## **God Gene How Faith Is Hardwired Into Our Genes:**

The God Gene Dean H. Hamer, 2005-09-13 The overwhelming majority of Americans believe in God this conviction has existed since the beginning of recorded time and is shared by billions around the world In *The God Gene* Dr Dean Hamer reveals that this inclination towards religious faith is in good measure due to our genes and may even offer an evolutionary advantage by reducing stress preventing disease and extending life Popular science at its best *The God Gene* is an in depth fully accessible inquiry into research that can change the way we see ourselves and the world around us Written with balance integrity and admirable scientific objectivity this is a book for readers of science and religion alike Fascinating A compelling case that spirituality very well may be part and parcel of our genetic structure Los Angeles Times Challenges some basic assumptions we may have and certainly goads us into reflection about human nature The News Observer

**The Miracles of the Bible Viewed Differently** Maximilian Ledochowski, 2024-08-12 Did Jesus Christ really rise from the dead or did the lance thrust accidentally save his life Did the Mother of God become virgin with child or did a mistranslation turn the young woman into the virgin Mary How could Jesus walk on water and is there an explanation for the miraculous multiplication of bread Is it possible that the blind the mute the paralysed or the lepers are suddenly healed Why do we like to believe in miracles so much How do miracles come about in the first place The physician Dr Maximilian Ledochowski gets to the bottom of these and many other questions and tries to explain the miracles of the Bible with modern knowledge

*World Religions 101, 2nd Edition* Emily G. Hyde, Margaret O. Hyde, 2013-01-01 Many people search for spiritual meaning hope comfort and inner peace in their personal lives The most common path to spirituality around the world is through religion Although the variety of religions may seem endless many similarities exist among the major religions of the world including the belief in one or more gods and the honoring of rituals stories ceremonies codes of conduct and doctrines or sets of teachings In this well balanced report respected authors Margaret O Hyde and Emily G Hyde take an honest look at religion in the lives of young people This book explores the many different religions around the world from the ten most common religions Christianity Islam Hinduism Buddhism Sikhism Judaism Baha ism Confucianism Jainism and Shintoism to modern expressions of spirituality and more It also offers fascinating information on a field of research known as neurotheology the study of the neurobiology of the brain and religion Scientists are learning more about where in the brain religious thoughts take place and what it means to be human

*Health Analytics with R* Mary Regina Boland, 2024-12-30 This textbook teaches health analytics using examples from the statistical programming language R It utilizes real world examples with publicly available datasets from healthcare and direct to consumer genetics to provide learners with real world examples and enable them to get their hands on actual data This textbook is designed to accompany either a senior level undergraduate course or a Masters level graduate course on health analytics The reader will advance from no prior knowledge of R to being well versed in applications within R that apply to data science and health analytics I have never seen a book like this and think it will

make an important contribution to the field I really like that it covers environmental social and geospatial data I also really like the coverage of ethics These aspects of health analytics are often overlooked or deemphasized I will definitely buy copies for my team Jason Moore Cedars Sinai Medical Center Overall I have a highly positive impression of the book It is VERY comprehensive It covers very extensive data types I do not recall other books with the same level of comprehensiveness Shuangge Ma Yale University The book is comprehensive in both aspects of genetics and health analytics It covers any type of information a healthcare data scientist should be familiar with whether they are novice or experienced I found any chapter that I looked into comprehensive but also not too detailed although in general this book is more than 600 pages of comprehensive and detailed relevant information Robert Moskovitch Ben Gurion University of the Negev

**Explaining the Holocaust** Mordecai Schreiber, 2015-04-16 Seventy years after it took place the Holocaust committed against the Jews of Europe during World War II continues to cast a giant shadow over humankind Man's inhumanity to man is not a thing of the past Genocidal action is still commonplace around the globe Has humankind learned the lessons of the past Is the human race doomed to live in a perpetual state of war and self destruction Explaining the Holocaust shows how given the right circumstances human beings can lose their humanity Does that mean that the ethical teachings of the major religions are wishful thinking This book tackles two questions that continue to be asked by people everywhere Why did a highly civilized nation like Germany in the middle of the twentieth century commit the most heinous crime in all of human history And if indeed there is a loving God who made a covenant with the people of Israel why were millions of innocent peaceful Jews dehumanized starved tortured and systematically murdered Explaining the Holocaust spares no one in discussing the enormity of the evil But it also shows how the divine spark in human beings did not die during those years of darkness and why we still have a glimmer of hope

*Tall Tales about the Mind and Brain* Sergio Della Sala, 2007-01-11 Does listening to Mozart make us more intelligent Is there such a thing as a gay gene Does the size of the brain matter Does the moon influence our behaviour Can we communicate with the dead Can graphology tell us anything about a person's character Is the human brain clonable What role do dreams have in cognition Can mind conquer matter and diseases Are out of body experiences possible Can we trust our intuitions To some the answer to all these questions might well be a resounding no but to many people these represent serious beliefs about the mind and brain beliefs that drive their everyday behaviour beliefs that cost them huge amounts of money Whole industries have developed founded on these dubious claims about the mind and brain Even major corporations have dabbled with assessment methods such as those advocated by graphology accepting and rejecting candidates on the basis of their handwriting Expectant parents buy books and tapes by the dozen showing them how to improve the intelligence of their child by playing them classical music People subscribe to expensive therapies founded on beliefs rather than science or risk their health buying books that tell them how they can conquer illness through positive thinking perhaps at the expense of more scientifically proven treatments Tall Tales about the Mind and Brain

presents a sweeping survey of common myths about the mind and brain In a lighthearted and accessible style it exposes the truth behind these beliefs how they are perpetuated why people believe them and why they might even exist in the first place

*The Belief of an Unwilling to believe* Michael Murauer,2025-06-10 Against all dogmatic ideologies What can a philosophical life orientation look like in our time Why should we favour it over a religious life orientation The future belongs to philosophy not to religions or secular ideologies With this fundamental statement Michael Murauer places himself in the tradition of Enlightenment thinking The philosopher and physician who sees no acceptable alternative to a rational debate on philosophical and especially moral issues is aware that at the end of such a debate there are no absolute truths but well founded value judgements as presented here in a wide range of topics The Belief of an Unwilling to believe constantly balances on the edge between systematic philosophical treatise and personal confession measuring itself against the current state of thought This book attempts to summarise the philosophical criticism of ideologies taking into account the world view developed by modern science while at the same time offering orientation and help for life on the basis of philosophical thought adequate to modernity

**The Faith** Charles W. Colson,Harold Fickett,2008 Addresses modern world questions about the Christian religion and its tenets drawing on historical events and present day anecdotes to illustrate its joyful aspects while explaining the faith s embrace of the example and message of Jesus

**Yoga, Meditation, and Mysticism** Kenneth Rose,2016-09-08 Contemplative experience is central to Hindu yoga traditions Buddhist meditation practices and Catholic mystical theology and despite doctrinal differences it expresses itself in suggestively similar meditative landmarks in each of these three meditative systems In Yoga Meditation and Mysticism Kenneth Rose shifts the dominant focus of contemporary religious studies away from tradition specific studies of individual religious traditions communities and practices to examine the contemplative universals that arise globally in meditative experience Through a comparative exploration of the itineraries detailed in the contemplative manuals of Theravada Buddhism Pata jalian Yoga and Catholic mystical theology Rose identifies in each tradition a moment of sharply focused awareness that marks the threshold between immersion in mundane consciousness and contemplative insight As concentration deepens the meditator steps through this threshold onto a globally shared contemplative itinerary which leads through a series of virtually identical stages to mental stillness and insight Rose argues that these contemplative universals familiar to experienced contemplatives in multiple traditions point to a common spiritual mental and biological heritage Pioneering the exploration of contemplative practice and experience with a comparative perspective that ranges over multiple religious traditions religious studies philosophy neuroscience and the cognitive science of religion this book is a landmark contribution to the fields of contemplative practice and religious studies

**Christian Ideals in British Culture** D. Nash,2013-05-07 This book offers a challenge to conventional histories of secularisation by focusing upon the importance of central religious narratives These narratives are changed significantly over time but also to have been invested with importance and meaning by religious individuals and

organisations as well as by secular ones      **Science and Religion in Dialogue** Melville Y. Stewart,2009-12-01 This two volume collection of cutting edge thinking about science and religion shows how scientific and religious practices of inquiry can be viewed as logically compatible complementary and mutually supportive Features submissions by world leading scientists and philosophers Discusses a wide range of hotly debated issues including Big Bang cosmology evolution intelligent design dinosaurs and creation general and special theories of relativity dark energy the Multiverse Hypothesis and Super String Theory Includes articles on stem cell research and Bioethics by William Hurlbut who served on President Bush's Bioethics Committee      **Culturally Incorrect** Rod Parsley,2009-04-08 Parsley exposes the failure of the current generation of believers to engage the culture present a relevant gospel and lead influence through service and paints a vivid picture of the cost and implications of that failure Parsley explains how the culture wars have entered a new critical phase for the United States and discusses the areas in which this war is being fought Cultural Scientific Geopolitical Media and Academia He presents an understanding of the paradigms assumptions and values that animate the humanist secularist and neo pagan enemies of Christianity in America and offers a strategy for winning this war what he calls a New Great Awakening and how evangelism social action and the engagement of culture fit into that plan      Religion Today Ross Aden,Chris A. Kramer,2024-07-02 Religion Today introduces students to key concepts in religious studies through a compelling problem solving framework Each chapter opens with a contemporary case study that helps students engage in current religious issues explore possible solutions to difficult religious problems today and learn key themes and concepts in religious studies To enhance student learning a free Student Study Guide is available for download from Rowman Littlefield The Study Guide features chapter summaries definition quizzes for students to test themselves on key terms and possible learning activities      Reality Check David L. Weiner,2009-09-25 In this insightful well researched book an award winning popular psychology writer takes readers on a fascinating tour of what researchers are now discovering about the brain offering a refreshingly realistic perspective as a guide to living      A Human Creation W. R. Frederick,2022-07-05 A Human Creation challenges god belief under several disciplines History shows that humanity's need for the supernatural is rooted in the ancient past and that subsequent religious scriptures are poor proof of any god's existence wrought with myth fabrication and textual error Evolution is supported by the evidence not a divine intervention or design The brain your mind can make you a believer and society culture and power politics can enforce belief The physics of the universe show that there is no need for a god to arrive at today's reality while life's existence was a natural certainty All of this means that humans fabricated their gods to satisfy their needs and fears      *Fire of Love* Donald Goergen,2006 Fire of Love invites us to recognize the power and ever expanding presence of the Spirit in our own lives in the life of the church in the religious traditions of the world in the world itself and in God's evolving creation The author maintains that the whole world including the wider creation and cosmos is the Spirit's sphere of influence Augustine and Aquinas the Hebrew prophets and the Hindu Upanishads Gandhi and

Muhammad Teilhard de Chardin and theologians of the Eastern Orthodox traditions all enter the conversation as this book challenges us to pay greater attention to the Spirit in the mysterious workings of our lives **BOOK JACKET** Neuroscience and Religion Volney P. Gay, 2009-01-01 This is a unique set of multidisciplinary reflections on how the neurosciences shape our understanding of religious experience and religious institutions Twelve scholars and scientists assess how advances in the neurosciences affect our traditional sense of mind self and soul
