Ancient Pakistan - An Archaeological History Mukhtar Ahmed, 2014-05-29 Ancient Pakistan An Archaeological History deals with the prehistory of Pakistan from the Stone Age to the end of the Indus Civilization This particular volume The Stone Age concerns with the first appearance of man in northern Pakistan more than a million years ago and traces his cultural history up to the emergence of agriculture and sedentary living in this region The book is written for students of ancient history anthropology and archaeology The material is generously illustrated with a

large number of maps tables drawings and colored photographs Each Section is provided with extensive references to the text and a comprehensive bibliography is provided for those who want to dig deeper into the subject Although the book primarily deals with the Greater Indus Valley its scope is much wider the subject has been discussed in context with the paleolithic of India Central Asia and Iran The story of human evolution provides a constant background *Finding Fairness* Justin Jennings,2021-02-02 Providing a sweeping archaeologically grounded view of human history Justin Jennings explores the origins endurance and elasticity of ideas about fairness and how these ideas have shaped the development of societies at critical moments over the last 20 000 years Inscriptions of Nature Pratik Chakrabarti,2020-10-13 Learn how the deep history of nature became a dominant paradigm of historical thinking through a study of landscapes of India Winner of the BSHS Pickstone Prize by the British Society for the History of Science Shortlisted for the Pfizer Award for an Outstanding Book in the History of Science by the History of Science Society In the nineteenth century teams of men began digging the earth like never before Sometimes this digging often for sewage transport or minerals revealed human remains Other times archaeological excavation of ancient cities unearthed prehistoric fossils while excavations for irrigation canals revealed buried cities Concurrently geologists ethnologists archaeologists and missionaries were also digging into ancient texts and genealogies and delving into the lives and bodies of indigenous populations their myths legends and pasts One pursuit was intertwined with another in this encounter with the earth and its inhabitants past present and future In *Inscriptions of Nature* Pratik Chakrabarti argues that in both the real and the metaphorical digging of the earth the deep history of nature landscape and people became indelibly inscribed in the study and imagination of antiquity The first book to situate deep history as an expression of political economic and cultural power this volume shows that it is complicit in the European and colonial appropriation of global nature commodities temporalities and myths The book also provides a new interpretation of the relationship between nature and history Arguing that the deep history of the earth became pervasive within historical imaginations of monuments communities and territories in the nineteenth century Chakrabarti studies these processes in the Indian subcontinent from the banks of the Yamuna and Ganga rivers to the Himalayas to the deep ravines and forests of central India He also examines associated themes of Hindu antiquarianism sacred geographies and tribal aboriginality Based on extensive archival research the book provides insights into state formation mining of natural resources and the creation of national topographies Driven by the geological imagination of India as well as its landscape people past and destiny *Inscriptions of Nature* reveals how human evolution myths aboriginality and colonial state formation fundamentally defined Indian antiquity Rethinking Global Governance Justin Jennings,2023-05-09 This book argues that long ignored non western political systems from the distant and more recent past can provide critical insights into improving global governance These societies show how successful collection action can occur by dividing sovereignty consensus building power from below and other mechanisms For a better tomorrow we need to free ourselves of the colonial constraints on our

political imagination A pandemic war in Europe and another year of climatic anomalies are among the many indications of the limits of global governance today To meet these challenges we must look far beyond the status quo to the thousands of successful mechanisms for collective action that have been cast aside a priori because they do not fit into Western traditions of how people should be organized Coming from long past or still enduring societies often dismissed as savages and primitives until well into the twentieth century the political systems in this book were often seen as too acephalous compartmentalized heterarchical or anarchic to be of use Yet as globalization makes international relations more chaotic long ignored governance alternatives may be better suited to today s changing realities Understanding how the Zulu Trypillian Alur and other collectives worked might be humanity s best hope for survival This book will be of interest both to those seeking to apply archaeological and ethnographic data to issues of broad contemporary concern and to academics politicians policy makers students and the general public seeking possible alternatives to conventional thinking in global governance

In the Footsteps of Our Ancestors Takeshi Ueki, Glenn Summerhayes, Peter Hiscock, 2024-11-29 In the Footsteps of Our Ancestors details through archaeological analysis the dispersal of our species Homo sapiens providing a broad examination of evidence for early human migration into Asia and Oceania Those migrations are crucial to our understanding of the global story of human evolution and cultural diversification Chapters from an international team of experts provide the new geographical and temporal coverage Controversies around timing pathways and competing models of migrations are explored in regions where archaeological data can be scarce Genetic and archaeological data often seem inconsistent but this book uses syntheses of archaeological evidence to give an updated view of our current knowledge of when and how these regions were first settled These analyses help us understand the pattern of human movement and adaptation that led to the contemporary distribution of our species This book provides the latest coverage of this important topic and contributes to thinking about the history of our species In the Footsteps of Our Ancestors is an essential text for researchers and students of archaeology anthropology and human evolution

Killing Civilization Justin Jennings, 2016-04-15 The concept of civilization has long been the basis for theories about how societies evolve This provocative book challenges that concept The author argues that a civilization bias shapes academic explanations of urbanization colonization state formation and cultural horizons Earlier theorists have criticized the concept but according to Jennings the critics remain beholden to it as a way of making sense of a dizzying landscape of cultural variation Relying on the idea of civilization he suggests holds back understanding of the development of complex societies Killing Civilization uses case studies from across the modern and ancient world to develop a new model of incipient urbanism and its consequences using excavation and survey data from atlatlh y k Cahokia Harappa Jenne jeno Tiahuanaco and Monte Alb n to create a more accurate picture of the turbulent social political and economic conditions in and around the earliest cities The book will influence not just anthropology but all of the social sciences
