as the basis for analysis Thirteen countries are described and analyzed in considerable detail along with the demographic social and economic characteristics and health care systems of each The book presents a general model and definition of health care systems including important factors to consider in understanding health promotion prevention of disease and health care It provides detailed descriptions of diverse health care systems ranging from centralized and government operated to largely private enterprises noting the virtues and liabilities of each system A valuable resource for anyone who wishes to understand the changes taking place in health care delivery systems in the United States and in a variety of countries across the world

Health Care Reform Around the World Andrew Twaddle, 2002-06-30 Health care reforms around the world from Europe and North America to Africa Latin America and Asia seem to all be market oriented reforms driven by international business interests and right wing political parties There seems to be a sudden and broad concern with the efficiency of medical care with the assertion that democratically or professionally run systems are inherently inefficient Far less concern is evident for the more traditional values held regarding medical care effectiveness or quality and equity The fact is that we have little good cross national research that systematically addresses the reform issue This book addresses that problem and attempts to look at health care reforms in a number of countries representing as wide a spectrum as possible and using a common conceptual framework that allows for comparable information to be gathered and presented on each despite differing levels of socio economic development The authors agreed on a set of models that were thought to provide reasonable guidance in answering the questions of the source of pressures for reform the alternative modes of organization that have been found in the world in recent years and the direction of change among those alternatives

International Health Care Reform Colleen M. Flood, 2003 This volume examines the two models of health care reform managed competition and internal markets that are increasingly becoming the dominant paradigm in European and North American policy

China's Urban Health Care Reform Chack-kie Wong, Vai Io Lo, Kwong-Leung Tang, 2006-01-01 One way to describe the importance of social policy is to say it s about what is and what might be This ethos is the driving force behind Chack Kie Wong Vai Io Lo and Kwong leung Tang s China s Urban Health Care Reform Based on a

study of a mid level city in China these three scholars provide analysis and offer theory based recommendations on health care development Using a comparative policy framework supported by a legal expert s knowledge of regulatory specifications China s Urban Health Care Reform argues that a strategy with priority in economic growth as in the case of China does not bring forth cost efficiency and equity in health care for the whole nation Ultimately Wong Lo and Tang strive to offer direction for health care reform that will lead to better health care in China s cities As a result this is a work of great significance to anyone involved in public health social work public policy medicine or law

Health Insurance Reforms in Asia Sabrina Luk,2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change

Getting Health Reform Right Marc J. Roberts,2008 This book provides a multi disciplinary framework for developing and analyzing health sector reforms based on the authors extensive international experience It offers practical guidance useful to policymakers consultants academics and students alike and stresses the need to take account of each country s economic administrative and political circumstances The authors explain how to design effective government interventions in five areas financing payment organization regulation and behavior to improve the performance and equity of health systems around the world
