Gaining Voice Christopher J. Clark, 2019-02-25 This book examines the causes and consequences of black representation in state legislatures African Americans have a troubled history when it comes to wielding political power This reality makes it important to consider the factors that increase their presence in state government This book shows that there is more to explaining black representation than the presence of black people instead institutional traits also affect the racial composition of legislatures Surprisingly Clark finds that black political involvement and political attitudes hinge on the proportion of African Americans making up a state legislature as well as the degree to which that proportion reflects the demographic makeup of the state

New Directions in American Politics Raymond J. La Raja, 2013-02-15 *New Directions in American Politics* introduces students not just to how the American political system works but also to how political science works La Raja brings together top scholars to write original essays across the standard curriculum of American government and politics capturing emerging research in the discipline in a way that is accessible for undergraduates Each chapter combines substantive knowledge with the kind of skill building and analytical inquiry that is being touted in higher education everywhere Contributors to *New Directions* highlight why the questions they seek to answer are critical for understanding American politics and situate them in the broader context of controversies in research The teaching of American politics follows a well worn path Textbooks for introductory courses hew to a traditional set of chapters that describe the Founding American institutions the ways citizens participate in politics and sometimes public policy The material rarely engages students in the kind of questions that animate scholarship on politics One hurdle for instructors is finding material that reflects quality scholarship and thus teaches students about why not just what and yet is accessible for undergraduates Articles in scholarly journals are typically unsuited for undergraduate courses particularly introductory courses What is needed is a book that conveys exciting trends in scholarship across vital topics in American politics and illustrates analytical thinking *New Directions in American Politics* is that book and will be an ideal companion to standard textbooks that focus mostly on nuts and bolts of politics The book features Contributions from a top notch cast of active scholars and a highly regarded editor A focus on analytical thinking that addresses questions of causality Full coverage of the American politics curriculum Short interviews with each contributor on a companion website to help the research come alive and prompt critical thinking questions for students Work that draws on the highest quality research in political science but is written specifically for first year undergraduate students There is simply no book like this available to the growing number of faculty who want their introductory American politics course to be a reflection of the political science discipline and not just the nuts and bolt facts of the American political system

The Last Plantation James R. Jones, 2024-05-21 In *The Last Plantation* James Jones uses the plantation metaphor to investigate how Congress operates as a racialized governing institution a state body organized through racism that imposes the rules that structure our society along racial lines He develops his argument in two parts by analyzing the career experiences of Black congressional workers First he shows how the congressional workplace produces inequality Lawmakers decisions to exempt themselves from the regulations that they impose on other

employers have led to insular work processes that perpetuate racial inequality They have created and managed an unequal workplace where positions are racially stratified space is segregated and identities and interactions are racialized This hierarchy constrains the agency of non White workers and leads to the credentialing of a White power elite Second he demonstrates how Black workers from legislative staffers to cafeteria servers have fought back against these unequal work processes and injustices on Capitol Hill He shows how Black workers have reimagined Congress as a black capitol a site of minority empowerment where they have used their institutional positions to promote racial justice Examining these processes The Last Plantation argues that Congress and its workplace operate both as sites of oppression and through the labor of Black workers as sites of resistance By exploring the Last Plantation from above and below Jones shows both how racism is maintained by this governing institution and how racism is confronted Through this argument he develops a theory of legislative inequality to show how the unequal distribution of resources and rewards among workers influences the creation of public policy and the organization of the American political system He draws on interviews with 75 congressional staffers archival research ethnographic observations and statistical analysis of personnel records
