Engendering Households in the Prehistoric Southwest Barbara J. Roth, 2016-12-15 The French anthropologist Claude Lévi Strauss once described a village as deserted when all the adult males had vanished While his statement is from the first half of the twentieth century it nonetheless illustrates an oversight that has persisted during most of the intervening decades Now Southwestern archaeologists have begun to delve into the task of engendering their sites Using a close to the ground approach the contributors to this book seek to engender the prehistoric Southwest by examining evidence at the household level Focusing on gendered activities in household contexts throughout the southwestern United States this book represents groundbreaking work in this area The contributors view households as a crucial link to past activities and behavior and by engendering these households we can gain a better understanding of their role in prehistoric society Gender structured household activities in turn can offer insight into broader scale social and economic factors The chapters offer a variety of theoretical and methodological approaches to engendering households and examine topics such as the division of labor gender relations household ritual ceramic and ground stone production and exchange and migration *Engendering Households in the Prehistoric Southwest* ultimately addresses broader issues of interest to many archaeologists today including households and their various forms identity and social boundary formation technological style and human agency Focusing on gendered activities in household contexts throughout the southwestern United States this book represents groundbreaking work in this area The contributors view households as a crucial link to past activities and behavior and by engendering these households we can gain a better understanding of their role in prehistoric society Gender structured household activities in turn can offer insight into broader scale social and economic factors
