Fitting into Your Genes: Healthy Living and Eating in Philadelphia Susan Reid, 2007. Fitness Measures and Health Outcomes in Youth Institute of Medicine, Food and Nutrition Board, Committee on Fitness Measures and Health Outcomes in Youth, 2013-01-10. Physical fitness affects our ability to function and be active. At poor levels, it is associated with such health outcomes as diabetes and cardiovascular disease. Physical fitness testing in American youth was established on a large scale in the 1950s with an early focus on performance-related fitness that gradually gave way to an emphasis on health-related fitness. Using appropriately selected measures to collect fitness data in youth will advance our understanding of how fitness among youth translates into better health. In *Fitness Measures and Health Outcomes in Youth*, the IOM assesses the relationship between youth fitness test items and health outcomes, recommends the best fitness test items, provides guidance for interpreting fitness

scores and provides an agenda for needed research The report concludes that selected cardiorespiratory endurance musculoskeletal fitness and body composition measures should be in fitness surveys and in schools Collecting fitness data nationally and in schools helps with setting and achieving fitness goals and priorities for public health at an individual and national level *Measurement and Evaluation in Human Performance, 5E* Morrow, Jr., James R.,Mood, Dale,Disch,

for online materials **Physical Education for Learning** Richard Bailey, 2010-04-04 Essential reading for those studying Physical Education at secondary level **Educating the Student Body** Institute of Medicine, Food and Nutrition Board, Committee on Physical Activity and Physical Education in the School Environment, 2013-11-30 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety, and depression and others diseases. Emerging literature has suggested that in terms of mortality the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment including before, during, and after school and examine the influences of physical activity and physical education on the short and long term physical, cognitive, and brain and psychosocial health and development of children and adolescents. **Educating the Student Body** makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included recognizing the benefits of instilling life-long physical activity habits in children, the value of using systems thinking in improving physical activity and physical education in the school environment, the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education, the importance of considering all types of school environments, the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.
