Goin To Kansas City:

Goin' to Kansas City Nathan W. Pearson, 1987 A big juicy wedge of jazz history Lots of wonderful stories Los Angeles Daily News Kansas City was a hub for Jazz bands that crisscrossed the country in the 1930s The interviews go beyond jazz into the infamous political machinery that made Kansas City a wide open and corrupt town where jazz could flourish Choice A wealth of stories a good measure of entertainment and a valuable stab at history not to mention some great pictures The Kansas City Star **Goin' to Kansas City** Nathan Pearson, Howard Litwak, 1980 *Queering Kansas City Jazz* Amber R. Bogard, 2003 Homelessness had become a social problem that was primarily not about solving the nation s housing crisis The pressing question becomes How and why did homelessness become the social problem in its own right one that was only tangentially

related to the problem of inappropriate or insufficient housing Why when people demanded that something be done about homelessness did they get specific policies and unintended outcomes Cynthia Bogard is not content with the shorthand answers that rested on bias and ideology such as conservative politics bred conservative policies or American individualism precludes government investment in housing This did not explain homelessness sufficiently especially given all the advocacy and research that had occurred in the 1980s and 1990s Examining these claimsmaking activities as constructionists call them however is a daunting task because the activities engaged in by people in the attempt to persuade others are fluid subtle and complicated as are the responses to these social actions This raised a second set of issues that the author is concerned with How can we adequately represent and sociologically examine this very complicated human activity of social problems construction Who does the construction and to what effect Bogard s answer to these questions is a book that can be read in two ways and on multiple levels For those who are interested in the story of the career of homelessness as a social problem in America s two national cities the book should be read from the beginning through the conclusion as a straight narrative The technical matter in the appendix can be ignored But for those readers with an interest in social problems constructionism however this book is meant as a cook book of sorts Each chapter emphasizes a feature of constructionism such as an important group of claims makers or an important aspect of the claims making process The work highlights a major feature in advanced societies the intersection of interests and claims Social constructions may be real but they are comprised of no less real social interests The work marks a real departure and advance over the original formulations of construction theory in social research Cynthia J Bogard is associate professor of sociology at Hofstra University
