Lehmann's theory of the postdramatic and participates in the ongoing debate on the theatre paradigm by placing contemporary Indian performance within it. None of the Indian theatre makers under study built their works directly on the Euro American model of postdramatic theatre but many have used its vocabulary and apparatus in innovative transnational ways. Their principal aim was to invigorate the language of Indian urban theatre which had turned stale under the stronghold of realism inherited from colonial stage practice or prescriptive under the decolonizing drive of the theatre of roots movement after independence. Emerging out of a set of different historical and cultural contexts their productions have eventually expanded and diversified the postdramatic framework by crosspollinating it with regional performance forms. Theatre in India today includes devised performance, storytelling across forms, theatre solos, cross media performance, theatre installations, scenographic theatre, theatre as event, reality theatre, and so on. The book balances theory, context, and praxis developing a new area of scholarship in Indian theatre. Interspersed throughout are Indian theatre makers' clarifications of their own practices vis-à-vis those in Europe and the US.

#### Mental Health, Psychiatry and the Arts Victoria Tischler, 2018-10-08

Medicine and psychiatry both based on science require the art of caring using the principles of art in learning and teaching. Sitting with a patient making sense of their distress being empathetic in understanding both the symptoms and the person and alleviating suffering needs a human touch. For that doctors need the soul of an artist and must be aware of the value that arts have for society and the individual. From the Foreword by Dinesh Bhugra. This comprehensive book explores how visual art, cinema, music, poetry, literature, and drama can inform the teaching and practice of psychiatrists and mental health professionals. Edited and written by a team of expert practitioners, teachers, and researchers including both clinicians and users of mental health services, this comprehensive book will provide valuable insights for undergraduate and postgraduate educators with teaching responsibilities in psychiatry and mental health. Students of the medical humanities, art, music, and drama therapists and educators in occupational therapy and psychology will also find this a valuable and insightful handbook. The authors of this wonderful handbook provide a convincing argument that the arts are good for what ails us. They have each used a preferred artistic medium to deepen personal reflection and to enhance their own creativity as physicians, teachers, and therapists. Their models are clear, their suggestions practical, but none of the approaches you'll find here is reductive or simplistic. Try some of the reflective exercises and teaching strategies. You will be sure to rediscover something you have always cherished about the art of healing. From the Foreword by Allan D Peterkin.
