unknown with confidence and creativity *Mystics in the Street* Renaldo Fischer,1999-01-19 *Mystics in the Street* is a fictional Care of the Soul Carlos Dante is a modern medicine man in the role of a burnt out psychotherapist His message is two fold On one hand this is a time in human history in which we have a vast amount of information available to us about the soul spirit and body its wounds and potential for healing On the other we have never felt less certain about what to do with all that information much less the latest medication although we ve read the top non fiction literature and the newsworthy medical reports *Mystics in the Street* tells a story that suggests a path with heart through the Information Age It shares a way to bypass the news reports radio ads and blurry TV screens It s modern fishes and loaves A way of mastery for people where just one word a poem or a sunrise can become food serving many *In the Mirror of the Past* Tomasz Ratajczak,Bogdan Trocha,2014-09-26 These days we are ever more often confronted by overwhelming events Searching for a way to understand them we turn to mythic archetypes still present in our culture The authors of these essays pose questions about the reliability of the archetypes found in tradition history and scattered mythologemes The essays in this collection deal with the presence of mythic time in modern speculative fiction such as fantasy and alternate histories and discuss major mythologemes and their functions in popular literature and extra literary reality The authors show how mythopoeic fiction becomes a genetically modified mythic mirror in which we hope to see answers to vexing questions or just a reality superior to the ordinary one In the Mirror of the Past Of Fantasy and History is a collection of seven essays by American and Polish authors including Brian Attebery Terri Doughty and Marek Oziewicz with Mircea Eliade s concept of return from history to History as their underlying theme **Jung and Educational Theory** Inna Semetsky,2012-04-12 Jung and Educational Theory offers a new take on Jung s work providing original rich and informative material on his impact on educational research Explores Jung s writing from the standpoint of educational philosophy assessing what it has to offer to theories of education Highlights Jung s emphasis on education s role in bringing up integrated and ethical human beings Offers the perspectives of a diversity of academics and practitioners on topics ranging from the role of the unconscious in learning to the polytheistic classroom Both a valuable addition to the academic library and a significant new resource in the professional development of teachers *The Monomyth Reboot* Nadia Salem,2023-12-12 In this book Nadia Salem examines and questions the enduring relevance of the monomyth or the hero s journey for storytellers and their audiences Created by Joseph Campbell and largely popularized by George Lucas the hero s journey has come to define mythic quests for all However in recent years this genderless paradigm has lost its appeal as a repetitive Bildungsroman and as a result Salem argues for the inclusion of the heroine s journey as a K ntlerroman and a voice of alterity Where the hero s journey reflects a coming of age the heroine s journey reflects a coming of middle age which are arguably equally necessary for the complete fulfillment of character Taking a fresh look at the monomyth Salem analyzes the narratives of Eros and Psyche Jane Eyre and Titanic to argue for an emphasis on the integration of both the hero s and the heroine s journeys Ultimately this book

demonstrates how the monomyth as rebooted turns monomythic mythopoesis into fertile ground for the kinds of epiphanies demanded by transmodernism Scholars of film studies communication composition and mythology will find this book of particular interest New Essays on the African American Novel L. King, Linda F. Selzer, 2016-04-30 This collection contributes to scholarly discussions about the African American novel as a literary form Essays respond to the general question what has been the impact of the African American vernacular tradition from the spirituals blues gospel and jazz to hip hop on the structure and style of the modern African American novel Birds in Fall Brad Kessler, 2007-03-13

Hutchinson, 2018-10-18 The five volume Oxford History of Protestant Dissenting Traditions series is governed by a motif of migration out of England It first traces organized church traditions that arose in Britain and Ireland as Dissenters distanced themselves from a state church defined by diocesan episcopacy the Book of Common Prayer the Thirty Nine Articles and Royal Supremacy but then follows those traditions as they spread beyond Britain and Ireland and also analyses newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent Secondly it does the same for the doctrines church practices stances toward state and society attitudes toward Scripture and characteristic patterns of organization that also originated in earlier British and Irish dissent but that have often defined a trajectory of influence independent of ecclesiastical organizations The Oxford History of Protestant Dissenting Traditions Volume V follows the spatial cultural and intellectual changes in dissenting identity and practice in the twentieth century as these once European traditions globalized While in Europe dissent was often against the religious state dissent in a globalizing world could redefine itself against colonialism or other secular and religious monopolies The contributors trace the encounters of dissenting Protestant traditions with modernity and globalization changing imperial politics challenges to biblical

Conte MD PhD, 2016-07-06 The book *Mysteries of Life Death and Beyond* illustrates the fantastic odyssey of human kind from the dawn of creation and through the evolution of mind body and spirit in order to attain our final destination of self realization and union with the Supreme Creator It provides an answer to the age old philosophical question what is the meaning of life Learn what was present prior to the Big Bang and what happened at the time of the Big Bang based upon our current scientific knowledge Discover how galaxies and our solar system were formed and how life began on planet earth Understand the theory of evolution of the animal species and the eventual development of mankind Find out what really happened in the Garden of Eden and who were the fallen angels and were there really giants in those days Find out if there is life after death and where do we go Do we get more than one chance in life to attain heaven based upon the theory of reincarnation The concept of the triune brain indicates that the human brain is in essence made up of three parts the reptilian brain the limbic system and the neocortex each performing separate neurologic functions but yet interconnected Find out how each affects our thoughts and actions for both good and bad Learn how the seven major energy centers of the body help guide us from material existence up to the higher realms of spirituality and how you can balance each chakra **Stael's Philosophy of the Passions** Tili Boon Cuillé, Karyna Szmurlo, 2013 Sensibility or the capacity to feel played a vital role in philosophical reflection about the natural sciences the social sciences and the arts in eighteenth century France Yet scholars have privileged the Marquis de Sade's vindication of physiological sensibility as the logical conclusion of Enlightenment over Germaine de Staël's exploration of moral sensibility's potential for reform and renewal that paved the way for Romanticism This volume of essays showcases Staël's contribution to the affective revolution in Europe investigating the personal and political circumstances that informed her theory of the passions and the social and aesthetic innovations to which it gave rise Contributors move seamlessly between her political philosophical and fictional works attentive to the relationship between emotion and cognition and aware of the coherence of her thought on an individual national and international scale They first examine the significance Staël attributed

to pity happiness melancholy and enthusiasm in *The Influence of the Passions* as she witnessed revolutionary strife and envisioned the new republic They then explore her development of a cosmopolitan aesthetic in such works as *On Literature* *Corinne* or *Italy* *On Germany* and *The Spirit of Translation* that transcended traditional generic national and linguistic boundaries Finally they turn to her contributions to the visual and musical arts as she deftly negotiated the transition from a Neoclassical to a Romantic aesthetic

Stall's *Philosophy of the Passions* concludes that rather than founding a republic based on the rights of man Stall's reflection fostered international communities of women artists models and collectors authors performers and spectators enabling them to participate in the re articulation of sociocultural values in the wake of the French Revolution Contributors Tili Boon Cuill Catherine Dubeau Nanette Le Coat Christine Dunn Henderson Karen de Bruin M Ione Crummy Jennifer Law Sullivan Lauren Fortner Ravalico C C Wharram Kari Lokke Susan Tenenbaum Mary D Sheriff Heather Belnap Jensen Fabienne Moore Julia Effertz

A Call to Compassion Aura Glaser, 2005-01-26 Aura Glaser wrote this book to remedy a deficiency she discovered while engaged in psychological research a nearly complete omission of the importance and cultivation of compassion Other books exploring Buddhism and psychology have focused on what the Theravada school of Buddhism which teaches personal liberation through enlightenment can offer psychology *A Call to Compassion* works with Mahayana Buddhism in which practitioners commit to the liberation of all sentient beings with compassion central to attaining that goal In her fascinating and exceptionally clear and concise review of the work of Freud Jung and others Glaser shows how psychology has been ambivalent about the subject of compassion and therefore has developed no methodology for helping individuals cultivate this essential quality in the service of helping others Glaser introduces as a remedy the Buddhist practice of the *lojong* expressed in the text of *The Seven Points of Mind Training* for developing love and compassion With modern day life examples she illustrates the four major points compassion for self compassion for others exchanging self and others and no self and no other affirming that these points are indeed attainable If we make the effort to contemplate understand and truly integrate these four essentials we will have a sound basis for both psychological health and genuine transformation

Pierre Teilhard de Chardin and Carl Gustav Jung: Side by Side Fred Gustafson, 2015-03-21 Pierre Teilhard de Chardin and C G Jung *Side by Side* is an anthology written by authors from different backgrounds sharing how the lives of Pierre Teilhard de Chardin and Carl Gustav Jung impacted them personally and or how they understand the relevance of these two men for our present times Contributors to this fourth volume of the Fisher King Review include John Dourley Peter Dunlap Barbara Faris Fred R Gustafson John Giannini Richard W Hanhardt Robert Henderson Steven B Herrmann Jane A Kelley Jon Magnuson Francisco Paco Martorell Stan V McDaniel Dennis L Merritt and Laura A Weber Though C G Jung and Pierre Teilhard de Chardin never met their independent intellectual inquiries and courageous researches pushed the personal and collective soul forward and placed both of them at the foreground of needing to understand and integrate on a

planetary level the core values of their expansive work Both Jung and de Chardin were concerned with science and religion and operated within these paradigms Both of them shook the world by offering up views on one hand of the profound depths of the human psyche and on the other presenting a profound re consideration of evolution as a process leading toward a social unification of the planet One used the concept of individuation the other spoke of evolution Each took these concepts to a creative depth so much so that the world they lived in either deeply admired or detested them Both had conflicts in their chosen fields Jung was a psychologist who used the field of science to explore the religious depths of the human soul by studying mythology world religions folk tales dreams and human behavior Chardin used the ground of religion to work in the field of science via paleontology geology and physics as he explored a deeper and relevant understanding of evolution Though each began from different intellectual platforms they each crisscrossed into the other s territory of inquiry and related their ideas to include the full scope of humanity One went deeply into soul and found matter whereas the other went deeply into matter and found soul In their own ways both spent their careers trying to heal the split between spirit and matter in the weltanschauung of their times reflected in the human psyche and in the general religious views permeating most of Western culture
