Gods Radar:

The Gods of War Christopher Stasheff, Mike Resnick, Jody Lynn Nye, Katherine Kurtz, Diane Duane, Morris G. McGee, 1992-01-15 Perhaps it is not true that there will always be war Perhaps one day humanity will succeed in taming its savage nature so that peace for all humanity will not be merely a pious hope but a concrete reality Perhaps one day we will all be angels But until then there will be war and humanity being what it is will always form graven images to give life to its greatest hopes and fears Because our modern age is scientific does not make us immune to this reality And those images will always take on a life their own And lo there was TEK He is the latest in a long tradition of militant deities But before this god can take his rightful place at the head of the pantheon he has to survive the not so low tech efforts of jealous older gods to destroy him Featuring stories by Mike Resnick Jody Lynn Nye Katherine Kurtz Diane Duane and other great military SF storytellers At the publisher s request this title is sold without DRM Digital Rights Management Trust Your Radar C. Thuesen,2020-04-01 One of the earliest sources of humanity s religious impulse was severe weather which ancient peoples attributed to the wrath of storm gods Enlightenment thinkers derided such beliefs as superstition and predicted they would pass away as humans

became more scientifically and theologically sophisticated But in America scientific and theological hubris came face to face with the tornado nature s most violent windstorm Striking the United States more than any other nation tornadoes have consistently defied scientists efforts to unlock their secrets Meteorologists now acknowledge that even the most powerful computers will likely never be able to predict a tornado s precise path Similarly tornadoes have repeatedly brought Americans to the outer limits of theology drawing them into the vortex of such mysteries as how to reconcile suffering with a loving God and whether there is underlying purpose or randomness in the universe In this groundbreaking history Peter Thuesen captures the harrowing drama of tornadoes as clergy theologians meteorologists and ordinary citizens struggle to make sense of these death dealing tempests He argues that in the tornado Americans experience something that is at once culturally peculiar the indigenous storm of the national imagination and religiously primal the sense of awe before an unpredictable and mysterious power He also shows that in an era of climate change the weather raises the issue of society s complicity in natural disasters In the whirlwind Americans confront the question of their own destiny how much is self determined and how much is beyond human understanding or control
