Unfamiliar with the educational landscape of privilege and abundance he began exploring the burning questions he had as a teacher on the lessons affluent students are taught in schooling about their place in the world their relationships with others and who they are Grounded in an extensive ethnographic account Learning Privilege examines the concept of privilege itself and the cultural and social processes in schooling that reinforce and regenerate privilege Howard explores what educators students and families at elite schools value most in education and how these values guide ways of knowing and doing that both create high standards for their educational programs and reinforce privilege as a collective identity This book illustrates the ways that affluent students construct their own privilege not fundamentally as what they have but rather as who they are

Teranishi, 2023-07-03 While Asian Americans and Pacific Islanders AAPIs are growing faster than any other racial group in the U S they are all but invisible in higher education and generally ignored in the research literature and thus greatly misrepresented and misunderstood This book presents disaggregated data to unmask important academic achievement and other disparities within the population and offers new insights that promote more authentic understandings of the realities masked by the designation of AAPI In offering new perspectives conceptual frameworks and empirical research by seasoned and emerging scholars this book both makes a significant contribution to the emerging knowledge base on AAPIs and identifies new directions for future scholarship on this population Its overarching purpose is to provide policymakers practitioners and researchers in higher education with the information they need to serve an increasingly important segment of their student populations In dispelling such misconceptions as that Asian Americans are not really racial minorities the book opens up the complexity of the racial and ethnic minorities within this group and identifies the unique challenges that require the attention of anyone in higher education concerned with student access and success as well as the pipeline to the professoriate

The Return to War and Violence Jan Behrends, 2018-09-05 This volume includes five case studies on war and the military in the USSR Russia and Yugoslavia It argues that the armed forces were at the core of socialist statehood and that their role and their change in late socialism and post Communism are thus far understudied Discussing the similarities as well as the differences between the Soviet the Russian and the Yugoslav case the introduction seeks new explanations for war and military violence in these countries Rather than pointing exclusively to ethnic mobilization and nationalism it views the transformation and collapse of the Communist party state and its army as a precondition for violence and civil war It places these cases using innovative methodological approaches to the research on physical violence war and military These studies explore the experience and the representation of violence army service combat and war in late socialism and scrutinize individual actors and their behaviour within violent spaces In retrospect the emerging wars in the post Soviet space from Chechnya to the Donbas and in Yugoslavia are at least as crucial for the region as Gorbachev's reforms They help to better understand the conflicts of the present in the post Soviet space This book was originally published as a special issue of Nationalities Papers

Identities for Life and Death Robert J. Pellegrini, 2010-09 This book is all about stories The stories that shape our identities and how those identities shape our destinies for better or worse for good or evil in humanizing or dehumanizing ways Working from the Shakespearian metaphor All the world's a stage and all the men and women merely players Pellegrini argues that only by understanding how our storied selves develop can we acquire the tools to modify the roles they dictate for us to play on the stage in the theater of real life The author deconstructs a wide variety of what he calls toxic dehumanizing death oriented self scripts as well as creative humanizing life oriented narratives of groups as well as individuals Following the Native American parable of two wolves engaged in mortal combat within us one good the other evil the fundamental premise here is that our identity determines which of our inner wolves we feed and thus which of them will prevail Pellegrini maintains that what's at stake in this battle between humanity's collective inner wolves is not just the quality but the very survival of life on earth From this perspective as individual and group selves are humanizingly or dehumanizingly narrativized by the way we exercise our God given free will in the choices we make so shall life be impacted throughout the world To advance the cause of detoxifying identities in our global society the author presents a rationale and program for an international grass roots social movement aimed at achieving a universal sense of belongingness to a global life system You can watch and listen to a video in which Dr Bob Pellegrini talks about this book and why he wrote it by entering Identities for Life and Death in the search bar at youtube com

differentiating outcomes between and among organizations Through recommending implications for policy and practice based on research Findings revealed an unexpected amount of scholarly research interest on fraternity and sorority involvement and membership correlates in the last two decades from a variety of disciplines Despite a disproportionate focus on behavioral correlates such as alcohol use hazing and sexual assault researchers in the past decade have slowly added psychosocial and educational considerations building toward a more holistic understanding of outcomes related to involvement Campus Traditions Simon J.
