Wells, 1979-05-31 **Goethe's Visual World** Pamela Currie, 2017-07-05 Goethe's ideas on colour and imagery crossed many borderlines those of artistic processes and philosophical aesthetics art history and colour theory together with the science of perception This investigation into his writings ranges across art from Antiquity the Renaissance and the eighteenth century as well as exploring the centrality of these issues to Goethe's literary work Questions find answers but also raise new questions This systematic sequence of essays originally written between 1999 and 2011 appeals to readers in all these separate areas while drawing together their essential coherence **Goethes werke: Naturwissenschaftliche Schriften: v. 1. Wheeler, 2012-12-06 of him in like measure within myself that is my highest wish This noble individual was not conscious of the fact that at that very moment the divine within him and the divine of the universe were most intimately united So for Goethe the resonance with a natural rationality seems part of the genius of modern science Einstein's cosmic religion which reflects Spinoza also echoes Goethe's remark Ibid Item 575 from 1829 Man must cling to the belief that the incomprehensible is comprehensible Else he would give up investigating But how far will Goethe share the devotion of these cosmic rationalists to the beautiful harmonies of mathematics so distant from any pure and direct observation Kepler Spinoza Einstein need not and would not rest with discovery of a pattern within behind as a source of the phenomenal world and they would not let even the most profound of descriptive generalities satisfy scientific curiosity For his part Goethe sought fundamental archetypes as in his intuition of a Urpflanze basic to all plants infinitely plastic When such would be found Goethe would be content for as he said to Eckermann Feb 18 1829 to seek something behind the Urphänomenon is futile Here is the limit But as a rule men are not satisfied to behold an Urphänomenon They think there must be something beyond They are like children who having looked into a mirror turn it around to see what is on the other side Goethe's Faust Alan P. Cottrell, 2020-05-01 The essays in this collection range from close textual analysis to discussions of larger problems such as Goethe's relation to Christianity as illuminated by the theme of sacrifice in Faust This work is viewed with particular reference to Goethe's natural scientific epistemology and to the problems confronting Western man in our own times A study of Faust's blindness and the inner light complete the collection **The Damnation of Newton** Frederick Burwick, 2012-05-10 No detailed description available for The Damnation of Newton **Science, Mind and Art** K. Form and image are not just bridging concepts as in the field of ancient morphology but real transitive concepts that define the state of a culture. From the Internet to smartphones, television advertising etc., we are witnessing as Horst Bredekamp observes an immense mass of images that fill our time and affect the most diverse areas of our culture. The ancient connection between science and art recalled by Goethe emerges with unusual evidence thanks to intersecting patterns and expressive forms that are sometimes shared by different forms of knowledge. Creating a glossary and a culture of these intersections is the task of morphology, which thus enters into the boundaries between aesthetics, art, design, advertising, and sciences from mathematics to computer science to physics and to biology in order to provide the founding elements of a grammar and a syntax of the image. The latter, in its formal quality both expressive and symbolic, is a fundamental element in the unification of the various kinds of knowledge which in turn come to be configured in this regard also as styles of vision. The glossary is subdivided into contiguous sections within a complex framework of cross references. In addition to the two curators, the book features the collaboration of a team of scholars from the individual disciplines appearing in the glossary.
