Germany as Model and Monster Gisela Argyle, 2002-06-07 By examining the works of George Eliot Carlyle Edward Bulwer Lytton George Meredith George Gissing Joseph Conrad E M Forster and D H Lawrence as well as several post World War II novels Argyle explores the Goethean ideal of Bildung and the Bildungsroman self culture and the apprenticeship novel Heinrich Heine's anti philistinism music the Tübingen higher criticism Schopenhauer's and Nietzsche's philosophies Prussianism and avant garde culture in the Weimar Republic To establish the status of these allusions in the public conversation Argyle moves between literary and extra literary contexts including biographical material about the authors as well as information from contemporary literary works periodical articles and other documentation that indicates the understanding authors could assume from their readers Her methodology combines theories of allusion and intertextuality with reception theory

The Novel as Archive Ehrhard Bahr, 1998 Goethe's novel defined as a key work anticipating modernist novels of 20th century A fresh study of one of the most perplexing and daring novels ever written one that was largely misunderstood when it first appeared and which has emerged only in the last two decades as a work that pointed forward stylistically and structurally to the modernist novels of the twentieth century Bahr shows how Goethe subordinated the role of the author narrator making use of a variety of sophisticated narrative devices

such as the archive the interpolated novella some of whose characters appear as real figures in the novel itself to distance himself from the work thus ironizing its apparent meaning

Art, Agency and Living Presence Caroline van Eck, 2015-03-10 Throughout history and all over the world viewers have treated works of art as if they are living beings speaking to them falling in love with them kissing or beating them Although over the past 20 years the catalogue of individual cases of such behavior towards art has increased immensely there are few attempts at formulating a theoretical account of them or writing the history of how such responses were considered defined or understood That is what this book sets out to do to reconstruct some crucial chapters in the history of thought about such reflections in Western Europe and to offer some building blocks towards a theoretical account of such responses drawing on the work of Aby Warburg and Alfred Gell

Goethe and the English-speaking World Nicholas Boyle, John Guthrie, 2002 New studies of both Goethe's relationship to the English speaking world and its perception of Goethe and his works Goethe's relations with the English speaking world have been the subject of scholarly investigation ever since his lifetime This volume brings together eighteen articles that provide new points of view a broad range of approaches and new and original findings on this relationship These range from the discussion of applications of recent critical approaches such as chaos theory and Edward Said's Orientalism to Goethean texts through other more empirical contributions that bring to light new material some of it deriving from archives in Weimar relating to Goethe's contact with English culture Other essays involve the reassessment of questions of influence from both sides in the case of Cooper and Goethe some standard assumptions are revised while in the case of Goethe and Edith Wharton and Goethe and George Eliot new comparative ground is broken Close readings of portions of well known texts such as Faust and Wilhelm Meister challenge standard assumptions The analysis of selected recent translations of Goethe's poetry raises perennial questions of cultural transfer while the survey of the role played by some of Goethe's texts in one corner of the English speaking world Dublin is long overdue Nicholas Boyle is Reader in German Literary and Intellectual History Head of the Department of German in the University of Cambridge and Fellow of Magdalene College John Guthrie is College Lecturer in German and Director of Studies in Modern Languages at New Hall Cambridge

Disrupted Patterns, 2022-03-07 This collection of essays explores the significance of modern chaos theory as a new paradigm in literary studies and argues for the usefulness of borrowings from one discipline to another Its thesis is that external reality is real and is not merely a social construct On the other hand this volume reflects the belief that literature as a social and cultural construct is not unrelated to that external reality The authors represented here furthermore believe that learning to communicate across disciplinary divides is worth the risk of looking silly to purists and dogmatists In applying a contemporary scientific grid to a by gone era the authors play out Steven Weinberg's exhortation to mind the clues to the past that cannot be obtained in any other way It is of course necessary to get the science right yet the essays in this collection do not seek to do science but rather to suggest that science and literature often share common assumptions and

realities Thus there is no attempt to legitimize literary study through the adoption of a scientific approach Interaction between the disciplines requires mutual respect and a willingness to investigate the broader implications of scientific research Consequently this volume will be of interest to students and scholars of the long eighteenth century whether the focus is on England Locke Milton Radcliffe Lewis France Cr billion Diderot Marivaux Montesquieu or Germany Kant Moritz Goethe Fr Schlegel Moreover given its multiple thrust in employing mythological philosophical and scientific notions of chaos this volume will appeal to historians and philosophers of the European Enlightenment as well as to literary historians The volume ultimately aspires to promote communication across centuries and across disciplines *Goethe's Poetry and the Philosophy of Nature* Regina Sachers,2017-10-23 At the beginning of the nineteenth century philosophy and theology come under increasing pressure owing to the emergence of the modern sciences The collection *Gott und Welt* is Goethe s poetic contribution to this conflict in which an alternative to orthodox Christianity was being sought Following the collection s various stages of composition and publication this study offers new readings of some of Goethe s best known poems *Die Metamorphose der Pflanzen* *Dauer im Wechsel* *Urworte* *Orphisch* and *Wiederfinden* Sachers shows that *Gott und Welt* is the long poem on nature which Goethe attempted to write for the last third of his life As such it represents Goethe s unique answers to the intellectual challenges posed by the dawning age of science Regina Sachers is Lecturer in German at Exeter College Oxford

Tambora and the Year without a Summer Wolfgang Behringer,2019-05-29 In 1816 the climate went berserk The winter brought extreme cold and torrential rains unleashed massive flooding in Asia Western Europe and North America experienced a year without a summer while failed harvests in 1817 led to the year of famine At the time nobody knew that all these disturbances were the result of a single event the eruption of Mount Tambora in what is now Indonesia the greatest volcanic eruption in recorded history In this book leading climate historian Wolfgang Behringer provides the first globally comprehensive account of a climate catastrophe that would cast the world into political and social crises for years to come Concentrating on the period between 1815 and 1820 Behringer shows how this natural occurrence led to worldwide unrest Analysing events as diverse as the persecution of Jews in Germany the Peterloo Massacre in the United Kingdom witch hunts in South Africa and anti colonial uprisings in Asia Behringer demonstrates that no region on earth was untouched by the effects of the eruption Drawing parallels with our world today Tambora and its aftermath become a case study for how societies and individuals respond to climate change what risks emerge and how they might be overcome This comprehensive account of the impact of one of the greatest environmental disasters in human history will be of interest to a wide readership and to anyone seeking to understand better how we might mitigate the effects of climate change

Goethe's Science in the Structure of the *Wanderjahre* Alfred G. Steer,2008-07-01 Published in 1979 this study is intended as a continuation of the work of the scholars and previous commentators on Goethe s *Wanderjahre* While considering the scientific structure it concentrates first on one basic question of form that of the series of narrative insertions

and then of necessity on one matter of content that is linked so closely with them that the two are almost inseparable namely the concept of the family as the Urform archetype and metamorphosis of the types of human association Thus the intention of this book is to contribute to the new and better understanding of the novel and which will it is to be hoped at long last help the work take its place as one of the two crowning masterpieces along with Faust II of Goethe s life Iphigenie auf Tauris
