## **God Of Modernity The Development Of Nationalism In Western Europe:**

**The God of Modernity** Josep R. Llobera, 1994 This book provides an integrated framework for explaining how nationalism has become one of the most powerful ideologies of modern times Starting with a consideration of the medieval roots of the nation the author goes on to examine the various approaches and structural theories which have been used to explain the development of nationalism In so doing he highlights the key role of cultural and political influences as well as the impact of the French Revolution and its aftermath Clearly written with concise self contained chapters this book will be of interest to undergraduates taking a range of social science and history courses as well as specialist readers National Narcissism Eric Beckett Weaver, 2006 National Narcissism offers a groundbreaking anthropological and sociological approach to nationalism through an expos of the belief systems and psychology of extreme nationalists for whom nationalism is a form of religion This theoretical approach is illustrated with examples primarily taken from Hungary with a special focus in two chapters on the role of gender in nationalism The state of politics and society in Hungary is also examined in a way that steps beyond the usual simplistic flat narratives of what Hungarians are like by stressing the broad variety of viewpoints current in Hungarian society the milieu in which a small minority of extreme nationalists are able to make their voice heard out of proportion to their numbers or political support The theory offered by National Narcissism has wide ranging implications for the future study of extremist nationalism in nation states throughout the world Sociologists anthropologists nationalism studies specialists social psychologists and historians of the recent past in Hungary will find that this theoretical book richly illustrated with examples from Hungarian society challenges positive and negative stereotypes about nationalism extremism post communism central and eastern Europe the European Union and not least about Hungarians themselves

**Religion, Globalization and Culture** Peter Beyer, Lori Gail Beaman, 2007 The topic of religion and globalization is complex susceptible to a great variety of approaches This book combines contributions from many authors who examine a wide range of subjects ranging from overall theoretical considerations to detailed regional perspectives No single understanding of either religion or globalization is privileged **The Multicultural Dilemma** Michelle Hale Williams, 2013 This work seeks to explore the contemporary challenge of government in multicultural societies drawing together a wide range of contributors to examine how ethnic difference could better understood and mediated by modern nation states Divided into three sections the book centres round the notion that changing patterns of migration bring escalating obstacles to integration or assimilation In the first section contributors focus on the theory that immigrants are the actors that catalyze contemporary multicultural dilemmas within states with a particular focus on diaspora and how a diaspora community may differ in some ways from other kinds of immigrant community Section two identifies key factors in shaping ethnic identity before moving on to examine the state of the debate over whether identity can be changed or manipulated The contributors to this section provide valuable insights into the catalysts and causes of ethnic division and tension by showing factors in the

development of ethnic identity In the third section the focus turns to strategies for mediating multicultural challenges and managing internal diversity in multicultural society offering structural and institutional solutions with evidence of application in specific cases and country contexts Offering a comprehensive overview of this pressing issue and drawing on a wide range of case studies this work will be of interest to students and scholars of migration political sociology race and ethnic studies

*Foundations of National Identity* Josep R. Llobera, 2005 What we are experiencing is an increasing autonomy of ethnonations i.e. nations without a state in the wake of a weakening of the multinational states and the transfer of their sovereignty upwards in the case of Europe to the federation of the European Union and downwards to the ethnonations

Jacket Environment, Agriculture and Cross-border Migrations Yenshu Vubo, 2015-12-29 This book brings together contributions on the challenges of the environment agriculture and cross border migrations in Africa key areas that have become critical for the continent's development The central theme running through these contributions is that Africa's development challenges can be attributed to its human and natural ecology Contrasted with the Cold War epoch current developments have ushered us into a world of long and uncertain transitions characterized by a search for new pathways including investment in large scale agriculture by big finance attempts to revitalize existing agriculture and reworking of social policy A major twist relates to environmental questions especially climate change and its global effects leading to all forms of cross border migrations and the emergence of new areas of strategic interest such as sub regional developments as in the Gulf of Guinea This book provides some intellectual clues on how to interpret these emerging predicaments and chart a way forward into a new era for Africa

*Catalonia Since the Spanish Civil War* Andrew Dowling, 2013 This book examines the transformation of the Catalan nation in socio economic political and historical terms and offers an innovative interpretation of the determinants of its nationalist mobilisation With Franco's and Spanish nationalism's victory in 1939 and the consolidation of a long lasting dictatorship it appeared certain that the Catalan national movement would be crushed Yet this did not happen and Catalan nationalism and identity re-emerged at the end of Franco's dictatorship in 1975 more firmly rooted than before The core of this book traces the Francoist repression and the nationalist response to it demonstrating how new political actors reconfigured Catalan nationalism over the course of the Franco regime 1939-1975 Post Franco Catalan cultural and political identity was consolidated and Catalonia became the most successful stateless nationalism in western Europe The 21st century has been marked by an ever growing independence movement culminating in the vast demonstration in the city of Barcelona in July 2010 Andrew Dowling provides multi faceted viewpoints in historic perspective and reflects on possible steps and outcomes for this new pro independence turn in Catalan nationalism This study will appeal not only to students of Spain but also to those interested in nationalism as a separate issue of enquiry The themes treated in the book Franco's Spain nationalism anarchism Catholicism communism and the Catalan role in Spain's transition to democracy make this work an essential point of reference for students and researchers in Hispanic studies modern European

**European Constitutional Language** András Jakab, 2016-04-15 Provides a systematic analysis of both the historical development and current interpretation of constitutional law discourse in Europe **Foodscapes, Foodfields, and Identities in Yucatán** Steffan Igor Ayora Díaz, 2012 The state of Yucatán has its own distinct culinary tradition and local people are constantly thinking and talking about food They use it as a vehicle for social relations but also to distinguish themselves from Mexicans This book examines the politics surrounding regional cuisine as the author argues that Yucatecan gastronomy has been created and promoted in an effort to affirm the identity of a regional people and to oppose the hegemonic force of central Mexican cultural icons and forms In particular Yucatecan gastronomy counters the homogenizing drive of a national cuisine based on dominant central Mexican appetencies and defies the image of Mexican national cuisine as rooted in indigenous traditions Drawing on post structural and postcolonial theory the author proposes that Yucatecan gastronomy having successfully gained a reputation as distinct and distant from Mexican cuisine is a bifurcation from regional culinary practices However the author warns this leads to a double paradoxical situation that divides the nation while a national cuisine attempts to silence regional cultural diversity the fissures in the project of a homogeneous regional identity are revealed ***Signifying Identities*** Anthony Cohen, 2012-10-12 This collection of extended papers examines the ways in which relations between national ethnic religious and gender groups are underpinned by each group's perceptions of their distinctive identities and of the nature of the boundaries which divide them Questions of frontier and identity are theorised with reference to the Maori Australian aborigines and Celtic groups The theoretical arguments and ethnographic perspectives of this book place it at the cutting edge of contemporary anthropological scholarship on identity with respect to the study of ethnicity nationalism localism gender and indigenous peoples It will be of value to scholars and students of social and cultural anthropology human geography and social psychology **Understanding Religious Violence** J.P. Larsson, 2017-07-05 There is a long standing fear of that which is not understood Since September 11 2001 the fear surrounding the violent elements of religion has led to heightened tensions Research is thus essential to counteract the effects of religious xenophobia In this compelling book J P Larsson investigates religious violence terrorism and armed conflict in order to deliver the understanding required for a more peaceful world and to allow for a framework of conflict transformation This multi disciplinary text will greatly interest those in the fields of international relations theology and sociology **Making Sense of Violence** Matthew D'Auria, Mark Hewitson, 2020-11-25 This book looks at the representations of modern war by analysing texts and examining the ways in which authors relate to the atrocious horrors of war Rejecting the assumption that violence is simply a denial of reason or at best a pathological form of collective sadism this book considers it a cultural act that needs to be understood as underpinned by a series of shared and accepted norms and values stemming from a society at a given moment of its history and shaped by its language Traditional vocabulary and

language seem inadequate to describe soldiers experience of modern warfare The problem for writers is to depict and render intelligible a dramatically unprecedented reality through recourse to something familiar For some historians and literary critics the absurdity of the First World War has shaped our ironic and disenchanting reading of the entire twentieth century Yet these ways of coping with the urge to communicate inexpressible feelings and emotions in most cases are not sufficient to overcome the incoherence of the sentiments felt and the events witnessed The contributors attempt to address the questions and issues that are posed by the highly ambiguous views texts and representations examined in this volume This book was originally published as a special issue of the journal *European Review of History Revue Européenne d'Histoire*

Popular Culture, Identity, and Politics in Contemporary Catalonia Alessandro Testa, Mariann Vaczi, 2023 How does popular culture reflect and shape identity politics in the secessionist climate of contemporary Catalonia **The Politics of Language in the Spanish-Speaking World** Clare Mar-Molinero, 2002-11 This book traces how and why Spanish has arrived at its current position examining its role in the diverse societies where it is spoken from Europe to the Americas

In Search of the Hebrew People Ofri Ilany, 2018-04-01 As German scholars poets and theologians searched for the origins of the ancient Israelites Ofri Ilany believes they created a model for nationalism that drew legitimacy from the biblical idea of the Chosen People In this broad exploration of eighteenth century Hebraism Ilany tells the story of the surprising role that this model played in discussions of ethnicity literature culture and nationhood among the German speaking intellectual elite He reveals the novel portrait they sketched of ancient Israel and how they tried to imitate the Hebrews while forging their own national consciousness This sophisticated and lucid argument sheds new light on the myths concepts and political tools that formed the basis of modern German culture **Networks, Regions and Nations** Robert Stein, Judith Pollmann, 2010

This volume offers a fascinating insight into the continuities and discontinuities in the formation of identities in the Low Countries and its neighbouring countries It is an important contribution to the ongoing debates about national and other identities Race, Ethnicity and Social Theory John Solomos, 2022-07-01 *Race Ethnicity and Social Theory* provides a critical analysis of the main areas of scholarly research and debate about racial and ethnic relations over the past few decades The book covers substantive areas of scholarly debate in this fast changing field including race and social relations identities and the construction of the racial other feminism and race the relationship between race and nationalism antisemitism the evolution of new forms of racism race and political representation and more generally the changing debates about race and ethnicity in our global environment The book argues that there is a need for more dialogue across national and conceptual boundaries about how to develop the theoretical tools needed to understand both the historical roots of contemporary forms of racialised social and political relations and the contemporary forms through which race is made and re made A key argument that runs through the book is the need to develop conceptual frameworks that can help us to make sense of the changing forms of racial and ethnic relations in contemporary societies This means developing more dialogue

across national research cultures as well as empirical research that seeks to engage with the key issues raised by contemporary theoretical debates The book will be of interest to both students wanting to develop a deeper understanding of this area of scholarship and to researchers of race ethnicity and migration working in various national and disciplinary environments *The Nation and Its Ruins* Yannis Hamilakis,2007-08-02 Publisher description **Toward a Catholic**
