Wilson, 2012-12-06 This proceedings volume consists of papers presented at the Seventh International Workshop on Computer Aided Scheduling of Public Transport which was held at the Massachusetts Institute of Technology from August 5 to 8 1997 In the tradition of alternating Workshops between North American and Europe Chicago 1975 Leeds 1980 Montreal 1983 Hamburg 1986 Montreal 1990 and Lisbon 1993 Cambridge Massachusetts USA was selected for the Workshop in 1997 As in earlier workshops the central theme dealt with vehicle and crew scheduling problems and the development of software systems incorporating operations research

techniques for operational planning in public transport However following the trend that started in Hamburg in 1987 the scope of this Workshop was broadened to include topics in related fields Two trends underlie this First the recognition that the core scheduling issues in public transport have important common elements with other application areas in which extensive work is also underway and that it is vital to learn from these other initiatives Second while scheduling is indeed a core problem in public transport planning and has shown the first and greatest benefits from computer application it is intimately related to the preceding tasks in the planning hierarchy such as service design and the following tasks such as operations control and public information *A Handbook for Deputy Heads in Schools* Jim Donnelly,2014-06-11 Aims to provide deputy heads with a practical guide to their complex role in schools Drawing on his own experience and mindful of the increasing managerial demands of a more competitive education system the author offers advice on managing staff student care examinations and much more
