### Headpress 13 Plague:

Headpress ,1999      **A Manufactured Plague** Abigail Woods,2013-06-17 Foot and mouth disease FMD is currently regarded as one of the world s worst animal plagues But how did this label become attached to a curable disease that poses little threat to human health And why in the epidemic of 2001 did the government s control strategy still rely upon Victorian trade restrictions and mass slaughter This groundbreaking and well researched book shows that for over a century FMD has brought fear tragedy and sorrow damaging businesses and affecting international relations Yet these effects were neither inevitable nor caused by FMD itself but were rather the product of the legislation used to control it and in this sense FMD is a manufactured plague rather than a natural one A Manufactured Plague turns the spotlight on this process of manufacture revealing a rich history beset by controversy in which party politics class relations veterinary ambitions agricultural practices the priorities of farming and the meat trade fears for national security and scientific progress all made FMD what it is today

Kristin M. Gerten, Aaron R. Hanlon, 2023-01-13 Enlightenment era writers had not yet come to take technology for granted but nonetheless were as we are today both attracted to and repelled by its potential This volume registers the deep history of such ambivalence examining technology's influence on Enlightenment British literature as well as the impact of literature on conceptions of attitudes toward and implementations of technology Offering a counterbalance to the abundance of studies on literature and science in seventeenth and eighteenth century Britain this volume's focus encompasses approaches to literary history that help us understand technologies like the steam engine and the telegraph along with representations of technology in literature such as the political machine Contributors ultimately show how literature across genres provided important sites for Enlightenment readers to recognize themselves as chimeras hybrids of machine and organism and to explore the modern self as a creature of social reality as well as a creature of fiction
