Mosteller,2022-03-10 Four Views on Christian Metaphysics presents four prominent views held among Christians today on the major questions in philosophical metaphysics What is the nature of existence itself What is it for something to exist What are universals What is the soul How do these things relate to God in light of special and general revelation The four Christian perspectives presented in this book are Platonism Aristotelianism idealism and postmodernism The purpose of this book is to help Christians think deeply and carefully about a Christian view of the ultimate nature of reality and our place in it **Close Encounters of the Divine Kind** Che Ahn,2007 Using analogies from popular science fiction movies Close Encounters of the Divine Kind shows you a world that will satisfy these longings A world that is more real than this physical world A world with a real extraterrestrial who is waiting to be contacted Close Encounters of the Divine Kind is not about religion It is about having a real encounter that will transform your life So if you are searching for truth and meaning if you want purpose in your life read on and may you too have an encounter with God the ultimate extraterrestrial Welcome to the real world Book jacket *The Torah's Vision of Worship* Samuel E. Balentine,1999-07-30 A complement to the author s earlier Overtures to Biblical Theology study on prayer this volume addresses the topic of worship as articulated in the first five books of the Bible Rather than a history of Israelite religion Balentine s volume examines the vision of worship expounded in the Torah in relation to priesthood creation liturgy and covenant He concludes by discussing the contemporary situation of experiencing God s hiddenness and a world caught in despair Balentine proposes that a fresh look at the Torah offers possibilities of counter imagination and hope **Kennedy Saga** Rich Anders,2002-07-28 The Presidency of John F Kennedy was shot Its impact was immense President Kennedy ended the Cuban Missile Crises peacefully and prevented a nuclear war He saved life on this planet from extinction For this he paid with his own life The public s fascination with John F Kennedy and the Kennedy family in general goes far beyond well deserved appreciation for his heroic deed The legend of Camelot was invoked but it falls far short of the importance of the Kennedy Saga This book unveils the secrets surrounding the assassination of John F Kennedy and the true importance of the Kennedy Clan **God**

**Under Investigation** Peter Andreyevich, 2015-03-22 Looking for direct intellectual access to God by scientific means is rather doomed to fail Yet we have a right to check if man in their scientific investigations has not come close to such borders of cognition beyond which one can see areas which do not belong to cognizable world usually defined as metaphysical transcendental or spiritual If we find such a place this is as if we knocked on God's window In his search for plausible ways to this window the Author analyzes extensive evidence with reference to quantum mechanics theory of relativity theory of evolution genetics and cognitive science Of course any attempt to give an objective verdict must lead to a catastrophe But what really matters is not a verdict but the fact that the investigation continues The book will be enjoyed by all those who have capacity to reflect upon the key philosophical question why is there something rather than nothing If you think this book is worth of reading you can confirm this opinion with the use of the bank account PL07249000050000400057303247 USD

**Who is God and why did they lie us** Asparuh Chorbazhiev, 2020-12-31 The world is changing The world we live in has always changed Changes can be dynamic or smooth Immersed in our daily lives we rarely think about the reasons why the world is changing If we still have time to think it will not be difficult to realize that we are these reasons If we are able to realize this we are not far from the logic that we can control change Not individually but as a conscious society The changes we have registered so far are summarized as the history of mankind Everyone wants a better life This is only possible if we make the world we live in better And we are constantly trying to do just that Although provided in different ways according

to the respective society and the respective epoch the teaching has always been the same in its essence This teaching is so universal that it cannot be changed Change can only exist in the way we realize it In order to be properly aware we only need to update the way we pass on the teachings to the generations to come Mankind today as a whole has realized that unification is needed to continue our proper development At the same time there is a division by different criteria and to different degrees One of these divisions is faith in God Most of those who deny it believe that we were created by chance by nature This is also an interesting version but it does not help much for proper upbringing Very often people interpret this option as follows Man is the greatest creation of nature So great that it is greater than its creator And little by little without realizing it people begin to boast Once we succumb to selfishness the worst of all human vices we take the wrong path that can inevitably lead all of humanity to self destruction The second group in this division are people who believe in God If the faith of those who claim to have it is true they follow the teachings on which the claim of God creator of the world and men is based If these teachings are the same it would lead to the unification of humanity If the result is the opposite then we have not fulfilled the basic testament of the doctrine This means that we have changed it and passed it on in the wrong way to the next generations There is a third group in the same division These are the people who realize that God and nature is one and the same thing These people are trying to modernize the teaching and make it understandable to everyone This would help people realize the need for unification as a prerequisite for achieving change in the world for the better In personal aspect if everyone tries to become a better person then the world will simply become better If one believes the world can be better there is no difference from believe in God It s just a different manifest of faith Without faith we can easily sell our souls The book Who is God and why did they lie us is an attempt to explain this in a simple way Asparuh Chorbadzhiev was born on August 25th 1970 in Varna Bulgaria In 1988 he graduated at the Maritime College in Varna At those years a seaman profession was one of the possibilities to allow him travel around the world To continue this career later he went to the Naval Academy For the past 30 years he sailed on most type of ships meeting people from all over the world As he would put it reading books is another way to travel in time and space His interest in reading led him to the books with alternative knowledge and also to the great spiritual teachers This helped him reach answers to eternal questions What has been achieved is best to be shared And that is exactly what is done in this book

**The Good Life** Burton F. Porter, 2001 The Good Life contains an exposition and critique of the various ideals in living that have been advocated by major philosophers and schools of thought In addition the ethical problems of egoism determinism and relativism are explained and evaluated in both their classic Greek form and in the deconstruction of post modernism The ideals that are discussed include hedonism as described by the Cyrenaics and Epicureans and the Utilitarianism of Bentham and Mill the naturalistic ethic of the Stoics the Transcendentalists the evolutionists and the back to nature movement the biblical ethic of Judaism and Christianity as well as the Eastern religions of Confucianism and Buddhism and the Kantian ideal of duty and virtue ethics including feminist theory

To illuminate various conceptions of the good life multiple examples are drawn from contemporary life including the abortion issue racism capital punishment and multiculturalism      *The Making of American Liberal Theology* Gary J.

Dorrien,2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom
