Head Injury The Facts:

Head Injury Isichei Samuel,2022-02-21 What is a head injury A head injury is any sort of injury to your brain skull or scalp This can range from a mild bump or bruise to a traumatic brain injury Common head injuries include concussions skull fractures and scalp wounds The consequences and treatments vary greatly depending on what caused your head injury and how severe it is Head injuries may be either closed or open A closed head injury is any injury that doesn't break your skull An open penetrating head injury is one in which something breaks your scalp and skull and enters your brain It can be hard to assess how serious a head injury is just by looking Some minor head injuries bleed a lot while some major injuries don't bleed at all It's important to treat all head injuries seriously and get them assessed by a doctor What causes a head injury In general head injuries can be divided into two categories based on what causes them They can either be head injuries due to blows to the head or head injuries due to shaking Head injuries caused by shaking are most common in infants and small children but they can occur any time you experience violent shaking Head injuries caused by a blow to the head are usually associated with motor vehicle accidents falls physical assaults sports related accidents In most cases your skull will protect your brain from serious harm However injuries severe enough to cause head injury can also be associated with injuries to the spine

MAJOR TYPES OF HEAD INJURIES

Hematoma A hematoma is a collection or clotting of blood outside the blood vessels It can be very serious if a hematoma occurs in the brain The clotting can lead to pressure building up inside your skull This can cause you to lose consciousness or result in permanent brain damage

Head Injury D. M. A. Gronwall, Philip Wrightson, Peter Waddell, 1990 Whether they are caused by traffic accidents incidents of violence or occur during sports or leisure activities as many do head injuries can dramatically and tragically alter the victim's ability to cope with life They also present unique problems for caregivers and families of patients Accompanying personality changes and disorders lingering effects such as headache and dizziness and the sheer difficulty in predicting the duration of the healing process and its eventual outcome all combine to create special stresses for those involved This book offers a clear description of the facts of head injury in terms understandable to patients and their families as well as health care staff It explains both physical and psychological effects and how they may best be confronted and possibly overcome It takes the reader from hospital emergency room thorough the posthospital experience detailing the stages of recovery and techniques for charting progress The book also discusses the ways that head trauma can affect families and friends and for patients who have recovered sufficiently there are suggestions on managing the return to normal living For those with more serious injuries a section describes the long term adjustments that victims and their caregivers will need to make The final section outlines the requirements of a typical head injury rehabilitation system and suggests ways for individuals to make sure they have an opportunity to participate The authors have many years of experience working with head injured people and the organizations that have been formed to help them
