God Matters Readings In The Philosophy Of Religion:

God Matters Raymond Martin, Christopher Bernard, 2003 *God Matters* is a state of the art accessible anthology of the major issues in philosophy of religion Its accessibility is due to its mix of classic readings and brand new readings about contemporary issues commissioned specifically with an undergraduate student in mind These commissioned readings make the difficult concepts of contemporary philosophy of religion easy to understand and are complemented by key excerpts from more technical philosophers writing on the same subjects The result is an engaging comprehensive reader that introduces students to the most important ideas in classical and contemporary philosophy of religion to the most important thinkers and even to excerpts from the key texts in which these thinkers presented their groundbreaking theories **God Matters**, 2007

A Thinker's Guide to the Philosophy of Religion Allen Stairs, 2017-09-29 With an approachable reader friendly style A Thinker's Guide to the Philosophy of Religion provides up to date themes in contemporary analytic philosophy of religion This provocative collection of readings stimulates clear thinking and careful attention to the reasons for taking up views on religious questions **Readings in the Philosophy of Religion - Second Edition** Kelly James Clark, 2008-02-14 Like the first edition the second edition of *Readings in the Philosophy of Religion* covers topics in a point counterpoint manner specifically designed to foster deep reflection Unique to this collection is the section on the divine attributes The book's focus is on issues of fundamental human concern God's suffering hell prayer feminist theology and religious pluralism All of these are shown in a lengthy introduction to relate to the standard issues in philosophical theology omnipotence omniscience immutability goodness and eternity For this second edition each major section ends with an extended reflection by a philosopher who shows how to think through the issues raised in the preceding essays Also included are a new section on the ontological argument with classical discussions by Anselm and Gaunilo along with a new essay by Laura Garcia a new section on religious language new essays on the free will defense theodicies and feminist theology and a new version of the cosmological argument that does not rely on the principle of sufficient reason *Philosophy and Religion* Anthony O'Hear, 2011-07-07 This volume contains vigorously argued essays on religion based on The Royal Institute of Philosophy's 2008 9 lecture series *In Defense of the Bible* Steven B. Cowan, Terry L. Wilder, 2018-11-26 *In Defense of the Bible* gathers exceptional articles by accomplished scholars Paul Copan William A Dembski Mary Jo Sharp Darrell L Bock etc addressing and responding to all of the major contemporary challenges to the divine inspiration and authority of Scripture *The Blackwell Companion to Natural Theology* William Lane Craig, J. P. Moreland, 2012-02-27 With the help of in depth essays from some of the world's leading philosophers *The Blackwell Companion to Natural Theology* explores the nature and existence of God through human reason and evidence from the natural world Provides in depth and cutting edge treatment of natural theology's main arguments Includes contributions from first rate philosophers well known for their work on the relevant topics Updates relevant arguments in light of the most current state of the art philosophical and scientific

discussions. It stands in useful contrast and opposition to the arguments of the new atheists. Mental Health, Spirituality, and Religion in the Middle Ages and Early Modern Age Albrecht Classen, 2014-07-28. This volume continues the critical exploration of fundamental issues in the medieval and early modern world here concerning mental health, spirituality, melancholy, mystical visions, medicine, and well-being. The contributors, who originally had presented their research at a symposium at The University of Arizona in May 2013, explore a wide range of approaches and materials pertinent to these issues, taking us from the early Middle Ages to the eighteenth century, capping the volume with some reflections on the relevance of religion today. Lapidary sciences matter here as much as medical, psychological research combined with literary and art historical approaches. The premodern understanding of mental health is not taken as a miraculous panacea for modern problems, but the contributors suggest that medieval and early modern writers, scientists, and artists commanded a considerable amount of arcane, sometimes curious, and speculative knowledge that promises to be of value and relevance even for us today. Once again, modern palliative medicine finds, for instance, intriguing parallels in medieval word magic and the mystical perspectives encapsulated in highly productive alternative perceptions of the macrocosm and microcosm that promise to be insightful and important also for the post-modern world. *Ethics* Harry J. Gensler, 2011. Natural Signs and Knowledge of God C. Stephen Evans, 2010-05-27. Is there such a thing as natural knowledge of God? C. Stephen Evans presents the case for understanding theistic arguments as expressions of natural signs in order to gain a new perspective both on their strengths and weaknesses. Three classical, much-discussed theistic arguments—cosmological, teleological, and moral—are examined for the natural signs they embody. At the heart of this book lie several relatively simple ideas. One is that if there is a God of the kind accepted by Christians, Jews, and Muslims, then it is likely that a natural knowledge of God is possible. Another is that this knowledge will have two characteristics: it will be both widely available to humans and yet easy to resist. If these principles are right, a new perspective on many of the classical arguments for God's existence becomes possible. We understand why these arguments have for many people a continued appeal, but also why they do not constitute conclusive proofs that settle the debate once and for all. Touching on the interplay between these ideas and contemporary scientific theories about the origins of religious belief, particularly the role of natural selection in predisposing humans to form beliefs in God or gods, Evans concludes that these scientific accounts of religious belief are fully consistent, even supportive of the truth of religious convictions. Ethics: Contemporary Readings Harry Gensler, Earl Spurgin, James Swindal, 2004-08-02. *Ethics: Contemporary Readings* is designed to lead any student into the subject through carefully selected classic and contemporary articles. The book includes articles by the leading figures in the field and provides an excellent entry to the topic. The book complements Harry Gensler's *Ethics: A Contemporary Introduction* (Routledge, 1998). **Petitionary Prayer** Scott A. Davison, 2017-02-09. This volume explores the philosophical issues involved in the idea of petitionary prayer, where this is conceived as an activity designed to influence the action of the all-knowing, all-powerful, perfectly good God of

traditional theism Theists have always recognized various logical and moral limits to divine action in the world but do these limits leave any space among God's reasons for petitionary prayer to make a difference Petitionary Prayer A Philosophical Investigation develops a new account of the conditions required for a petitionary prayer to be answered by employing the notion of contrastive explanation With careful attention to recent developments in metaphysics epistemology and value theory Scott A Davison surveys the contemporary literature on this question He considers questions about human freedom and responsibility in relation to different views of divine providence along with the puzzles inherent in Christian teachings concerning petitionary prayer Davison develops new challenges to the coherence of the idea of answered petitionary prayer based upon the nature of divine freedom the limits of human knowledge and the nature of those good things that require a recipient's permission before they can be given He proposes new defences building upon careful analysis of the shortcomings of previous proposals and clarifying the issues for future debate

On the Origin of Consciousness Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration

Worlds without End Mary-Jane Rubenstein, 2014-01-28 A religion professor elucidates the theory of the multiverse its history and its reception in science philosophy religion and literature Multiverse cosmologies imagine our universe as just one of a vast number of others Beginning with ancient Atomist and Stoic philosophies Mary Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance One concerns the so called fine tuning of the universe nature's constants are so delicately calibrated that it seems they have been set just right to allow life to emerge For some thinkers these fine tunings are evidence of the existence of God for others however and for most physicists God is an insufficient scientific explanation Hence the multiverse's allure if all possible worlds exist somewhere then like monkeys hammering out Shakespeare one universe is bound to be suitable for life Of course this hypothesis replaces God with an equally baffling article of faith the existence of universes beyond before or after our own eternally generated yet forever inaccessible to observation or experiment In their very efforts to sidestep

metaphysics theoretical physicists propose multiverse scenarios that collide with it and even produce counter theological narratives Far from invalidating multiverse hypotheses Rubenstein argues this interdisciplinary collision actually secures their scientific viability We may therefore be witnessing a radical reconfiguration of physics philosophy and religion in the modern turn to the multiverse Rubenstein s witty thought provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers Publishers Weekly A fun mind stretching read clear and enlightening San Francisco Book Review *The Agnostic Inquirer* Sandra Menssen,Thomas D. Sullivan,2007-09-19 A startling achievement I cannot overemphasize how original and groundbreaking this work is or recommend this book too highly The argument throughout is clear succinct and rigorous It represents the highest standards of analytical philosophy All future work if it is to be up to speed will have to deal with what Menssen and Sullivan have done *Universal Morality Reconsidered* Joseph Bankard,2014-10-17 Like many contemporary issues moral discourse finds itself in the middle of a great divide On one side of the chasm sits much of contemporary Western philosophy moral psychology and the social sciences which often view morality as a purely natural phenomenon This view argues that human morality can be fully explained by appealing to naturalistic processes such as kin selection reciprocal altruism cultural evolution and various models of social contract theory In this context God s e *The Case for a Creator* Lee Strobel,2009-05-18 Discover the astonishing evidence for intelligent design in this New York Times bestselling book by award winning journalist Lee Strobel My road to atheism was paved by science but ironically so was my later journey to God Strobel says During his academic years Lee Strobel became convinced that God was obsolete a belief that colored his journalism career Science had made the idea of a Creator irrelevant or so Strobel thought But today science points in a different direction A diverse and impressive body of research has increasingly supported the conclusion that the universe was intelligently designed At the same time Darwinism has faltered in the face of concrete facts and hard reason Has science discovered God At the very least it s giving faith an immense boost as new findings emerge about the incredible complexity of our universe Join Strobel as he reexamines the theories that once led him away from God Through his compelling and highly readable account you ll encounter the mind stretching discoveries from cosmology cellular biology DNA research astronomy physics and human consciousness that present compelling evidence in *The Case for a Creator* Also available *The Case for a Creator* small group video study and study guide Spanish edition kids edition student edition and more **Fifty Years of Philosophy of Religion** Andries F. Sanders,Kristof De Ridder,2007 The bibliography lists about 10 000 titles of monographs collections and articles in the field of the philosophy of religion and philosophical theology that appeared between 1955 and 2005 The majority of them are in the English language but publications in German Dutch and French are listed as well Though it is not claimed to be exhaustive the bibliography offers a fairly representative survey of scholarly work on the main topics of interest Publications have been systematically classified according to eleven main categories Introductions Surveys

Dawes, 2012-09-10 In this timely study Dawes defends the methodological naturalism of the sciences Though religions offer what appear to be explanations of various facts about the world the scientist as scientist will not take such proposed explanations seriously Even if no natural explanation were available she will assume that one exists Is this merely a sign of atheistic prejudice as some critics suggest Or are there good reasons to exclude from science explanations that invoke a supernatural agent On the one hand Dawes concedes the bare possibility that talk of divine action could constitute a potential explanation of some state of affairs while noting that the conditions under which this would be true are unlikely ever to be fulfilled On the other hand he argues that a proposed explanation of this kind would rate poorly when measured against our usual standards of explanatory virtue

The Cambridge Companion to Miracles Graham H. Twelftree, 2011-04-14 The miracle stories of the founders and saints of the major world religions have much in common Written by international experts this Companion provides an authoritative and comparative study of miracles in not only Hinduism Islam Buddhism Christianity and Judaism but also indigenous religions The authors promote a discussion of the problems of miracles in our largely secular culture and of the value of miracles in religious belief The miracles of Jesus are also contextualized through chapters on the Hebrew Bible classical culture to the Romans Second Temple and early rabbinic Judaism and early Christianity This book provides students with a scholarly introduction to miracles which also covers philosophical medical and historical issues
