Management of Peripheral Nerve Problems George E. Omer, Morton Spinner, 1998. Here is a completely expanded and restructured edition of the classic work on nerve problems outside the brain and spine. Coverage ranges from surgical anatomy and diagnostic and basic techniques through trauma, compression syndromes and limb reconstruction. Current and comprehensive. This text is the result of contributions from experts in hand surgery, orthopedics, plastic surgery, neurosurgery and rehabilitation.

Surgery of Cervical Myelopathy W. Grote, M. Brock, H.-E. Clar, M. Klinger, H.E. Nau, 2012-12-06. Fifty two patients operated on for this type of spondylogenic myelopathy by the anterior approach were reexamined. The male/female relation was 2/1. Fifty percent were males in the 5th decade. About 20% had a congenital narrow spinal canal with an ap diameter below the minimal standard values. 3. The maximum of spondylogenic narrowing was found between C4 and C6 in 2/3 of the cases. Results: good 44%, satisfactory 31%, unchanged 13%, deteriorated 12%, mortality 0. The duration of the neurological symptoms before operation had no influence on the surgical results. Final neurological restitution was reached within 1 week to 3 months after the operation. The operative results in patients with congenital narrow spinal canal showed the same percentual distribution as the results of the entire group. No factors could be found to explain the groups of unsatisfactory results.

Langmaid,2012-12-06 Tumours of the central nervous system in infancy and childhood show so many diverse pathomorphological characteristics and present so many diagnostic problems that a congress dealing specifically with the subject and thus bringing together a wide range of experts in the field seemed called for The programme of the congress held in Mainz between 22 and 24 October 1981 was designed to provide comprehensive coverage of diagnosis and the various therapeutic procedures as well as of basic research in the field The various lectures given are contained in this book which thus reflects the complete spectrum of topics discussed The interest generated by the congress amply justified our decision to organize it Representatives of various specialities such as neuropathology paediatrics on cology radiology neurosurgery paediatric surgery and neurology and last but not least basic research provided lively and interesting lectures which admittedly raised more problems than they solved In addition to the actual papers presented we attached considerable importance to the different opinions voiced during the congress as reflected in the discussions included at the end of each chapter *Neurochirurgia* ,1979 **Journal of Neurosurgery** ,1986-10
