God, religions, corpuscles and superstrings

gordon simms

The book cover features a vibrant, abstract illustration. The upper portion is dominated by swirling, ethereal clouds in shades of purple, blue, and green, set against a dark, starry background. A bright, fiery orange and yellow nebula-like structure is visible on the right side. The lower portion of the cover depicts a dark, calm body of water under a twilight sky. On the left, a small island with several palm trees is silhouetted against the horizon. On the right, a white sailboat with a single sail is visible on the water.

God and the History of the Universe Jarvis Streeter,2016-03-22 The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong Some Christian understandings of reality do conflict with some scientific understandings But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the facts founded on them This book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God s role in the origin and history of the universe At the center of this integrated narrative is the view that God who is pure unbounded Love is Creator the zest for life in the universe comes from God and God is the source of Truth Beauty and Goodness in the universe God is amazed and delighted at what God and the world has created God is saddened by ways creatures have fallen short of pure unbounded Love Truth Beauty and Goodness and God s pure unbounded Love keeps on trying to persuade all creatures toward Truth Beauty and Goodness **The Universal God** R. The Evolution of the Idea of God Grant Allen,1901 **The Idea of God in Early Religions** Frank Byron Jevons,1911 God of the Atoms Francis P. Xavier,2006 The Concept of God, the Origin of the World, and the Image of the Human in the World Religions P. Koslowski,2012-12-06 All religions make statements about God or the Absolute and about the beginning about the beginning of the world and the beginning and nature of the human person Propositions about God the human person and the world statements about God s eternity or process of becoming about the status and nature of the human person as the image of God and about the beginning of the world are woven into religious speculations about the beginning The theology anthropology and cosmology of the world religions determine the image of the human person and the image of the world in the world cultures shaped by the different religions They stand in a tense relationship with the anthropologies and cosmologies of modern science which in turn challenge the religions to deepen their image of the human person With this volume leading thinkers of Hinduism Buddhism Judaism Christianity and Islam provide the reader with a first hand source for understanding the five world religions and their teaching about God the human person and the origin of the world Allah, Jesus, and Yahweh Gordon Harrison,2013-04 Twenty first century s nightly news can t pass by without running another story on religious conflict or clashes While these modern day battles play out for the world

to see the issues that act as a catalyst for them are deeply embedded in ancient texts that claim to contain absolute certainties. An eye opening and vitally important new book has burst upon the literary scene called *Allah, Jesus and Yahweh: The Gods That Failed*. The author Gordon Harrison conducts a definitive expose of the ravages caused by religion and breaks new ground in the world of investigative literature. In this riveting history of three of the world's major religions, Islam, Christianity and Judaism, this book explores the relationship between belief and the suspension of logic with its consequential suffering. Beginning with the September 480 BCE Battle of Marathon, the author traces the spread of Eastern belief systems and the three major religions in particular from the Middle East into Europe and the rest of the world. Citing examples of how fanatic elements of each faith have caused war, bloodshed, confusion and suffering, Harrison makes his case for reason and freethinking. As the author notes, the parlance in vogue for this present invasion is a clash of civilizations, East versus West. But this is not entirely the case. There is a clash, but we have confused the combatants. Many in the West do not intend to fight for the preservation of Christianity; some in the East feel the same about Islam. What we will defend is freedom, democracy and the values of the Enlightenment versus submission, dictatorship and the buzz of the hive mind. A colossal clash of ideals is underway between the Enlightenment and the Army of the Night, those who know they have absolute certainty without evidence. Religion is certainty without proof; science is proof without certainty. From religion to science, it has been a long night's journey into light. Harrison asks the reader to hold his hand, walk with him through these pages and see the glory and the horror we have created. Since its release, the book has garnered a consistent string of rave reviews; here are three. This is an extremely impressive book, one that should enlighten any open-minded reader, theist and non-theist alike. Harrison transports the reader from the ancient battle at Marathon across two millennia, following the march of civilization to the present day. He shows in a clear and engaging manner the moral corruption that is inherent in the ancient texts that continue to serve as the scriptural foundations of modern religions. His compelling mixture of philosophy, theology, astronomy, psychology and physics, presented always in a very accessible and entertaining style, persuasively demonstrates how science illuminates and promotes understanding while religion ossifies thinking patterns and all too often produces intergroup conflict. I highly recommend this book to all. By James Alcock, Professor of Psychology at York University, Toronto. Something that worked really well for me was the author's use of personal anecdotes to illustrate some of his arguments. The one that really stood out was the story about Mother Courage. The author re-creates his experience with the bear and her cubs very vividly for the reader. I found it not only very germane to his point about the presence of morality in nature but also very moving. This book deserves a wide readership. By Dirk Verhulst, English Teacher. Hilarious and powerful. Equal to anything written by Hitchens, Harris, Dawkins and Dennett. The Four Horsemen of the Anti-Apocalypse. *Allah, Jesus and Yahweh* takes a deeper view of time and a more humorous Mark Twain narrative approach than those authors do. By Bill Walker, Freethinker.

The Evolution Of Gods : The Scientific Origin Of Divinity And Religion Ajay Kansal, 2012-04-23 Did gods create

mankind or did mankind create gods Why when and how did mankind begin to worship gods Religious scriptures the world over claim that one or the other god made man but science has not yet identified any supernatural power that created and governed human beings Was it man who came up with the idea of gods to help him cope with his own fears Could it be that ancient people attributed natural phenomena unfathomable and frightening to them to the working of invisible gods What kind of sufferings or bewilderments made people bow before unseen powers or gods as we call them When were these gods created Who invented morals and methods of worship Who wrote the ancient scriptures such as the Bible and the Vedas Most crucially have gods and the scriptures shaped our responses to the world around us The Evolution of Gods seeks to answer these questions and explains scientifically how when and why religions and gods came into being Ajay Kansal marshals anthropological and historical facts about the development of religions in a simple and straightforward manner to assert that it was mankind that created gods and not the other way around *Why Gods Persist* Robert A. In Search of the Universal God. Vijay Atawane, 2014-08-05 My God is better than your God Debate settled The my God versus your God battle has consumed millions of lives over many centuries Will there ever be a day when Jews Christians Muslims and Hindus worship a single God In Search of the Universal God is a step by step guide to discover such a God within our own religion It attempts to resolve global religious conflicts and unite humankind into a single brotherhood This book takes you on a journey of discovery and helps find answers to questions like 1 What is the definitive way to resolve religious conflicts and end the violence and bloodshed 2 Why are there so many different religions and so many different Gods 3 Does God really discriminate against followers of any religion 4 What happens to people who do not follow our religion 5 Who are the chosen people of God 6 What is the purpose of our life 7 Why are old languages dying Hebrew Aramaic Sanskrit Greek and Latin when the races who spoke these languages still survive

Discovering God Rodney Stark, 2007-10-02 Discovering God is a monumental history of the origins of the great religions from the Stone Age to the Modern Age Sociologist Rodney Stark surveys the birth and growth of religions around the world from the prehistoric era of primal beliefs the history of the pyramids found in Iraq Egypt Mexico and Cambodia and the great Axial Age of Plato Zoroaster Confucius and the Buddha to the modern Christian missions and the global spread of Islam He argues for a free market theory of religion and for the controversial thesis that under the best unimpeded conditions the true most authentic religions will survive and thrive Among his many conclusions Despite decades of faulty reports that early religions were crude muddles of superstition it turns out that primitive humans had surprisingly sophisticated notions about God and Creation The idea of sin appeared suddenly in the sixth century BCE and quickly reshaped religious ideas from Europe to China Some major world religions seem to lack any plausible traces of divine inspiration Ironically some famous figures who attempted to found Godless religions ended up being worshiped as Gods Most people believe in the existence of God or Gods and this has apparently been so throughout human history Many modern biologists and psychologists reject these spiritual ideas especially those about the existence of God as delusional They claim that religion is a primitive survival mechanism that should have been discarded as humans evolved beyond the stage where belief in God served any useful purpose that in modern societies faith is a misleading crutch and an impediment to reason In Discovering God award winning sociologist Rodney Stark responds to this position arguing that it is our capacity to understand God that has evolved that humans now know much more about God than they did in ancient times
